HOW TO ORDER

ORDER ONLINE

Ordering online is quick and straight forward. Simply search by part number or browse by model and component categories. Our site features detailed schematics so identifying the correct part is easy, right down to the last nut and bolt. Should you get stuck, our knowledgeable sales staff are ready to help using our live-chat feature.

Add the parts that you need to your basket and head to the checkout for delivery and payment options. Once checked out, you will receive a confirmation of your order via email, by which time your parts will be being picked and packed, ready to be sent to your door.

ORDER THROUGH A BRANCH

Whether you are visiting, calling or emailing, our knowledgeable branch staff will be happy to help you get the parts that you need. They are car enthusiasts too and understand the challenges that sometimes come with identifying the right parts for rare and classic cars. Of course, the more information about your vehicle that you have to hand, the quicker and easier it will be for us to help.

Arranging to collect parts from our branches is easy, our teams will let you know once your order is ready. Alternatively, they can dispatch your order directly to you.

PRICING

Due to constant variations of world markets and currency fluctuations the prices in this catalogue are subject to change. We make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter prices without prior notice. For the latest prices, please call or visit moss-europe.co.uk.

All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable). Please note EU countries may be charged at their local VAT rate, countries outside the EU will not be charged VAT. Prices are correct at the time of going to print, postage & packaging is not included. E&OE.

SHIPPING & DISPATCH

Orders for delivery in the UK may be dispatched by regular post for small/lightweight items, larger items may be dispatched via a courier. Please call us for the best delivery option for your order and the latest delivery prices.

For delivery outside the UK we offer the following services. Economy delivery (by road): 2 to 5 days (approximately). Express delivery (by air): 1 to 2 days (Guaranteed). For small and low value orders we also use airmail. For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on either gross weight or volumetric weight, whichever is greater. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own collection.

UK OPENING TIMES

Open Monday to Friday

Store opening times vary. Please contact your nearest branch for more information.

See website for Paris opening times

90 DAY MONEY BACK PEACE OF MIND WARRANTY

It's simple, if you change your mind for any reason, all uninstalled parts still in their original condition and packaging may be returned to us within 90 days from the date of purchase for a full refund. A copy of the original invoice or picking label must accompany the return. Return freight is paid by the customer, unless returned due to our error.

In the event of a part failing in use, all parts are warranted against defects in materials and workmanship for 12 months from the date of purchase. Please remember that all returns must be accompanied by the original invoice, return freight will be reimbursed. For more details see our website or contact your local branch.

To kick off the MGB's big 6-0 birthday celebrations we delve into the development and launch of this evergreen classic icon

More than half a million MGBs rolled off Abingdon's production line between 1962 and 1980, making it one of the most adored British sports cars of all time. Good looking, quick and relatively inexpensive to buy and run, it's no wonder it attracted fans in their droves. And not just here; crucially buyers loved it too across the Pond where US enthusiasts were won over by its simplicity and charm.

Soft Option

Despite looking very different, the MGB used much of its predecessor's underpinnings, including the MGA's front suspension and rack and pinion steering. It also carried over its rather archaic live rear axle and leaf sprung suspension, albeit set much softer in order to achieve the desired more compliant ride.

The big revelation though was its rigid monocoque construction bodyshell which immediately dialled out much of the old car's bone-shaking ride.

Move over MGA

The car was conceived as a replacement for the MGA which, despite being a game changer itself at launch in 1955, was now deemed lacking in creature comforts by many. Particularly when viewed alongside more civilised rivals in the form of the Sunbeam Alpine and Triumph TR4A.

It seemed only fitting then that the man responsible for the MGA, Syd Enever, took on the responsibility of developing the new car, with the firm's design guru Don Hayter put in charge of styling. He did have a little help, however, from design house Pininfarina no less!

There was a price to pay, though. That monocoque added weight so to compensate there was now a new three-bearing 1.8-litre B-Series engine, enlarged from 1622cc to 1798cc, which produced 95bhp at 5400rpm and offered useful extra torque. Mated to a four-speed 'box derived from the MGA and still with a crash first, reassuringly the MGB proving marginally quicker than the model it replaced.

As for the rest of the car, the vertically slatted grille was finished in chrome with a chrome surround and steel wheels were standard, with centre lock wire wheels offered as an option. Leather, at least on the wearing surfaces, was used on the seats, while pvc mats and carpet over the transmission tunnel were also included. As was a starting handle and jack!

Better by far

With the car finished, it was set to make its debut at the 1962 Earls Court Motor Show priced at £949 15s 3d including purchase tax. To put this into perspective, that was £240 less than the Austin-Healey 3000 MkII on sale at the same time. That said, the latter did have two extra cylinders and was 2.2 seconds quicker to 60mph than the MG...

Pundits were suitably impressed with the MGB, the Spring 1963 edition of Autocar remarking on how the Abingdon firm had successfully created a modern successor to the MGA:

“Whatever the diehard enthusiast may say to the contrary, and however hard the traditionalist may cling to a superseded model, there is no doubt that the new MGB 1800 is a much superior car to its predecessor, the MGA, in all forms.”

The testers went on to praise the new car for its less harsh, free-revving engine and the fact that it could happily sustain a cruising speed of 90mph without “evidence of stress.”

Autocar also liked the levels of comfort, its tautness and reassuring Lockheed brakes which featured discs at the front.

Not so positive was their appraisal of the optional extra heater who’s efficiency was impaired because its fan was not working! Another niggle, it seems, was the fuel gauge which, as they wrote, was “singularly vague and inaccurate” and could read anything between full and empty according to whether the car was accelerating or braking.

Minor details apart, the MGB was a success and the launch model paved the way for various subsequent improvements – not least the arrival of a GT version in 1965 – that made it into the much-loved classic legend that it is today.

You’ll have to wait for the next 60th celebration blog story for that one!

MGB – marking the changes

How the MGB evolved over its 18 years of production

The first MGB, launched six decades ago this year, went down a storm. In fact, carrying a price tag of £834, it was perfect – which is why it sold in such high numbers. Some 258,308 to be precise.

Indeed, it was so spot-on from the start that there was little impetus to change it besides making the fuel tank a little larger. Oh, and in 1964 embellish it with a smoother, five-bearing engine. Early on, too, those intriguing door handles that needed pulling to open were replaced by more conventional push button affairs.

GT

The only fly in the ointment was that by the mid-'60s the most forward-thinking manufacturers were beginning to recognise the shortcomings of the traditional soft-top. While stalwarts still loved the flap of a primitive canvas roof and the inevitable puddles of water, a raft of new buyers now hankered after the added creature comforts of a coupe, a couple of extra seats (however small) and a little more practicality. Hence the introduction, in 1965, of the Pininfarina-styled MGB GT.

With its rakish fastback profile, opening rear hatch and two small rear seats, while being slightly heavier than the MGB and not quite as sharp, it was more glamorous, more practical, had a slightly higher top speed and actually a tad cheaper. No wonder then that it was instantly so popular. Indeed, an impressive total of 98,237 chrome-bumpered GTs left the Abingdon production line between 1965-'74.

In 1966, handling of both roadster and GT versions was improved by the addition of a front anti-roll bar.

MkII

Further improvements were incorporated into the MkII MGB which broke cover in 1967; notably dual circuit brakes, improved all-synchro gearbox, quieter Salisbury rear axle, the option of an automatic, adjustable seats and alternator instead of a dynamo. While performance remained unchanged, a lower final drive allowed more brisk A-road overtaking.

Under British Leyland ownership, in 1969 a matt black grille and Rostyle wheels made an appearance and vinyl replaced leather inside.

For the eagle eyed, subtle British Leyland badges appeared for the first time on the front wings.

MkIII

Interior changes in 1971 denote the arrival of the MkIII and that unpopular 1969 grille was binned a year later.

MGB GT V8

Several firms fitted Rover's V8 into the MGB 'shell' but it took until August 1973 for the factory to release their own version which was only available as a GT. Performance still looks impressive today; 0-60mph could be reached in just 7.7 seconds and thanks to the V8's light alloy construction and overdrive, it can typically return an impressive 27-29mpg on a run.

Specification included servo assisted brakes, distinctive Dunlop composite wheels featuring a cast alloy centre fitted to a chromed steel rim, tinted glass, fin cord covered adjustable seats headrests, two speed wipers and overdrive as standard. The price new was £2,294 - a £719 premium over its four-pot stablemate.

Sadly, despite its many virtues, and the fact that it straddled both the chrome and rubber bumper eras, it came too late and at the wrong time (during a fuel crisis and the rising cost of living) and sales were disappointing.

A paltry 2591 were made in its three-year lifespan.

'Rubber bumper' MGB/GT

US safety legislation changed the look of many a classic in the early '70s and the MGB succumbed too in 1974 when polyurethane covered steel bumpers replaced the delicate chrome affairs and ride height was raised 1.5in. It also gained 100lb in weight - which had a less than complementary effect on handling with the roadster being particularly badly hit by roll-induced oversteer.

MGBs used twin six-volt batteries connected in series from launch which helped with weight distribution, but this all changed with the rubber bumper models when they were replaced by a single 12v battery.

On a more positive note, overdrive was made standard from 1975 and from 1977 the front and rear valances were painted black to help the new bumpers blend in better and a new dash was added with better positioned heater controls, new column stalks and more petite four-spoke wheel. Other improvements included lower geared steering for more precise direction changes and crucially the fitment of front and rear ant-roll bars to provide a belated solution to the rubber bumpered car's handling issues.

In short, while the initial impact of the bigger bumpers spoiled things to an extent initially in '74, the 1977 changes which improved equipment levels, handling and overall refinement served to address the imbalance and make the car nicer to drive and more user friendly.

Last of the line

The final MGB left Abingdon in October 1980, bringing to an end the story of the best-selling roadster of all time before it was eclipsed by the car it inspired, the Mazda MX-5 in 2013.

Well, almost. Reportedly, Aston Martin wanted to save it and with help from William Towns take it into the 'eighties and beyond'. Sadly, BL chairman Michael Edwardes didn't share the same conviction and it was axed anyway.

The final attempt to revive the legacy of the MGB came in 1992 when Rover Special Products launched its 3.9-litre Rover-powered RV8. It was too dear though, and the plug was pulled in 1995 with the majority of the 1982 built going to Japan (some 1583) and rest (around 200) finding new owners Down Under.

FIBREGLASS PANELS

Fibre glass panels are offered as an alternative to steel panels primarily for competition use, where the weight saving can give valuable power/weight advantages and they are lighter and cheaper to replace if damaged. Our fibreglass panels are made from good quality materials and finished in white gel coat. The wings are manufactured as a 'skin', featuring the necessary flanges and rear bracket to allow fitting but do not have any holes or fittings included, these must be positioned whilst fitting. They are made to chrome bumper specification, but can be easily modified for rubber bumper cars. Bonnet and boot lids are available as skins or with frames featuring captive nuts as required. A good fit and finish can be achieved with these panels but it will take time and care to get it right. See the Restoration section for fitting hardware.

- Front valance.....TT70702 **£83.80**

See page A52 for Bonnet straps and pin sets.

SPOILERS

These spoilers are replicas of original factory items. Fitting a spoiler alters the airflow around and under the car to give increased stability at speed and also enhance the look of your MGB.

LEYLAND ST STYLE SPOILERS

The ST style spoilers were developed by Leyland Special Tuning using a wind tunnel for works competition cars. This style replaces the front valance and reduces the ground clearance; it is available plain or with recesses for lamps or brake ducts. Available in fibreglass or ABS plastic.

Front spoiler

- Leyland ST style front spoiler, fibreglass STR189..... **£101.30**
- Leyland ST style front spoiler, black, ABS, plastic STR189A ... **£144.30**
- Leyland ST style front spoiler, fibreglass MGS70730... **£126.40**
(With recesses for auxiliary lamps or brake air ducts).

Rear spoiler

- Leyland ST style rear spoiler, fibreglass TMG70740 ... **£89.60**
(Roadster only).

MGB LE STYLE FRONT SPOILER

The MGB LE style spoiler was originally fitted to the LE range of Roadster and GT models in 1979 but can be fitted to all rubber bumper models, giving the front a more sporty appearance. Available in fibreglass and ABS plastic.

- MGB LE style spoiler, fibreglass BHH2682FG. **£107.40**
- MGB LE style spoiler, black, ABS, plastic..... BHH2682A . **£114.30**
- Fitting kit LE style spoiler..... BHH2682K... **£11.00**

SEBRING FRONT & REAR VALANCES

MGS70737

MGS70738

Designed for works MGB's and MGC's to improve aerodynamics once the bumpers have been removed.

The front valance features apertures for cooling radiator and brakes and the rear valance smooths off the area below the light pods. The front valance is simply mounted using standard hardware.

The rear valance should be bonded to the car and fared in to the required finish. Designed for chrome bumper models but can be adapted to fit rubber bumper cars. Supplied unpainted.

Sebring front valance MGS70737...**£118.90**

Fitting kit, front valance GBK3002..... **£6.70**

Sebring rear valance MGS70738...**£108.90**

HEADLAMP COWLS

As used on Works prepared cars to improve aerodynamics for competition use. We offer two types of cowlings either replicas of the 'Works' style or our own 'Moss' style. Both kits use high quality moulded cowls.

AJJ3307

AJJ3308

Works style cowls

These cowlings are reproductions of the original Works cowlings. They are designed to be used with the original style works brackets. We recommend the Works style to fit with the Sebring GTS wing kits. Supplied as a pair of Perspex cowls, they can be fitted with our fitting plate kit as per the original Works cars.

Headlamp cowl set, 'Works' style (pair)AJJ3307..... **£91.60**

Bracket set, 'Works' style (4 piece).....AJJ3308..... **£30.70**

222-130

Moss style cowls

These headlamp cowlings have been improved with a slight flare to fit neatly over the tip of the wing moulding. They are also supplied with press studs to allow for easy installation. Supplied as a pair of perspex cowls, with press stud fixings.

Headlamp cowl set222-130.....**£138.70**

SEBRING WING SET

The MGC GTS was a great looking version of the classic GT shape. The wide arches give the car a more purposeful stance and aggressive look which has become a popular choice in various MGB race championships. It also allows the fitting of up to 9J x 15" wheels. You can recreate that look on your GT or Roadster with our Sebring wing kits.

We recommend fitting the wing kit with the special 'wide' front valance. This valance features extended & shaped ends to meet the wheel arch profile of the front wings. The Sebring rear valance can be used at the rear of the car.

A good fit and finish can be achieved with these panels but it will take time and care to get it right. The kits include a pair of front wings and a pair of rear lower wing sections, valances sold separately. We recommend that the wing set is purchased and offered up for fitting before any original bodywork is removed. All panels are unpainted fibreglass.

Sebring wing set, GT (4 piece) SEB7464.....**£788.70**

Sebring wing set, Roadster (4 piece) SEB7465.....**£810.20**

Sebring 'wide' front valance MGS70737A .**£118.10**

Sebring rear valance MGS70738...**£108.90**

UPRATED BRAKE KITS

Improving the braking system of your car is essential for fast road, track day and competition use. These two kits offer Wilwood 4-pot calipers with a choice of vented or solid discs. Using 4-pot calipers provides greater pressure across a larger pad area to increase braking efficiency.

TMG30752

4-pot vented brake kit

This kit is supplied with high quality 270mm vented discs and Wilwood Dynalite lug mounted, 4-pot calipers with EBC Greenstuff brake pads to give a brake set up ideal for track day or competition use. The vented discs are of benefit when extreme braking is required, keeping the brakes at optimum temperature, such as on track. This kit can only be used with 15" bolt-on wheels.

- 4-pot vented brake kitTMG30752....£827.10
- Brake pad set, Greenstuff (replacement)TMG30753G... £90.80
- Brake pad set, Yellowstuff (replacement).....TMG30753Y ..£113.60

586-628

4-pot drilled and slotted brake kit

This brake kit uses Wilwood radial mounted 4-pot aluminium calipers, high quality 270mm grooved and drilled discs, Goodridge brake hoses to give a brake kit that looks good and performs really well.

This kit can be used with standard size 14" wheels, original Rostyles and bolt-on or wire wheels, but not LE or V8 alloys. This kit is ideal for road, fast road and occasional track day use as the calipers feature full dust seals. Supplied with Wilwood brake pads, hardware and fitting instructions.

- 4-pot drilled and slotted brake kit586-628£1,081.10
- Brake pad set, Greenstuff (replacement)SPB3453G..... £84.30
- Brake pad set, Yellowstuff (replacement).....SPB3453Y.....£106.00

BTB387G

UPRATED BRAKE DISCS

Up-rated brake discs are designed to give improved braking using standard 2-pot calipers and your choice of brake pads, see right. Ideally suited to fast road and occasional track day use.

EBC turbo grooved brake discs

The grooves help deglaze the pads and remove dust and grit and the dots disperse the surface gasses that build up as the pads get hot, maintaining friction surface contact. EBC discs are made from highest quality steels, machined to close tolerances and x-ray inspected. Gold zinc finished for corrosion resistance.

- EBC turbo grooved brake discs, MGB (pair) BTB387G..£160.00
- EBC turbo grooved brake discs, MGB V8 (pair) BTB1319G..£270.40
- EBC turbo grooved brake discs, MGC (pair) BTC371G..£272.50

BTB387GXD

Cross-drilled brake discs

Using cross-drilled discs improves braking by dispersing the surface gasses that build up as the pads get hot, reducing fade, giving more consistent braking. Important: If fitting grooved or cross-drilled discs to replace standard solid discs, they must be fitted as a pair.

- Cross-drilled brake discs, MGB (pair)BTB387GXD £81.00
- Cross-drilled brake discs, MGB V8 (each).....DBD102 ...£101.00
- Cross-drilled brake discs, MGC (each)DBD103 ...£116.90

BRAIDED BRAKE HOSES

These race inspired steel braided brake hoses not only look fantastic but because they don't swell under pressure they provide a much firmer feel to the brake pedal and more pressure at the caliper.

GBL602190

GBL602220

Goodridge braided hose sets

All Goodridge braided hoses are made from stainless steel. The sets are supplied either clear, or for a more original look the Classic sets are supplied in black.

- Brake hose set, black, mild steel fittings, MGB & V8 ...GBL602190 .£60.72
- Brake hose set, clear, mild steel fittings, MGB & V8 ...GBL602120 .£60.72
- Brake hose set, clear, stainless steel fittings, MGB & V8...GBL602220 .£99.60
- Brake hose set, black, mild steel fittings, MGC.....GBL692190 .£60.72
- Brake hose set, clear, mild steel fittings, MGCGBL692120 .£60.72
- Brake hose set, clear, stainless steel fittings, MGC...GBL692220 .£82.68

GBH159SS

Aeroquip braided single hoses

These high quality Aeroquip hoses are stainless braided with bright plated mild steel end fittings.

- Brake hose, front, each, MGB & V8 GBH158SS ..£26.10
- Brake hose, rear, each, MGB & V8..... GBH159SS ..£27.50
- Brake hose, front, each, MGC..... GBH166SS ..£22.40
- Brake hose, rear, each, MGC..... GBH175SS ..£20.40

Replacement braided hoses for telescopic damper or coil-over conversions.
 Brake hose, front, each, MGB & V8 TMG3772 ...£31.40

GWC1101Z

GWC1121

MGB, MGC UPRATED REAR WHEEL CYLINDERS

Roadster models tend to lock their rear wheels under very heavy braking, this can be counteracted by fitting modified rear wheel cylinders that reduce the pressure exerted on the rear shoes. The back plate will need drilling on some models to fit modified cylinders. Roadsters only, GT's do not seem to need this modification.

- Wheel cylinder, MGB Roadster GWC1101 **£17.90**
- Wheel cylinder aftermarket, MGB Roadster..... GWC1101Z... **£12.00**
- Wheel cylinder, MGC Roadster..... GWC1121 **£20.70**

BHH1148K

TT3949

REMOTE BRAKE SERVO KIT

For those who find the brake pedal rather hard after driving more modern vehicles, these remote servo kits make braking easier by reducing pedal effort. Suitable for all single line brake circuits they are remote mounted and easily plumbed into the hydraulic and vacuum systems of the car. We offer both a Lockheed and aftermarket kit, both are supplied with mounting brackets and hardware.

- Remote brake servo kit Lockheed TT3949.....**£291.00**
- Remote brake servo kit aftermarket TT3949Z **£99.00**
- Stainless steel servo bracket kit, MGB BHH1148K... **£49.00**

COPPER BRAKE PIPE KITS

These non-rust, copper brake pipe sets are ready assembled with brass end fittings. The pipes are pliable for easy installation.

TMG31051KV

EBC BRAKE PADS

EBC brake products are renowned for their high quality and excellent performance. All grades of brake pad use Kevlar as the binding material rather than the traditional steel, this prevents the build up of corrosive brake dust that can damage alloy wheels.

The Kevlar based formulation is guaranteed to meet or exceed performance of all original equipment pads with strong progressive braking, reduction of dust on wheels and fantastic wear life. We stock the standard replacement Ultimax, uprated Greenstuff and race Yellowstuff pads. EBC Ultimax pads use EBC's Kevlar-based material for standard replacement brake pads.

- EBC Ultimax road, MGBTMG30751KV.... **NCA**
- EBC Ultimax road, MGB GT V8TMG31051KV.. **£29.20**

TMG30751GS

EBC Greenstuff brake pads are a high efficiency upgrade pad which will increase your car's stopping power by 20% over standard replacement pads. Tested in rally cars, these pads are high friction, fade resistant with immediate pedal response.

- EBC Greenstuff fast road/sport, MGB.....TMG30751GS.. **£41.80**
- EBC Greenstuff fast road/sport, MGB GT V8...TMG31051GS.. **£64.40**
- EBC Greenstuff fast road/sport, MGCTT31501G **£59.20**

TMG31051YS

EBC Yellowstuff brake pads are a full race specification material, capable of withstanding high temperature use with good wear characteristics, requiring minimal warm up. Ideal for regular track day and race use.

- EBC Yellowstuff race, MGB.....TMG30751YS .. **£77.80**
- EBC Yellowstuff race, MGB GT V8.....TMG31051YS ..**£108.20**
- EBC Yellowstuff race, MGC.....TT31501Y..... **£86.20**

BCC103

BCC BRAKE CALIPER SET

These calipers from BCC are machined from Aerospace grade aluminium for strength and durability, with the pistons made from 303 stainless steel to prevent corrosion and ensure a long life of faultless operation. Each BCC caliper kit contains a pair of BCC 4 pot calipers anodised in black, EBC Ultimax brake pads (including pins, clips and springs), bleed nipples, bridge and feed pipes. Each kit is a simple bolt-on installation requiring no permanent modification to the vehicle and is completely reversible.

- BCC brake caliper set, front, MGB & GT.....BCC103.....**£715.00**
- BCC brake caliper set, front, MGB GT V8.....BCC110.....**£715.00**
- BCC brake caliper set, front, MGCBCC104.....**£715.00**
- EBC brake pad set, replacement, Greenstuff ... BCC202G **£56.20**
- EBC brake pad set, replacement, Ultimax..... BCC202KV..... **£17.80**

MOTO-LITA STEERING WHEELS

Moto-Lita are among the finest replacement steering wheels available. Designed to enhance the appearance of the cockpit and provide an improved feel for the driver.

Available in a variety of styles, including polished or black painted spokes, with the option of polished wood or black leather rims.

Available in 13" to 15" diameters. Boss kits for each specified model of car are required for fitting (available separately).

Moto-Lita

See page A65 for more information

REVOTEC COOLING FAN KITS

Keeping your engine running at its optimum temperature will ensure the best performance and economy.

Revotec and Moss Europe have co-designed these high quality bespoke fan kits using the latest high efficiency fans with adjustable electronic controllers. These kits are designed to replace the standard original mechanical fan, reducing the load on the engine, noise and improving both power and mpg.

Unlike other fan kits that use universal mounting systems, these kits fit using bespoke laser cut brackets that mount directly to the radiator cowl using existing mounting bolts.

See page A31 for more information

UPDATED FRONT COIL SPRINGS

After fitting an uprated anti-roll bar and/or a telescopic conversion, the next stage of suspension tuning is to improve the springs. The ride height of the MGB cannot be reduced by a great deal, but lowered springs with a stronger spring rate will substantially improve handling.

We now offer our range of coil springs in a new modern specification material, silicon chrome steel. This material is used in many current production cars and is lighter than the original chrome vanadium steel, which will help reduce the 'un-sprung' weight, ideal for fast road & competition cars.

MGB & V8 Roadsters

Application	Spring rate	Ride height (approx)		Part No.	
		Chrome			
Standard (to 1972)	350lbs	36.5cm	n/a	AHH6451	£30.00
Standard (1973 on)	400lbs	37cm	38cm	BHH1225	£23.80
Road/uprated	480lbs	36cm	35cm	AHT21	£30.50
Road/lowered	550lbs	35cm	33.5cm	TT40701PR	NCA
Road/sprint	550lbs	34cm	33cm	TMG40706PR	NCA
Race	660lbs	33.5cm	32cm	TMG40707PR	NCA

MGB & V8 GTs

Application	Spring rate	Ride height (approx)		Part No.	
		Chrome			
Standard (to 1974)	480lbs	35cm	n/a	BHH1077	£27.20
Standard (1975 on)	400lbs	n/a	34.5cm	BHH1225	£23.80
Road/uprated	480lbs	34cm	33cm	AHT21	£30.50
Road/lowered	550lbs	33.5cm	32.5cm	TT40701PR	NCA
Road/sprint	550lbs	33cm	32cm	TMG40706PR	NCA
Race	660lbs	32cm	n/a	TMG40707PR	NCA

Note: We have quoted approximate ride heights as a guide. With the car on level ground, measure the ride height from the centre of the wheel hub vertically to the wheel arch lip. Ride heights may vary.

Front coil spring spacers

These nylon spacer rings can be fitted either above, or below the spring, each raising the ride height of the car 5mm (3/16") to allow fine tuning. A maximum of 2 per side can be fitted. Spacers are sold individually.

Spring spacers (each) MGS40704.... £18.80

NEGATIVE CAMBER WISHBONE ARMS

Fitting these wishbone arms will induce negative camber to the front suspension, improving turn-in for quicker and safer cornering. They are recommended for all road cars and are essential for competition. These wishbone arms are supplied as a car set. Once installed the tracking must be corrected, we recommend a toe in of between 1/8" to 3/32".

MGB GT V8 negative camber wishbone arm set... TMG30727 ... £69.00

FRONT TELESCOPIC DAMPER CONVERSIONS

This conversion kit is the simplest way to get the benefits of telescopic dampers for your MGB, available with Spax, Koni or Gaz dampers. Specially designed brackets support the telescopic dampers, the top bracket fits neatly under the lever arm damper and the lower bracket bolts to the side of the wishbone arm. The kit has been designed to retain the lever arm damper as the upper suspension link, the damper valve removed keeping the fluid to lubricate the mechanism. This conversion offers improved damping for standard height cars for road or motorsport use on either MGB or BV8's, although some competition regulations do not allow this conversion. Kit includes: brackets, dampers, brake hoses, fitting hardware and instructions.

- Front Spax conversion kit* SPCK12 £380.04
 - Front Koni conversion kit* TMK30708 £410.00
 - Front Gaz conversion kit TMK30709 £460.50
 - (*For standard height cars only).
 - Spax replacement dampers (pair) SPG942PR.... £204.96
 - Koni replacement dampers (pair)..... TMG30702PR . £264.00
 - Gaz replacement dampers (each) TMG30703 £79.00
- Note: Replacement front telescopic dampers (always fit in pairs).

TMG30705

UPDATED LEVER ARM DAMPERS

These new uprated lever arm dampers are built on the original Armstrong equipment. Each unit is tested to check its performance against the design parameters, and the valves are individually set to provide the correct hydraulic characteristics for the application. For some models, we also supply reconditioned units on an exchange basis. If your standard units are in good condition, we stock competition valves should you wish to uprate them, as well as Penrite shock absorber oils so you can tweak your damping rates. Units are sold individually but should be fitted in pairs. Where there is a choice, we suggest the 25% uprated shocks are suitable for fast road and 50% uprated shocks are for competition use only.

- Front new 25% uprated damper right/left-hand TMG30705N.... £229.70
- Front recon 25% uprated damper right/left-hand... TMG30705..... £83.70
- Front new 50% uprated damper right/left-hand TMG307051 ... £254.70
- Rear new 25% uprated damper righthand TMG30714RN .£155.30
- Rear new 25% uprated damper lefthand. TMG30714LN .£155.30
- Rear recon 25% uprated damper righthand. TMG30714R.... £69.00
- Rear recon 25% uprated damper lefthand TMG30714L £69.00
- Replacement valve 25% uprated front AHH7217..... £24.80
- Replacement valve 25% uprated rear..... AHH7218..... £30.80

MOSS 'SPECIAL TUNING' HANDLING KITS

To get the best from your MGB's handling the suspension should be stiff at the front and supple at the rear. Our well proven handling kits are a good way to enhance the handling of your car and will work well with standard or uprated springs with either lever arm or telescopic dampers. Stiffening the front reduces body roll, preventing rear wheel lift. Whilst the improved rear axle location with harder bushes prevents rear end steer. Kits include a front anti-roll bar, uprated mountings, lower wishbone and rear shackle bushes.

Chrome bumper models

- MGB Roadster 3/4" bar TMK30750 ..£133.10
- MGB Roadster V8 13/16" bar TMK30751 ..£139.20
- MGB GT 13/16" bar TMK30751 ..£139.20
- MGB GT V8 7/8" bar TMK30753 ..£163.70
- MGC 3/4" bar TMK31152 ..£148.40

Note: Some early cars and US models were supplied without an anti roll bar. See the Restoration section for supplementary parts to allow fitting.

Rubber bumper models

Our rubber bumper Evolution 2 kit is designed to fit early (1974-76) rubber bumper cars. Later rubber bumper cars (1976 on) have a rear anti-roll bar as standard to control body roll induced by higher ride height and heavier car. Our kit includes front and rear anti roll bars and fittings and works extremely well on early rubber bumper cars.

- MGB Roadster and GT (1974-76) Evolution 2 kit.. EHK101£317.00
- MGB Roadster (1976 on) 13/16" bar..... TMK30751 ..£139.20
- MGB Roadster V8 (1976 on) 7/8" bar..... TMK30753 ..£163.70
- MGB GT and GT V8 (1976 on) 7/8" bar TMK30753 ..£163.70

Anti roll bars

For customers who want to develop their own suspension set ups we offer a range of anti-roll bars in various sizes and rates.

*Stiffness is the percentage increase over the standard 9/16" bar.

Specification	Dia	Rate		
MGB standard.....	5/8"	60lb	120%*	BHH882..... £81.60
MGB uprated road.....	3/4"	137lb	280%*	BHH1219..... £96.90

MGB special road.....	13/16"	185lb	370%*	TMG30783 ..£102.00
MGB fast road.....	7/8"	228lb	450%*	TMG30784 ..£114.70
MGB competition.....	1"	382lb	760%*	TMG30785 ... £93.20
MGC uprated road.....	3/4"	137lb	280%*	TMG31781 ..£114.60
MGC fast road/sprint ..	7/8"	228lb	450%*	TMG31784 ..£129.60
MGC competition.....	1"	382lb	760%*	TMG31785 ..£130.60

See page A13 for suspension bushes.

Uprated anti roll bar bushes

Outer anti roll bar bushes in nylatron give an approximately 8% increase in tension for sprint or competition cars, they can be used on all MGB anti roll bars and should always be used with 7/8" or 1" bars. Note: The fitting of nylatron bushes is best left to someone with engineering experience.

- Nylatron outer bush TMG30796£4.33

FRONT COIL OVER CONVERSION

Our conversion coupled with Gaz dampers, brings the MGB's front suspension up to modern standards of handling and ride by combining the spring and damper into a single unit. The conversion discards the old lever arm dampers replacing them with a sturdy top wishbone assembly. Our dynamic suspension conversion offers many improvements including a more positive ride, lighter steering and, the ability to adjust the car's ride height. These kits are supplied with new lower spring pans, upper wishbones and mounting blocks, polyurethane upper wishbone and damper mounting bushes, shock absorber unit and spring, mounting hardware and fitting instructions. Subframe, stub axle and king pin are not included. Installation is straight forward and the whole conversion can be completed within 4-5 hours. Many competition regulations do not allow this conversion.

- MGB Roadster standard road conversion TMG40750G ...£785.00
- MGB Roadster fast road conversion..... TMG40751G ...£785.00
- MGB GT GT V8 standard road conversion TMG40751G ...£785.00
- MGB GT GT V8 fast road conversion..... TMG40752G ...£785.00

- Spring collar adjusting spanner TMG4901..... £10.10
 - Superpro bush kit, Gaz dampers, top TMG49025ASPK £27.00
 - Superpro bush kit, Gaz dampers, bottom TMG49025BSPK £28.40
 - Replacement Gaz dampers TMG49025.....£139.70
 - Replacement QTEC dampers..... TMG49062.....£207.00
 - Replacement Spax dampers..... TMG49025S ...£198.00
- (QTEC & GAZ dampers are interchangeable. Some modification will be needed to fit Spax dampers).

Replacement and alternative springs for MGB coil over conversions

- Standard road spring 400lb x 7" (each) TMG49021..... £80.60
- Standard road spring 450lb x 7" (each) TMG4902A £80.60
- Standard road spring 475lb x 6" (each) TMG4902..... £72.30
- Standard road spring 475lb x 7" (each) TMG49024..... £71.40
- Fast road spring 500lb x 6" (each) TMG4903..... £68.30
- Fast road spring 500lbs x 6.5" (each) TMG49032..... NCA
- Fast road spring 500lb x 7" (each) TMG49034..... £71.40
- Sport/sprint spring 525lb x 6" (each) TMG4904..... £68.30
- Sport/sprint spring 525lb x 7" (each) TMG49043..... £80.60
- Race spring 550lb x 6" (each) TMG4905..... £68.30

MGC UPRATED FRONT TELESCOPIC DAMPERS

Whether you fit Spax or Gaz units, the ride and handling of your MGC will be considerably improved. Always fit damper units in pairs.

Note: To lower the ride height on MGC's, it is only necessary to adjust the torsion bar end stops, see part no. AKD7133 for details on page A83 (factory workshop manuals).

- Spax front shock absorbers (pair) TMG31101PR. .£195.00
- Gaz front shock absorbers (each)..... TMG31103..... £79.60

REAR TELESCOPIC DAMPER CONVERSION KITS

Converting your classic to telescopic dampers will improve the ride and handling, making your car more stable and predictable.

TMG30715

MGB, V8, MGC rear telescopic damper conversion kits (1998 spec)

Kits are supplied complete with brackets, dampers and full instructions.

- Rear Spax conversion kit TMG30715 £234.96
- Rear Koni conversion kit TMK30717 £300.00
- Rear Gaz conversion kit TMG30715G .. £200.00
- Replacement rear bracket kit MGS30718 £49.60

MGB, V8, MGC replacement rear telescopic dampers (1998 spec)

- 1 Spax replacement rear dampers (pair) TT30711PR.... £204.96
- 2 Koni replacement rear dampers (pair) TMG30712PR. £261.60
- 3 Gaz replacement rear dampers (each)..... TMG30713 £79.60

MGB, GT V8, MGC replacement rear telescopic dampers (pre-1998)

These shock absorbers are for our pre-1998 kits, when ordering replacement dampers, please check whether your kit uses early type half bushes on 5/8" locating shafts, or late 1 piece bushes on 1/2" tubes.

- 4 Early chrome bumper rear Spax dampers, pair . SPG737PR... £210.00
- Late chrome bumper rear Spax dampers, pair . SPG823PR... £231.96
- Early rubber bumper rear Spax dampers, pair . SPG738PR... £210.00
- Late rubber bumper rear Spax dampers, pair . SPG824PR... £218.04
- Early 5/8" half bush rubber 102987 £1.21
- Early 5/8" one piece bush kit polyurethane... 102987SPK.... £16.20
- Late 1/2" one piece bush..... SPXB18 £5.64

UPDATED REAR LEAF SPRINGS

MGB rear springs

Our springs are designed to lower the ride height by 1" for road use and by approx. 2"-2.5" or more for competition use - depending on vehicle weight. Springs are sold individually but must be fitted in pairs. Special springs set to your own requirements can also be supplied, contact Moss for details.

Rear springs for Roadster (6 leaf 93lb/in)

- Chrome bumper road lowered 1" TMG40720 £166.70
- Chrome bumper race lowered 2-2.5" approx... MGS40720.... £175.60
- Rubber bumper road lowered 1" TMG40730 £116.30
- Rubber bumper race lowered 2-2.5" approx.... MGS40720.... £175.60

Rear springs for GT (7 leaf 110lb/in)

- Chrome bumper road lowered 1" TMG40721 £120.60
- Chrome bumper race lowered 2-2.5" approx... MGS40721.... £136.60
- Rubber bumper road lowered 1" TMG40731 £110.80

Uprated road leaf spring

This uprated lowered competition spring gives a slight reduction in ride height and a firmer ride, making it ideal for uprated road use. The spring uses a 7 leaf configuration with a rate of 124lbs/in. and it works well as a part of a package with AHT21 front spring.

- Uprated road spring (each) AHT20Z NCA

MGB and GT parabolic leaf springs

These springs are the ideal compromise between ride comfort and performance. The parabolic shape of the spring allows small bumps and undulations to be gently absorbed by the thinner section of the spring. As the spring compresses the thicker section of the spring starts to take the load with greater resistance, ideal for fast road driving. It is recommended that they are fitted with any of our aftermarket telescopic performance shock absorber conversions and a set

of polyurethane bushes and axle plates. The combination of harder bushes and damping control will greatly improve the handling of your MGB and GT. They can be used with rear spring lowering blocks.

- Chrome bumper parabolic leaf spring 100lbs TMG40740 ... £177.70
- Rubber bumper parabolic leaf spring 116lbs. TMG40741 ... £177.70

TMG30720

REAR SPRING LOWERING KITS (STANDARD SPRINGS)

MGB, MGB GT V8, MGC lowering kits

When new or very good condition leaf springs are fitted, 1" inch lowering blocks may be used to good effect.

Roadster (1962-66) with banjo axle

- Lowering kit, includes U bolts, spacer and nuts.. TMG30720 £60.60
- Replacement U bolts (each) TMG3751 £11.90
- Replacement spacer block (each)..... TMG3750 £16.70
- Replacement bolts (each) GHF223..... £0.56

Roadster, GT (1967 on) with tube axle

- Lowering kit, includes U bolts, spacer and nuts.. TMG30721 £47.20
- Replacement U bolts (each) TMG3752 £6.60
- Replacement spacer block (each)..... TMG3750 £16.70
- Replacement bolts (each) GHF223..... £0.56

ANTI-TRAMP BARS & FITTINGS

The use of anti-tramp bars is highly recommended for cars which have more than standard power available. They are fitted between the rear spring front eye bushes and the centre spring mountings on the axle by special brackets, which are supplied as part of the conversion. When power is applied suddenly, usually from a standing start, the rear leaf springs tend to wind up into an S shape, and then revert to normal in a series of hops, referred to as tramping.

Anti-tramp bar kits

- MGB (1962-66) with banjo axle MGS30730 ..£281.90
- MGB (1967-76) with tube axle TMG30730 ..£224.70

MGB (1976 on) spacer kit

These spacer kits are used in conjunction with our anti-tramp bar kit (Part No: TMG30730) for all rubber bumper models and factory built chrome bumper GT V8s. Spacers are also required if a rubber bumper bodyshell is being used for a V8 conversion.

- All rubber bumper models (car set)..... TMG30734 ... £45.40
- Factory V8 chrome bumper (car set)..... MGS30734.... £61.60

MGB telescopic damper adaptors

When installing anti-tramp bars with a telescopic damper conversion, take care to select the correct adaptor kit to match the anti-tramp bar and adaptor kit.

- Adaptors - for tramp bars TMG307361 ... £7.50 (Kits include separate damper mounting positions, only one bolt is required).

Note: To ensure adequate travel with particularly low chrome bumper models, check the working length of the dampers with the vehicle on the ground. If the current type of anti-tramp bars are used, the long pivot bolt kit may be required to allow the correct travel.

SHORTENED FRONT BUMP STOPS

Lowering the ride height of the car can cause premature contact with the standard bump stops, resulting in poor handling. You can maximise the suspension travel by fitting these shortened bump stops, which fit directly to the crossmember, without alloy spacer.

- MGB, MGB GT V8 front bump stops (2 required) .. MGS30756.... £17.50

BILSTEIN TELESCOPIC CONVERSION KIT

Our renowned MGB Bilstein damper conversion kits for front and rear suspension offer improved damping by replacing the lever arm dampers with high quality telescopic dampers.

Front conversion kit

The front fitting kit uses specially designed bracket that replace the original lever arm damper and provide the upper wishbone and damper top mounting. Due to the location angles of the Bilstein dampers and the improved geometry of the front suspension, the handling is transformed whilst retaining ride comfort. The damper fits neatly between the subframe and the king pin. Installation of this kit does require permanent modification to the subframe. Only suitable for MGB models.

- Front Bilstein telescopic conversion kit..... TMK30701 ..£650.00

Rear conversion kit

The rear conversion kit also contains bespoke brackets to locate the top of damper to the chassis of the car and fittings to attach it to the lower link plate. This kit is suitable for use on MGB and MGC models.

- Rear Bilstein telescopic conversion kit..... TMK30702 ..£294.30

ADJUSTABLE ANTI-ROLL BAR KIT

This adjustable anti-roll bar kit from Tourist Trophy has two distinct settings to suit any MGB driver's needs. Adjust it one way and you'll experience a comfortable ride, adjust it the other and you've got a high-performance bar. The difference happens with the easy switch of two mounting bolts. The adjustable end link mounting points give the equivalent of a 3/4" bar for normal driving and a 7/8" bar for fast road. The kit includes polyurethane mounts and rose-jointed end links with specially fabricated spacers.

- Adjustable anti-roll bar kit 454-962.....£305.60

BHH1123

UPDATED SUSPENSION BUSHES

A much tighter feel to the handling of your MGB can be achieved by fitting updated suspension bushes. We offer SuperPro polyurethane or nylatron. Polyurethane offers the best solution for road use. It gives excellent suspension location without detrimental noise transfer. Whereas nylatron should only be used for outright competition/track cars, the bushes must also be fitted carefully to ensure the correct working clearance is obtained - also they must be inspected on a regular basis. The SuperPro sets are sold as an axle set.

MGB, MGB GT V8 front suspension bushes

- Lower inner wishbone bush - V8 type rubber (4 reqd.)... BHH1123..... £1.50
- Lower inner wishbone bush set - Superpro poly (1 reqd.)... BHH1123SPK £49.80

(Includes: 4 spring eye bushes, 8 shackle bushes and 4 spring pads).

FRONT ANTI-ROLL BAR MOUNTS

The degree of control the bar has over the vehicles behaviour can be adjusted by the use of different types of mounting for connecting the anti-roll bar to the chassis legs. We offer hard rubber, polyurethane bushes, depending upon the bar diameter and the use for which the vehicle is intended.

Hard rubber anti-roll bar mounts

- For 5/8" diameter anti-roll bar..... TMG3767 £2.74

"When rebuilding the suspension, replace all rubber bushes with poly bushes, they will last longer, reduce flex and improve the car's handling"

SPK60CK

SUPERPRO POLY SUSPENSION BUSH KITS

The first stage in improving your suspension is to check all your bushes - there's no point buying springs and dampers if the bushes are worn out. These suspension bushes improve the handling by reducing the amount of unwanted flex in the standard type of bush, leaving the suspension to move in the direction intended by the designers.

Polyurethane is the best solution for road use. It gives improved location without having a detrimental effect on noise levels or a harsh ride. Added advantages are improved longevity and unlike rubber it is not affected by ultra violet light, water, salt, oil or petrol. The Superpro bushes come with a steel sleeve and grease where necessary and are available either individually, as either front or rear sets or as a complete car set for your MG.

Save money and buy a Superpro bush kit for your car. Available as a complete car kit, front, rear or running gear kits. For vehicles with standard/original suspension layout.

FRONTLINE
Developments

Moss Europe is the official distributor for Frontline Costello's range of performance parts. Frontline Costello has developed a proven range of products for the MGB that improve the car's ride and handling without detracting from the car's character.

FRONT TELESCOPIC DAMPER CONVERSION

This complete bolt-on kit has been developed to increase the efficiency, grip and feel whilst maintaining good levels of ride comfort. Developed in association with Ken Costello this damper conversion is a complete bolt-on conversion for your MGB. This conversion kit allows the use of telescopic dampers giving improved damping control over the original lever arm dampers. The damper top mount brackets and the top arm are manufactured from high grade LM25 cast aluminium to reduce weight but give firm control of the suspension movement. The geometry of the suspension is slightly revised to increase efficiency and grip without adding harshness.

This kit is suitable for all variants of the MGB (chrome, rubber and V8's). For fast road cars we recommend the kit is used with 480lbs front springs (Part No: AHT21PR) with a 3/4" anti-roll bar (Part No: TMK30750).

Front telescopic damper kit FLD3070102 ..£1,121.40

REAR TELESCOPIC DAMPER CONVERSION

Converting your classic to telescopic dampers will improve the ride and handling, making your car more stable and predictable. This kit from Frontline development includes AVO telescopic dampers.

Rear telescopic damper kit FLD30717£415.50

4-POT VENTED BRAKE KIT

Using Frontline's own 4-pot alloy calipers and vented discs allows you to reign in your MGB more consistently and more safely than ever before. 4-pot calipers allow you to apply more pressure to a larger pad than is standard and having vented discs gives a greater surface area over which to dissipate the heat produced from applying pressure to the brake pad. Supplied with EBC Ultimax brake pads. Suitable for 14" wheels, except original V8 alloys.

4-pot vented brake kit FLD30752£1,053.30

CASTOR CORRECTION KIT

A simple way to enhance your MGB's steering feel and response. Castor angle is there primarily to self-centre the steering at speed. The car's steering needs less castor angle as modern tyres are far more directional. These innovative castor wedges fit between the chassis and the front crossmember to rotate it forwards by around 3 degrees so reducing the castor angle. The result gives noticeably lighter steering that doesn't load up when cornering, increases positive feedback through the steering and improves directional control.

Frontline castor correction kit FLD30722 £94.50

FLD30720

FIVE LINK REAR SUSPENSION KIT

The ultimate rear suspension set up for an MGB. This innovative and simple bolt-on kit has been designed and developed to give the MGB rear axle control that transforms the ride and handling of the car. This computer designed system replaces the standard leaf spring and lever arm damper set-up with a five link system using fully adjustable 'coil-over' springs and dampers.

Using a four 'trailing link' system gives the axle full location against tramping and the fifth link, a Panhard rod, ensure that the axle is kept central to the car and movement during cornering is controlled. Rigorous testing on both road and track has lead to selecting the best spring and damper settings for roadster and GT models. This is the best handling modification you can make to your MGB.

- Five link rear suspension kit, Roadster/banjo axle ..FLD30720 ..£2,196.00
- Five link rear suspension kit, GT/banjo axleFLD307201. .£2,196.00
- Five link rear suspension kit, Roadster/tube axle ...FLD307202. .£2,196.00
- Five link rear suspension kit, GT/tube axleFLD307203. .£2,196.00

FLD30721

PANHARD ROD KIT

The Panhard rod is designed to control the lateral movement of the axle relative to the body. This gives improved traction, no more tyre rub and an axle located in the centre of the car make a big difference to the driving experience. The car feels more positively located and easier to control, especially through the twisty bits. This unique kit features a bespoke bracket that mounts to the boot floor clearing the fuel tank to give a rigid body mounting position and necessary brackets to mount to the axle.

- Panhard rod kit, banjo axleFLD30721£391.30
- Panhard rod kit, tube axleFLD307211£391.30

BSMGBRBBBSK

BELL STAINLESS STEEL EXHAUST SYSTEMS

Bell stainless steel exhaust systems have stood the test of time and are the perfect upgrade for your classic cars mild steel exhaust system. Made from high quality stainless steel right here in the UK, these exhaust systems feature an improved exhaust note and increased longevity. These exhausts will last for years to come.

MGB Exhaust Systems

MGS510800

MGS510810

MGB V8 SPORTS MANIFOLD & SYSTEM

This performance manifold and system are designed to release the maximum power from your V8. The design copies the RV8 style manifold, running the primary pipes through the inner wings, giving maximum exhaust gas flow from the engine. The manifold kit consists of a pair of manifolds, link pipes and Y piece. The manifold is matched to a bespoke single pipe, twin box system. To fit the manifold it is necessary to cut the inner wings. Stiffeners will also be required. Manifolds and components available separately, see website for details.

- MGB V8 RV8 style manifold kit (includes clips).. MGS510800. .£781.60

HEAT SHIELD

Lower the temperature of your floorboard by about 30°F with this new Moss exclusive! The woven material and the adhesive binder are very special. This is as close as you will get to an aero space product that is affordable. The aluminised heat barrier is made up of woven silica with a flexible aluminised finish. The highly-reflective surface of the material is capable of withstanding radiant temperatures in excess of 1,300°C (approx 2000°F).

- MGB heat shield (1962-75)..... 409-120.....£108.60

TOURIST TROPHY SPORTS EXHAUSTS

Treat your MGB to one of the finest sports exhausts available... This beautiful Tourist Trophy polished stainless steel sports exhaust system is available for both chrome and rubber bumper models and is manufactured using the highest quality materials and workmanship. The system is designed for an easy fit using flange joints rather than the traditional sleeved pipes. It also uses more reliable modern rubber hangers and is supplied with special hanger conversion brackets for both chrome and rubber bumper models,

for rubber bumper models we do recommend fitting either a turn down tip or shielding under the bumper to protect the bumper from exhaust heat. The system features a single silencer with a sporty slash cut tail pipe - using a single silencer gives better ground clearance for lowered cars. The box is packed with a combination of stainless steel wire wool and fibreglass, to give a throaty exhaust note under acceleration that isn't intrusive when cruising. We also offer individual replacement parts For Tourist Trophy exhaust systems; please see our website for details.

"Treat your MGB to one of the finest sports exhausts available..."

Features:

- 1.2 mm thick 201 grade stainless steel
- Single sports rear silencer
- CNC cut flange joints
- 409 Stainless Steel used for inner core and perforated tubing
- Manifold primary pipes are beautifully blended into merged collector
- Entire system is polished to a mirror shine
- Sporty slash cut tail pipe
- Includes gaskets and installation hardware
- 5 year limited warranty*

The exhaust systems

These Tourist Trophy systems are available either as a complete system with tubular manifold or complete system with down pipe suitable for the standard cast manifold. Supplied with fittings.

- Sports exhaust system with downpipe 459-075.....**£421.40**
- Sports exhaust system with manifold 459-085.....**£473.00**
- Exhaust fitting kit for 459-075 replacement 459-076..... **£46.10**
- Exhaust fitting kit for 459-085 replacement 459-086..... **£14.70**

TOURIST TROPHY TOURING EXHAUST

This superb Tourist Trophy polished stainless steel touring exhaust system is designed as a high-end stock replacement, this system maintains both the resonator and silencer for a quiet ride.

Manufactured from highly polished stainless steel and the silencer is packed with a combination of stainless steel wire wool and fibreglass, this give a throaty exhaust note under acceleration that isn't intrusive when cruising. 5 year limited warranty*.

Features:

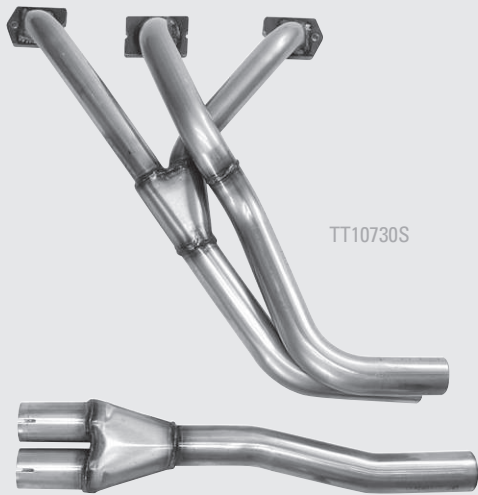

- 1.2mm thick 201 grade stainless steel
- Entire system is polished to a mirror shine
- Tail pipe angled away from overrider
- 5 year limited warranty*

- Touring exhaust system 454-569.....**£357.20**

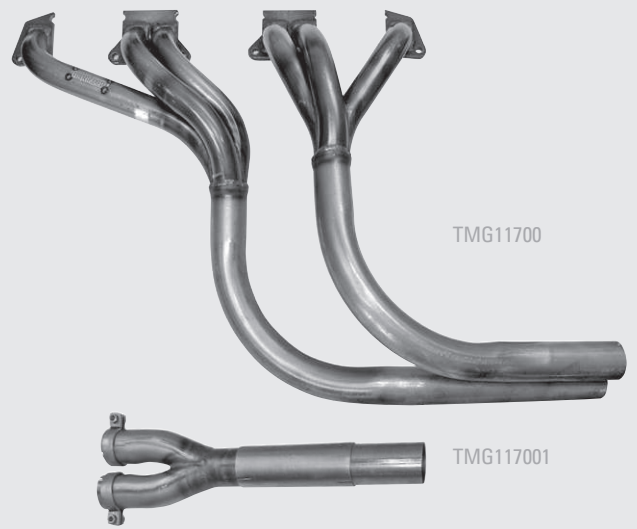

***Warranty information**

This system is warranted to the original purchaser of record and for the original vehicle on which the product was installed, against defects in materials and workmanship for 5 years. Moss' sole obligation under this warranty shall be limited to repair or replacement at Moss' option, provided that the silencer discloses a manufacturing defect. Warranty is void if any defects are caused by a physical impact of any kind.

MOSS SPORTS EXTRACTOR MANIFOLD

This exclusive Moss sports large bore extractor manifold uses 1 3/4" primary pipes with 1 7/8" exit pipe, making it ideal for highly modified fast road and competition engines. This manifold is designed to be used with our Moss Sports performance exhaust systems to maximise power potential.

- Moss sports manifold mild steel inc. Y piece..... TT10730£250.70
- Moss sports manifold stainless steel inc. Y piece .. TT10730S ...£501.60

- Replacement Y piece mild steel TT107301 £80.90
 - Large bore manifold gasket..... TMG10736 £5.50
 - Clamp 1 7/8" - Y piece to manifold TT9933S £3.00
 - Manifold hardware kit - studs and nuts GEK1012 £9.90
- (See page 54 in the Restoration section for other fittings).

MGC LARGE BORE EXTRACTOR MANIFOLD

Our MGC tubular extractor manifold uses a 6 into 2 configuration for maximum gas flow and all round power for road or track use. A separate Y piece is available for connection to single pipe systems, some modification may be required to connect to exhaust systems.

- MGC mild steel extractor manifolds (pair)..... TMG11700£910.60
- MGC mild steel Y piece..... TMG117001 ...£162.00
- Manifold gasket..... GEG623 £5.90
- Manifold hardware kit - studs and nuts GEK1014 £61.60

STR630
Best fit for LHD cars

BHH1000CSS

MOSS 'WORKS ST' EXTRACTOR MANIFOLD

This mild steel manifold is the same design as the original Leyland ST manifold, using 1 5/8" primary pipes and 1 7/8" exit pipe to give improved gas flow and works well for road or competition tuned cars.

This manifold is the best fit on LHD cars, giving greatest clearance for the steering column. This manifold can be used with any of our Moss Sports or Bell exhaust systems but may require a link pipes to fit to a chosen system, see systems information for link pipe details.

- Works ST manifold mild steel includes Y piece STR630.....£342.90
 - Works ST mild steel replacement Y piece..... STR6301.....£127.00
 - Large bore manifold gasket..... TMG10736 £5.50
 - Clamp 1 3/4" - Y piece to manifold TT9932S £4.30
 - Manifold hardware kit - studs and nuts GEK1012 £9.90
- (See page 54 in the Restoration section for other fittings).

MOSS SPORTS LARGE BORE EXTRACTOR MANIFOLDS FOR MGB GT V8

Our tubular extractor manifold for the MGB V8 has been designed to get the maximum gas flow from the limited space in the engine bay. This 5 piece manifold is specifically designed for all Roadster and GT V8s and works well with engines up to 200bhp.

This manifold is designed for use with the Moss ST exhaust system MGS51020 but can be used with Bell systems for the MGB GT V8 both chrome and rubber by using the link pipe BHH1000CX between the manifold Y piece and the exhaust system. Manifold set includes RH and LH manifolds, down pipes and Y piece.

- Manifold to head mounting kit (1 required).... GEK1013 £28.30
- Link pipe manifold to Bell systems BHH1000CX ... £28.30

MOSS PERFORMANCE MANIFOLDS & SYSTEMS

Improving the gas flow through the engine is the key to gaining more power, a simple first step 'Stage 1' is to upgrade the induction (see page A36 & A37 for details on air filters) and exhaust systems. Fitting an extractor manifold (see page A17) with a performance exhaust allows the engine to breathe more easily. To gain the most benefit from our extractor manifolds and performance exhaust systems they should be used together.

Extractor manifolds work by allowing the gasses to flow through a smoother

path. Using larger bore pipes also reduces back pressure in the manifold and cylinder head. Additional power can be gained by wrapping the manifold, this reduces the temperature in the engine bay, allowing cooler air into the carbs, and keeping the exhaust gasses hot which means they have less density and flow more freely, see our website or Restoration Tools catalogue for details.

Our manifolds and systems are manufactured to the highest standards and are available in high quality mild steel or type 304 stainless steel. All pipes are mandrel bent to maintain tube shape and assembly is done on jigs to ensure accuracy and quality fit.

MOSS SPORTS PERFORMANCE EXHAUST SYSTEMS

MGS507011

"...manufactured to the highest standards."

MGS50701

These Moss sports performance exhaust systems are specifically designed for each model and are manufactured in 304 grade stainless steel with a mirror polished tail pipe. To get the best out of them they should be used with one of our tubular extractor manifolds although can be fitted to standard systems.

MGB Moss sports exhaust system

Using large bore pipes improves gas flow in a manifold, although contrary to this the exhaust system should not be too large as this can cause a power reduction. Additional power can be gained by removing the front box, but this also creates additional noise, which is not always desirable. Moss Sport performance exhaust systems have been designed using large bore 1 7/8" pipe work (standard pipe work is 1 3/4"), which has been found to be the optimum diameter to give maximum power benefits for 'road' tuned 1800cc

to fully modified 1995cc engines. The design uses a single large capacity rear silencer that gives a sporty exhaust note and improved ground clearance for lowered cars. This system is a direct fit and works well with either STR630 or TT10730 (see page A17).

Note: Link pipes may require cutting.

MGB chrome bumper stainless steel sports exhaust... MGS507011... **£251.40**

222-405

PERTRONIX IGNITION

Ignitor I

These completely self contained electronic ignition units offer a simple alternative to traditional points and condenser arrangement. Designed to fit entirely within the distributor cap they are easy to install with no external control boxes to mount and only two wires to connect, no permanent modifications are involved. The unit uses a sealed Hall Effect sensor that is impervious to dirt, dust, moisture, or vibration and retains standard advance curve. Unaffected by distributor shaft wear, maintains firing accuracy to within 1/4°, reduces spark scatter over the full rpm range. One year warranty.

222-555

- Pertronix ignition Lucas 23/24/25D4 +VE earth . 222-555.....£174.30
- Pertronix ignition Lucas 23/24/25D4 -VE earth.. 222-405.....£186.00

143-321

Ignitor II

The Ignitor II has many of the same great features that the Ignitor has, but even more. The Ignitor II units sense the coil current level and use a powerful micro controller to adjust the dwell. Variable dwell helps to maintain peak energy throughout the entire RPM range. Ignitor II systems develop significantly more energy between 3000 and 5000 RPM than standard ignition systems. Built in reverse polarity and over current protection shuts down the system, preventing component damage.

- Pertronix ignition Lucas 23/24/25D4 -VE earth.. 143-321.....£236.00
- Pertronix ignition Lucas 45D4 -VE earth 143-323.....£241.60

TT2982M

'BUMBLEBEE' COMPETITION HT LEAD

If you want a performance HT lead with the correct period look then this 'bumblebee' lead is a must. As per the original 'Lucas' type it features a high conductivity copper core with a yellow insulator featuring a black stripe. Alternatively, use the standard black lead for an 'OE' look. We recommend you assemble leads with NGK suppressed plug caps (see below).

- Bumblebee HT lead (per metre) TT2982M..... £7.40
- HT lead, black (per metre) AAA5981M.... £3.70

CRST255

IGNITION LEAD NUMBERING SET

Keep track of which ignition lead is which with a set of useful numbered sleeves.

- 4 cylinder ignition lead numbering set..... CRST255 £4.70
- 6 cylinder ignition lead numbering set..... 171-640..... £13.10

TMG10772

HIGH PERFORMANCE IGNITION LEADS

Get the spark from your coil with silicone HT leads that are designed to perform. These Cobalt leads use a high performance conductor to transmit greater energy to the spark plug creating a stronger spark for improved combustion. They also feature multi-layer reinforcing and insulation with protective silicone outer sleeve and terminal boots for improved reliability. B Series engines with a Lucas 25D distributors require a top entry distributor cap GDC103.

- MGB Cobalt silicone lead set..... TMG10772 ... £25.20
- MGC Cobalt silicone lead set..... 171-665..... £57.30
- Top entry push in distributor cap - Lucas 25D4 .. GDC103..... £6.50

Our GT V8 performance HT lead set feature silicone insulator and high conductive core to deliver a strong spark. (Not Cobalt).

- MGB GT V8 silicone lead set..... TT1872..... £39.90

GHT106

Standard ignition lead sets

- MGB (1962-68) standard lead set GHT102..... £15.10
- MGB (1968-75) standard lead set GHT106..... £20.00
- MGB (1975 on) standard lead set GHT184..... £18.50
- MGB GT V8 standard lead set..... GHT107..... £37.30

PERFORMANCE LUCAS DISTRIBUTORS

Specially modified distributor units with a modified advance curve to suit a tuned engine, particularly with a performance camshaft fitted. Change your plugs to a higher heat range.

MGB distributors (standard engines)

These are Lucas 45D 10° static advance distributors with improved advance curves for standard cars. Units for cars with HS4 carburettors have the later type of advance curve for improved economy, while the HIF item uses a redesigned curve which will reduce run on tendencies. Supplied with points and condenser, cap and rotor arm.

MGB (to 1973) HS4 carburettors (new) 12H5038..... **£89.70**
 MGB (1974 on) HIF carburettors (new)..... 13H9694..... **£106.50**

MGB distributors (modified engines)

These Lucas 45D distributors are for modified engines running with an uprated cam profile or with further improvements for better top end power. Supplied with points and condenser, cap and rotor arm.

Lucas 45D distributor SU carbs with vacuum adv... TMG10771 .. **£204.50**
 (8° static advance curve).
 Lucas 45D distributor - Webers no vacuum adv... TMG10773 .. **£127.30**
 Contact points for competition (both distributors). GCS118 **£4.30**

(See page 79 in the Restoration section for distributor components).

SMOOTHCUT REV LIMITERS

These rev limiters could save you from an expensive bill. Designed to allow full use of power up to maximum revs, where they will not exceed the preset limit. They work by progressively miss-timing the spark preventing an increase in engine speed from over revving due to missed gears or over exuberance.

SmoothCut rev limiter 4 cylinder preset 6000rpm ... TT2987..... **£111.60**
 SmoothCut rev limiter adjustable limit RL5 **£151.50**

ADVANCE SPRING SET

This set of 5 specially selected distributor advance springs will allow you to adjust your own unit to suit your engines requirements. For Lucas distributors only. We suggest you start with the heaviest two springs.

Advance spring set, Lucas distributors..... TT1903..... **£22.40**

CSI-IGNITION DISTRIBUTORS

CSI-Ignition distributors offer a fully electronic ignition system built into the correct type of Lucas distributor housing to suit your car, keeping the original appearance in the engine bay. You can only tell the difference when you remove the distributor cap! Gone are the points and condenser and mechanical advance mechanism, all replaced with a high quality electronic ignition system manufactured using military specification components for durability and reliability. These distributors are maintenance free (no points to adjust), and offer the benefits of, easier starting & smoother running, more torque & power, reduced fuel consumption & emissions. They also eliminate the weaknesses of mechanical timing advance and problems such as points bounce ensuring correct ignition timing throughout the rev range.

“The new range of CSI-Ignition distributors is a breakthrough for classic car ignition systems”.

Each CSI-Ignition distributor features 16 easily switchable, optimised ignition curves to allow timing adjustment to suit your car's engine and fuel specifications. Alternative advance curves can be selected to suit your engine's state of tune making them ideal for modified engines. Curves are easily selected using a screwdriver in a rotary switch, with a bright flashing LED indicator to show the selected curve all concealed underneath the distributor cap. We offer a wide range of CSI-Ignition distributors for a variety of applications. They are available Optimised with vacuum advance to suit road or uprated cars running on SU carburettors, or Tuned without vacuum advance for cars running Weber type carburettors. Please note: Some units may only be available To Order. More details are available on our website, search for CSI-Ignition Distributor.

Distributors for MGB

Optimised 25D4 positive earth CSD6014571. **£284.20**

 Tuned with immobiliser 43D4 negative earth CSD6423681. **£432.00**

Distributors for MGC

Optimised 25D6 negative earth CSD6914581. **£292.00**
 Tuned 23D6 negative earth CSD6923581. **£284.20**
 Optimised with immobiliser 25D6 negative earth .. CSD6914681. **£465.80**
 Tuned with immobiliser 23D6 negative earth CSD6923681. **£432.00**

You must use the conventional (non transformer) type coil with a minimum resistance of 2.5 Ohms, such as our sports coil TT2981 (3.0 Ohms), Bypass the ballast resistor if fitted. The use of a transistor type coil will damage the CSI distributor and invalidate any warranty.

Sport coil (3 ohms) TT2981..... **£26.40**

LUMENTION IGNITION

Lumention electronic ignition kits are well known as being among the finest aftermarket electronic ignition systems available. This system basically replaces both the contact points and condenser with an optical switch and power module. The power module is an electronic device that receives a pulse from the optical trigger which switches the coil. The trigger eliminates contact bounce, arcing, mechanical wear and spark scatter, reducing maintenance and increasing reliability. With minimal wiring and modifications this kit is very discreet.

A performance ignition kit is available, with a power module and a high output coil. The microcircuit control of the coil current gives optimum performance across high engine speed ensuring maximum spark energy at the coil. A fitting kit, to suit the distributor application, is also required. Positive earth wiring instructions are available from your nearest Moss branch. Please check your distributor type before ordering the fitting kit as many cars have non-original distributors fitted. The identification number is cast on the distributor body.

Note: Installation of a power module requires a distributor fitting kit.

Performance ignition kit

Supplied with high energy coil and performance power module.

- Performance ignition kit CEK150 **£307.00**
- Coil replacement for CEK150 CEC..... **£65.10**

Power module and performance ignition coil

- Power module PMA50 **£219.40**
- Performance ignition coil MegaSpark 4..... LMS4..... **£38.00**

Mounting bracket

Designed to mount the power module neatly using coil bracket screws. Suitable for all power modules.

- Power module mounting bracket MK006 **£12.90**

Fitting kits

Use these fitting kits with your choice of ignition kit.

- Lucas 22D4 25D4 distributor LFK116..... **£22.10**
- Lucas 45D4 distributor LFK117..... **£22.10**

SPORTS COILS

Sports coils are designed to improve ignition performance. They give more reliable starting power and greater performance at high rev's thanks to the 40,000 volt output. Don't forget to renew your plugs and leads to optimise the power. Only use the ballast type coil if your car is fitted with a ballast resistor in the wiring. Please check before ordering. Your HT lead into the coil will need to be the push-in type, use GLC1110 to convert the lead.

- Sports coil non-ballast type TT2981 **£26.40**
- Sports coil ballast type TT29812..... **£26.40**
- Ignition lead end kit GCL1110 **£2.60**

BATTERY CUT-OFF SWITCHES

Battery cut-off switches are a good idea for all cars. Fitting one enables you to quickly isolate the battery and immobilise the car; ideal when working on your car, or if you intend to put your car into storage. Use with a battery conditioner, see our website or our Restoration Tools catalogue.

Battery mounted cut-off switches

These cut-off switches simply mount to the battery post and feature a screw-in knob to break the circuit. Available with a bypass fuse to allow sufficient current to pass to operate clocks, alarms and coded radios, but if any attempt is made to start the car the fuse will blow.

- Battery mounted cut-off switch GAC3192X **£8.30**
- Battery mounted cut-off switch with bypass fuse .. GAC31921.... **£13.20**

In-line cut-off switches

These cut off switches need to be fitted into the main battery to starter cable. The body of the switch should be mounted securely to the car and cables fitted using the terminal kit.

Period cut-off switch

These are reproductions of the Lucas 'Battery Master Switch' which was a popular accessory on many British classics.

- Period battery cut-off switch (short knob) 1B2804 **£38.20**
- Period battery cut-off switch (long knob) 1B2804L..... **£38.20**

Motorsport cut-off switches

Battery cut-off switches are obligatory for competition cars and should be fitted with a cable for remote access.

- Battery cut-off switch TT7964..... **£8.50**
- Battery cut-off switch race spec (FIA approved)... TT7962..... **£32.00**
- Remote cable 6 foot TT79621 **£13.50**
- Spare key for switches TT7964 and TT7962 TT79641 **£2.32**
- Terminal kit for battery cable..... TT7964TK ... **£11.20**

STAINLESS COIL COVER

Brighten up your engine bay with our coil clamp and covers for standard coils only.

- Stainless steel coil clamp only..... GAC8470X ... **£11.50**
- Stainless steel coil clamp and coil cover set GAC8470CC.. **£15.80**

LUCAS

LUCAS ALTERNATOR

Being brand new these uprated alternators (with lefthand fixing), are available without having to pay a surcharge against the old unit. With a higher output than the original alternators these will be more than able to cope with your cars requirements. They are made under licence from Lucas and come in green Lucas boxes.

MGB (1969-74 and 1978 on) 18 ACR (45 AMP) .. GEU2206..... **£66.50**
(Also usable for 1975-78 models with slight fitting modifications).

ALTERNATOR CONVERSION KIT

Our conversion kit contains everything you need to upgrade from a dynamo to a high output alternator. The alternator bearings are much more durable and will improve long term performance of the vehicle. The kit includes a new high output alternator, pulley, belt, brackets, hardware & fittings, and complete installation instructions including converting the car from positive to negative ground.

MGB (1965-67) alternator conversion kit..... 130-078.....**£151.00**

GBY3031D11

GBY3031W11

DRY & WET BATTERIES

Moss stock a range of batteries for MGB and MGC models. Due to delivery restrictions of hazardous goods, wet batteries can only be purchased and collected in store. Dry batteries can be delivered worldwide; customers must arrange their own acid pack for filling of dry batteries and initial charge.

Dry batteries

Battery 6 volt standard 9 plate dry 56 A/hr..... GBY3031D ...**£110.30**
 Battery 6 volt heavy duty 11 plate dry 63 A/hr... GBY3031W11 **£118.10**
 Battery 12 volt standard dry..... GBY5656D ...**£151.20**
 Battery 12 volt dry 60 A/hr..... GBY014D **NCA**
 (For use with GAC4097X plastic battery boxes)

Wet batteries

Battery 6 volt standard 9 plate wet 56 A/hr..... GBY3031W...**£110.30**
 Battery 6 volt standard 11 plate wet 63 A/hr GBY3031W11 **£118.10**
 Battery 12 volt standard wet..... GBY5656W...**£151.20**
 Battery 12 volt wet 60 A/hr GBY014W....**£115.50**
 (For use with GAC4097X plastic battery boxes)

MGB MODERN TYPE STARTER MOTOR

This replacement for standard starter motor 4 Synchro models uses high efficiency modern style components offering a lightweight and reliable modern alternative to original equipment new or reconditioning existing units.

Modern type starter motor GXE4441B... **£90.10**

13H3300X

GXE4441X

HIGH TORQUE STARTER MOTORS

These brand new powerful, lightweight starter motors are high torque. This means they are less likely to burn out under the strain of cranking your engine over, especially with high compression engines.

MGB 3 synchro models GXE4418X ..**£225.60**
 MGB 4 synchro models GXE4441X ..**£225.60**
 MGC 13H3300X...**£225.60**
 MGB GT V8 BHA5223X ..**£309.00**

WOSP

DYNATOR CHARGING SYSTEM

For owners wishing to fit an alternator but prefer to keep the original appearance for aesthetic reasons, or for competition scrutineering rules, the Dynator is the answer. Basically, it's an alternator in a dynamo casing, and comes complete ready to fit, available for positive and negative earth. Instructions provided.

Negative earth PT10802.....**£455.60**
 Positive earth PT10802P ...**£546.80**

GAC4097X

BATTERY BOXES

Battery box 6 volt (2 required)GAC4096X... **£43.70**
 Battery box 12 volt (1 required)GAC4097X... **£59.80**

ALLOY SUMP & BAFFLE TRAY

This sump will help cool the oil as the aluminium alloy gives better heat transfer than steel and the additional fins on the bottom provide increased surface area for more heat transfer. The sump also features a cast in baffle to keep the oil around the pick up, preventing oil starvation and surge under hard cornering. The sump has a thick flange to add stiffness to the bottom of the engine.

An optional baffle tray can be added to prevent the oil mist that can occur in the crank case of an engine, particularly at high RPM, this plate ensures the oil returns to the sump. Suitable for 5 main bearing engines only. Longer screws are included.

- Alloy sump MGB 5 main bearing engines 460-372.....**£337.60**
- Baffle tray for alloy sump only 460-373..... **£62.50**
- Sump gasket AJM504 **£2.70**

SPIN-ON OIL FILTER CONVERSIONS

Fitting a spin-on filter makes changing the oil an easier and cleaner task. These filters also feature an anti-drain valve which prevents oil draining out of the filter while the engine is not running, giving better oil pressure at start up. Oil filters supplied separately.

- MGB spin-on oil filter conversion..... MOC289 **£36.90**
(18G, 18GA, 18GB, 18GD, 18GD engines with Purolator or Tecalmit filters).
- MGC spin-on oil filter conversion MOC290 **£53.30**
- Oil filter, K&N gold performance..... 235-830..... **£13.00**
- Oil filter, standard..... GFE173..... **£4.56**

MGB GT V8 REMOTE SPIN-ON OIL FILTER

- Oil pump housing..... BHH998.....**£225.90**
(Standard MGB GT V8 housing with unions to enable filter head to be installed into the oil system).
- Remote filter head and oil filter (with unions) BHA5286..... **£49.80**
(Replica of MGB GT V8 part, with spin-on filter).
- Mounting bracket HZA4614..... **£32.28**
(Allows remote spin-on oil filter to be mounted on RH inner wing as per original MGB GT V8).
- Oil filter spin-on type standard GFE121..... **£3.90**

K&N GOLD PERFORMANCE OIL FILTERS

Developed by K&N for race applications these high quality filters are becoming a favourite among consumers who want only the best products for their cars. These K&N filters feature a number of improvements over standard oil filters:

- Thicker canister wall
- Higher flow rates
- Improved filtration
- Nut for ease of removal
- Anti-Drain valve

MGB (1962-69) K&N gold performance oil filter ... 235-830 **£13.00**
(For 18G-GD models with a Moss spin-on conversion).

OIL CATCH TANKS

If you modify the breather or induction systems of your car for either road or track use collection of oil should be considered. An oil catch tank is a must for competition use to prevent oil spillage on the track.

Manufactured from high grade aluminium and anodised for a smart, durable finish they feature 2 x 1/2" OD connectors for the breather hoses, level indicator, breather cap and drain plug. Available in 1 litre or 2 litre sizes. Mount using the rear flange to a suitable vertical panel in the engine bay.

- Oil catch tank 1lt. TT2900.....**£172.40**
- Oil catch tank 2lt. TT2901.....**£187.10**
- Breather hose - 1/2" ID (per metre) BAU5065M... **£10.20**
- Hose clip (each)..... GHC11016 **£2.50**

OIL THERMOSTATS & GAUGE ADAPTORS

Use one of these thermostat adaptors if you already have an oil cooler kit fitted. The standard thermostat has push fit connections for use with rubber hoses. It completely seals off the oil radiator until the oil temperature reaches 74°C. The full flow thermostat has 1/2" screw in connections for use with stainless hoses. It works by diverting the oil through the thermostat until it reaches 74°C.

The temperature gauge adaptors fit into an oil line and allow the fitment of an oil temperature gauge. For this you can also choose between push on connections for rubber hoses or screw in connections for braided stainless steel hoses.

- Standard oil push on thermostat TT2960 **£54.10**
- Full-flow oil screw on thermostat..... TT29602 **£156.10**
- Straight unions 1/2" (pair)..... TT9961 **£9.80**
- Temperature adaptor push on..... TT2969 **£53.00**
- Temperature adaptor screw on TT29691 **£85.30**

AHH8537SS

REPLACEMENT OIL COOLER HOSES

Use these hoses either to replace your existing ones if you already have an oil cooler fitted, or to install your own system. *Note: Two hoses required.

MGB chrome bumper

- 3 Synchro braided hose* oil cooler to filter/block . AHH8192SS .. £26.60
- 4 Synchro braided hose oil cooler to filter AHH8536SS .. £26.60
- 4 Synchro braided hose oil cooler to block AHH8537SS .. £26.60

MGB rubber bumper

- Braided hose* oil cooler to filter/block (1976 on) . BHH1610SS .. £26.60

MGC

- Inner hose long braided AHC323SS ... £46.90
- Outer hose short braided AHC324SS ... £46.90
- Auto gearbox hose* braided AHC335SS ... £37.70

- Oil cooler to pump braided hose BHH1103SS .. £30.60

MGB GT V8 rubber bumper

- Oil pump to filter braided hose BHH1104SS .. £22.00
- Oil cooler to filter braided hose BHH1612SS .. £48.40
- Oil cooler to pump braided hose BHH1613SS .. £35.00

Oil cooler strap

- Oil cooler hose strap AHH6866K £4.50

TMG10778S

THERMOSTATIC OIL COOLER INSTALLATION KITS

All models (except MGC, MGB GT V8)

Oil thins as the temperature increases, thinner oil reduces oil pressure and is less effective at preventing metal to metal contact. Longer journeys or driving at sustained high speeds, tends to exacerbate the problem. Fitting an oil cooler minimises this effect and helps prevent engine damage.

Our kits come with mounting brackets and unions in a variety of styles. Thermostatic kits include a thermostat so the oil does not go through the cooler until it reaches operating temperature, giving quicker warm up. The radiator is supplied separately so you can choose the most appropriate size.

- MGB (to 1974) thermostatic braided hoses TMG10778S .£192.70
- MGB (1974 on) thermostatic braided hoses TT10778S ...£243.80

ARO9888

ARO9875

ARO9807

OIL COOLER RADIATORS

The oil should be allowed to operate at its optimum temperature, not too hot and not too cold. Choose the one that best suits your purposes.

- 10 row oil cooler radiator for road use ARO9807 £75.00
- 13 row oil cooler radiator for fast road ARA221 £61.20
- 13 row oil cooler radiator for fast road/sport ARO9809 £93.00
- 16 row oil cooler radiator for fast road/sprint ARO9875 £100.40
- 19 row oil cooler radiator for race ARO9888 £120.20

UPRATED OIL PUMPS

Our MGB unit offers improved oil pressure over 5000rpm. For competition use check that the tolerances are kept to the lower end of the scale.

- MGB (5 bearing engine) TMG10787 ... £71.50

602018A

MGB GT V8 OIL PUMPS

The SD1 oil pump is adequate for road based cars by using the uprated oil pressure relief valve spring TT1829 which gives a running pressure of 40psi if an oil cooler is also installed. If your MGB is being converted to V8 specification, the correct style of pump housing will be needed to allow a remote filter adaptor to be used as there is no space at the front of the MGB engine.

Pre SD1 V8 engines

- Oil pump shaft and gear 602018A £54.00
- Idler gear 602017A £22.20

SD1 V8 engines

- Upated oil pressure valve spring TT1829 £5.50

TMG10729

MGB GT V8 OIL PUMPS

Upgrading the oil pressure control system helps maintain good oil pressure which is particularly useful for prolonged high speed and fast road driving. Fitting our uprated oil pressure relief spring will maintain operating pressure of approx. 75-85psi on a good engine.

- Upated oil pressure relief spring TMG10729 £4.30
- Oil pressure relief valve 12H865 £5.50

ALLOY RADIATORS

NRP1154AL

Our range of high quality alloy radiators is a must for competition and fast road use. Designed to fit original mounting positions they are a direct replacement for the original radiator, and manufactured to exact standards from the highest quality materials.

Using an alloy radiator gives approximately a 40% improvement in cooling efficiency making them ideal for competition, track day and fast road use where the engine is working hard for extended periods. The radiators are fitted with an M22 x 1.5 threaded boss to allow easy installation of electric fan controllers and switches, a blanking plug is supplied with the radiator.

- MGB (1962-67) alloy radiator ARH260ALI ...**£538.10**
- MGB (1968-76) alloy radiator NRP1142AL ...**£513.40**
- MGB (1976 on) alloy radiator NRP1154AL ...**£533.10**

FAN SHROUD

This shroud is suitable for 1962-76 models, it will significantly improve your fan efficiency and air flow by 'forcing and directing' air through the radiator (rather than around it) - especially useful if you have modified your engine and increased power output. This well made shroud attaches to your existing radiator mountings and is suitable for mechanical fans only.

- MGB (1962-76) fan shroud 459-685 **£70.00**

SAMTCS419C

SAMCO CLASSIC SILICONE HOSES

Samco Classic offers a range of silicone hoses that maintain an original look but give excellent performance. With a matt black finish and featuring a discreet embossed Samco logo.

- MGB (1962-76) Samco Classic silicone hose set... SAMTCS419C .**£106.30**
(Features a one piece bottom hose).
- MGB (1976 on) Samco Classic silicone hose set... SAMTCS420C .**£141.30**
- MGB V8 Samco Classic silicone hose set.....SAMTCS418C .**£154.90**

459-663

MISHIMOTO ALLOY RADIATOR

Our MGB alloy radiator is precision engineered for superb fitment and 25% more cooling potential. Install this upgrade and experience a more efficiently running engine as well as increased reliability. This radiator is manufactured by Mishimoto to specifications provided by our team here at Moss. It is constructed from high-quality aluminium, featuring brazed aluminium cores for the best possible performing heat exchanger.

- Mishimoto alloy radiator (1968-76) 459-663 **£402.00**

NRP1153SE

UPRATED HI-FLOW RADIATORS

Manufactured with an improved core to aid water flow and heat dissipation these radiators are a good step in helping control your cars operating temperature. Supplied on an exchange basis.

- Hi-flow radiator (1967-76).....NRP1142SE...**£287.70**
- Hi-flow radiator (1976 on)NRP1153SE...**£318.30**

GRH305SK

MGB SILICONE HOSE SETS

Our high quality silicone hoses are a must for the performance enthusiast. Silicone is a hard wearing material that will not deteriorate and is unaffected by oil or fuel spills. This set includes radiator and heater hoses.

The early kit is based on the later type (1971-76) cooling hose system but is suitable for all models from 1962-76. For early pre 1970 cars simply fit this bottom hose without using the cast elbow in the bottom hose.

- MGB silicone hose set (1962-76)..... GRH305SK **£82.60**
- MGB silicone hose set (1976-On).....GRH592SK **£82.60**

KLINGERSIL GASKET

These gaskets are manufactured from a modern high performance synthetic material that can withstand much higher temperatures (up to 400°F) and extreme pressures (up to 750psi) making them ideal for fast road and competition engines.

Gasket thermostat housing updated GTG101X **£1.66**

THERMOSTAT BLANKING KIT

The thermostat can be removed to aid cooling but it is essential that a blanking sleeve is fitted in its place or the change in water flow may cause local overheating in the cylinder block.

Thermostat blanking kit AJJ4012..... **£6.80**

RFK60

REVOTEC FAN KITS

Keeping your MG's engine running at optimum temperature will ensure you get the best performance and economy. Revotec and Moss Europe have co-designed these high quality bespoke fan kits for the MGB. Using the latest high efficiency fans with adjustable electronic controllers these kits are designed to replace the standard original mechanical fan, reducing the load on the engine, noise and improving both power and mpg.

Unlike other fan kits that use universal mounting systems, these kits fit using bespoke laser cut brackets that mount directly to the radiator cowling using existing mounting bolts. A manual override switch is also available separately, enabling manual control of either On, Off or Automatic. Kits include: High efficiency fan assembly, electronic controller, bespoke brackets, hardware and wiring, with full instructions.

There are two types of Revotec fan kits available for MGB models. Earlier cars featured a long water pump. Due to clearance between the water pump pulley and radiator these cars must use a 'blowing' fan mounted in front of the radiator. Later cars have a short water pump and use the 'suction' fan mounted behind the radiator. **Negative earth only.**

- Revotec cooling fan kit, blower fan...RFK60...**£227.50** (MGB 1962-76, Negative earth only).
- Revotec cooling fan kit, blower fan...RFK60P...**£264.00** (MGB 1962-76, Positive earth only).
- Revotec cooling fan kit, suction fan...RFK64...**£227.50** (MGB 1976-on, Negative earth only).
- Revotec cooling fan kit, blower fan...RFK68...**£300.00** (MGB GT V8, Negative earth only).

IM50090

FAN CONTROLLERS & SWITCHES

We offer a wide range of control switches for electric cooling fan conversions. All these switches can be retro fitted to an existing electric fan to give precise switching of the cooling fan. **Negative earth only.**

Revotec electronic fan controllers

These units use the latest type of surface mounted electronic controllers to sense the temperature of the water in the cooling system.

The controllers are designed to fit neatly into the cooling system without using capillary probes or radiator mounted clip on devices. This ensures that the coolant flow is not impeded, accurate temperature control and

effective sealing of the coolant system are maintained. We also offer special top hoses to allow easy fitting of the EFC in the top hose. **Negative earth only.**

- EFC, top hose fitting 28mm
- RFC002.....**£87.50**
- Top hose set, special hoses for RFC002
- RFC002A**£19.80**
- EFC, M22 x 1.5 for threaded boss
- RFC010.....**£87.50**
- (Use with threaded boss soldered into radiator header tank).
- Threaded boss, brass
- RFC012.....**£12.30**

Thermostatic switches

These switches offer simple on/off fan switching.

- Thermostatic switch (on 82°C off 68°C).
- IM50100..... **£9.20**
- Thermostatic switch (on 86°C off 81°C).
- IM50090..... **£9.20**
- Thermostatic switch (on 86°C off 76°C).
- IM50250..... **£8.10**
- Thermostatic switch (on 88°C off 79°C).
- IM50120..... **£9.20**
- Thermostatic switch (on 92°C off 87°C).
- IM50200..... **£7.50**

DYNOLITE OILS

Dynolite offers a premium quality range of lubricants and consumables developed for Veteran, Vintage & Classic cars and motorcycles.

Dynolite lubricants are formulated to exceed the original vehicle manufacturer's specifications and are blended using high quality base oils combined with additive formulations that are suitable for use in these historic vehicles.

For example, Dynolite Pre-War and Dynolite Classic engine oils include optimal levels of ZDDP to reduce wear, which is often found at reduced levels in modern engine oils.

DYNOLITE
EUROPE'S CLASSIC MOTOR OIL

Visit moss-europe.co.uk for more information

DYNAMAT NOISE & HEAT INSULATION

Two steps to a quieter, cooler, better feeling great car...

Step 1 Dynamat - to deaden the noise

Apply Dynamat to all the accessible interior panels of your car. Dynamat is best for noise reduction with some heat reduction... Start with firewall/bulkheads, gearbox tunnel, front floors, doors, rear floors, roofs, wheel arches, under bonnet, boot lid.

Step 2 Dynaliner - insulates against heat

Apply Dynaliner over the top of Dynamat to reduce heat soak by up to 70%. Also helps with noise reduction.

See page A86 for more information

LIGHTENED FLYWHEELS

Reducing the rotational mass of the engine gives improved engine response, it can pick up or lose revs quicker, meaning quicker acceleration and more engine braking. Our steel lightweight flywheels (weigh only 13lbs/5.9kgs) are primarily for race use where improved weight reduction can be fully used and appreciated, but they are also suitable for road use. Alternatively, your existing, standard flywheel can be lightened to give quicker engine pick up while still being useable for road applications. This service is carried out on customer's own unit.

- Lightweight steel flywheel (5 bearing/4 synchro).. MGS20714...£440.00
- Lightening work to existing flywheel (COU) ENB11£212.90
- MGB ARP flywheel bolt (each) TMG20723 £8.10

UPDATED CLUTCHES

For a road car the standard clutch is adequate, although for fast road/sport and competition work the clutch should be updated. Updated clutches give good reliability for road cars but with a slightly heavier pedal pressure. Standard release bearings are more than adequate, but we recommend that you fit a stainless steel braided clutch hose to handle the increase in pressure.

- Clutch cover, road/fast road MGB MST015£111.30
- Clutch cover, sprint/competition/race MGB..... TT207011 NCA
- Clutch cover, fast road/sprint MGC..... TT2802.....£193.20

- Clutch plate, heavy duty 23 spline MGB GCP116X..... £57.90
- Clutch plate, fast road 23 spline MGB..... TT2502.....£293.60
- Clutch plate, sprint/competition 23 spline MGB... TT20704£227.80
- Clutch plate, full race 23 spline MGB TT2504.....£317.10
- Clutch plate, fast road/sprint MGB GT V8 TT2802.....£193.20

- Release bearing MGB..... GRB106 £14.60
- Release bearing MGB (OE manufacturer)..... BBHD3317 .. £62.90
- Release bearing MGC..... GRB104 £19.50
- Release bearing MGB GT V8..... GRB224 £49.20

BRAIDED CLUTCH HOSES

These steel braided clutch hoses look great and they don't swell under pressure, ideal if updated clutch covers are being used.

- MGB Goodridge braided hose GBL608120 ... £43.32
- MGC Goodridge braided hose GBL698120 ... £23.40
- MGB & V8 aeroquip braided hose TT3041..... £42.00
- MGC aeroquip braided hose GBH136SS.... £24.50

CLOSE RATIO GEAR SETS

Close ratio gears cure the problem of the car coming off cam by losing engine speed during a gear change and provide increased reliability through being substantially stronger.

MGB gear ratios	1st	2nd	3rd	4th
Standard ratios	3.64	2.21	1.37	1.1
Close ratios	2.45	1.750	1.306	1.1

We supply straight cut gear sets, not for the faint hearted as they are noisy, which are suitable only for track race use and Helical cut gear sets. Straight cut gears do not include 1st or reverse gears - use existing or replace. Helical cut gear sets for 3-synchro MGA, MGB gearboxes include a straight cut 1st gear. For full details and specifications please contact your nearest Moss branch.

MGB 3-synchromesh

- Straight cut gear set STN70X...£2,022.60
 - Helical cut gear set STN70..... NCA
 - Spigot bush..... STN71X..... £29.90
- (Special spigot bush for fitting a 3 synchro gearbox to a 5 bearing engine).

MGB 4-synchromesh

- Straight cut gear set STN80.....£2,892.00

ALLOY ENGINE BACKPLATE

These alloy engine back plates are stronger and lighter than a standard steel unit, offering a worthwhile weight saving especially for competition cars. Pre-drilled for easy installation.

- MGB (3 synchro) race weight..... TMG20718 ..£298.70
- MGB (4 synchro) road weight MGS20717...£264.00

BANJO AXLE HUB & HALF SHAFT

High quality remanufactured hubs and half shafts for Banjo type axles.

- MGB hub banjo axle..... BTB334£220.00
- (For use with steel & wire wheels).
- MGB half shaft banjo axle..... BTB336£299.50

FIVE SPEED MAZDA GEARBOX CONVERSION FOR MGB

We are pleased to offer these new 5 speed gearbox conversion kits based on the Mazda MX-5 gearbox. The conversion uses a brand new MX-5 gearbox, giving the MGB the slick gear change that has become synonymous with the MX-5, and a relaxed cruising 5th gear.

The kit is supplied with a fully assembled gearbox with a bespoke cast bell housing & casing designed to fit directly to the MGB's engine back plate. The bell housing flange has been designed to resemble the standard gearbox, preserving engine bay originality.

The conversion uses the standard MGB flywheel & clutch cover and a new OE Mazda clutch plate is supplied with the kit. Installation is simplified with no cutting or permanent modifications required. Many of the components are preassembled to the gearbox and only require connections to the car.

Note: The gearboxes are prefilled with SAE 75W-90 oil.

The installation kits include:

- Brand new Mazda 5 Speed gearbox assembled into custom casing & bell housing
- Concentric clutch slave cylinder assembled with pipework
- Mazda OE clutch plate
- Mazda OE gear knob
- Custom gearbox mountings
- Speedo drive & cable
- Bespoke propshaft
- All parts & hardware for installation

Five speed Mazda gearbox conversion

*MGB converted to MGB GT V8.

HIGH TORQUE STARTER MOTORS

Especially useful for high compression engines, these powerful and lightweight starter motors are a straight replacement for the original.

The benefit of their huge increase in cranking power means they are less likely to burn out under strain.

WOSP high performance starters have been available in the UK for the last 20 years. They

are built to the highest standards. Most WOSP starter units are based on a modified high power 1.4kW Denso high torque starter motor.

See page A27 for more information

5 SPEED GEARBOX CONVERSIONS

Our 5 speed conversions provide everything you need to achieve modern day motoring comfort and performance.

The ultra-smooth action of the five-speed gearbox is an instant benefit. With synchromesh throughout the gear range and a quieter reverse gear the vibration and hassle are taken out of town driving. With similar ratios from first to fourth, the performance through the gears is unaffected, and the added benefit of a 0.82:1 fifth gear gives a reduction of approximately 1,200rpm at maximum speeds, giving faster and more relaxed cruising.

The conversion is based on the Ford T9 gearbox, it was chosen for its smooth gear change and robust reliability and spare parts availability. The conversion involves minimal cosmetic or structural changes and the specially modified gear change maintains the gear lever in the original position, with no modifications required to the upper area of the tunnel.

Installation kits are supplied separately from the gearbox unit. Please ensure you order the correct installation kit to suit your car and a gearbox unit. The

gearbox is fully reconditioned and sold outright with no surcharge. For spares and replacement parts please see our website.

The installation kits include:

- Bespoke cast alloy bell housing
- Spigot bush
- Propshaft
- Mounting brackets
- Chrome gear lever
- Speedo cable
- All necessary hardware

Conversion notes:

- The conversion uses a standard MGB clutch assembly. Installation kits do not include clutch components - we recommend the clutch is checked and replaced as necessary. See restoration section for clutch components.
- Reverse light switch is not included in the kit, but is sold separately. The original switch wiring will need to be modified to use this switch.
- Your speedometer will need to be re-calibrated to be accurate.
- Our installation kits are available to convert the transmission configurations as detailed below.

	Engine type	Gearbox type	Axle type	Part no.	
MGB (1962-65)					
Install kit, RHD	3 main bearing	3 synchro	banjo	041-760RHD	£1,579.50

Clutch alignment tool				041-620	£6.90

(Gearbox capacity = 1.9litres).

*Note: With banjo axles converted to 4 synchro gearbox.

MGS20720

QUAIFE LIMITED SLIP DIFFERENTIALS

Quaife limited slip differentials allow maximum drive to the wheels, giving more grip under hard acceleration and cornering. Power is distributed to both wheels, rather than wasting energy spinning the wheel under the least load. The Quaife differential is gear operated, so it has no plates to wear, and automatically transfers power to the wheel with the most grip.

- MGB (banjo axle) TMG20720 ... £1,050.80
- MGB (tube axle) with 3.7:1 and 3.9:1 ratios. ... MGS20720 ... £1,050.80
- MGB (tube axle) with 3.0:1 and 3.3:1 ratios. ... TMG21020. ... £1,050.30

TMG2930K

HIGH CAPACITY FUEL PUMPS

The standard fuel pump may not be able to maintain adequate fuel flow and pressure at higher engine speeds, particularly with a tuned engine. The Facet range of fuel pumps will suit all standard and modified engines fitted with carburettors. They give constant fuel flow and pressure, even at high temperatures eliminating the problems associated with vapour lock. The pumps are available in a variety of specifications to suit the engine's fuel pressure and flow requirements. Further fine tuning of the fuel pressure can be easily achieved by the use of a separate fuel regulator, see opposite. With safety in mind we recommend fitting a fuel pump inertia switch kit, so that in the event of an accident fuel delivery is automatically cut-off. Fuel lines may require adapting to install the new pump, check pipe sizes to select the correct unions, additional unions may be required.

Cylindrical fuel pumps

Formerly known as interrupter type pumps, these heavy duty pumps can be fitted at the front or rear of the car and up to 600mm above the bottom of the fuel tank. Kits are supplied with mounting & 8mm unions, alternative size unions available.

- Cylindrical fuel pump kit - road Silver Top TMG2930K .. **£105.60**
(Up to 150bhp, flow rate: 30 gal/hr, 4.0-5.50 psi, unions: 8mm x 1/8 npt).
- Cylindrical fuel pump kit - fast road Silver Top... MGS2930K .. **£107.60**
(Up to 200bhp, flow rate: 35 gal/hr, 6.0-7.0 psi, unions: 8mm x 1/8 npt).
- Cylindrical fuel pump kit - competition Red Top... MGS2932K .. **£109.60**
(Above 200bhp, flow rate: 40 gal/hr, 6.0-8.0 psi, unions: 8mm x 1/8 npt).
- Cylindrical fuel pump only - competition Red Top .. TT2930..... **£98.60**
(Above 200bhp, flow rate: 40 gal/hr, 6.0-8.0 psi, 1/4 npt threads).

MOC1841

TT29321

TMG2931K

Solid state fuel pumps

These pumps should be mounted at the rear of the car (as they are designed to push fuel rather than draw fuel) and ideally below fuel tank level, although they will work up to 300mm above the bottom of the fuel tank. Kits are supplied with mounting & 8mm unions, alternative size unions available.

- Solid state fuel pump kit, fast road TMG2931K... **£61.20**
(Up to 150bhp, flow rate; 32 gal/hr, 4.5-7 psi, unions: 8mm x 1/8 npt).
- Solid state fuel pump only, fast road MGS2931..... **£51.00**
(Up to 180bhp, flow rate: 34 gal/hr, 7.0-10.0 psi, 1/8 npt threads).

Fuel pump unions

Use with the listed fuel pumps, please check thread and pipe size before ordering.

- Straight union 1/4" (6mm) 1/8 npt FPA903B **£1.90**
- Straight union 5/16" (8mm) 1/8 npt MOC1604 **£3.80**
- Straight union 3/8" (10mm) 1/4 npt FPA904/B **£3.20**
- 90° union 5/16" (8mm) 1/8 npt MOC1841 **£7.30**
- 90° unions 5/16" (8mm) 1/4 npt (pair) TT2930A **£8.30**
- 90° unions 3/8" (8mm) 1/4 npt (pair) FPA902B **£7.50**

Fuel filter union

- Unions 1/4" (6mm) 1/8 npt (pair) TT29321 **£7.50**

GFH1025X

ETHANOL PROOF FUEL HOSES

Gates "Barricade" fuel hose can accommodate any fuel used with a conventional carburettor, and exhibits extremely low permeability. Compatible with ethanol, methanol and all blends of petrol and alcohol. These hoses achieve five times less fuel vapour permeation than conventional hoses, are rated for use to 50 PSI and for temperatures from -40 to 125°C.

- Gates Barricade fuel hose, 1/4" ID (per metre) ... GFH1025X **£6.80**
- Gates Barricade fuel hose, 5/16" ID (per metre) .. GFH1031X **£8.50**

HFFK1

FUEL LINE KITS

Traditional type fuel pipes (Bundy tubing) tend to rust from both sides, and rust in fuel and fuel lines can cause all sorts of problems. Our fuel line kits come with all fittings and unions, are easy to fit, and will not rust.

- MGB (1962-73 chrome bumper) HS4 HFFK1 **£106.50**
- MGB (1973-76 chrome/rubber bumper) HIF HFFK3 **£128.00**
- MGB (1976-On rubber bumper) HIF HFFK2 **£145.60**
- MGC HFFK18 **£149.10**
- MGB GT V8 HFFK3 **£128.00**

TT2927

TT2925

FUEL REGULATORS

We recommend the fitment of a fuel regulator which allows fine adjustment to the fuel pressure to suit your requirements. Use a filter/regulator unless you already have a fuel filter fitted.

- 67mm deep glass filter/regulator 1/4" unions ... TT2927..... **£66.10**
- Replacement filter for TT2927 TT29270 **£4.80**
- 85mm deep glass filter/regulator 5/16" unions ... TT2928..... **£76.00**
- Replacement filter for TT2928 TT29271 **£9.00**
- Fuel pressure regulator 1/4" unions TT2925..... **£61.20**
- Fuel pressure regulator 5/16" unions TT2926..... **£64.90**

FUEL PUMP INERTIA SWITCH

This inertia switch is a good safety feature when using an electric fuel pump. The switch unit mounts to a vertical surface in the engine bay and in the unfortunate event of a crash cuts the power to the fuel pump preventing fuel spillage. Supplied with multi connector and tail leads to allow easy connections.

- Fuel pump inertial switch kit C41220AX.... **£35.30**

GROSE JETS FOR SU CARBURETTORS

Grose jets use a more modern ball valve so they won't stick open.

- Grose jets for SU H/HS carburettors GAC9201X.... **£9.40**
- Grose jets for SU HIF carburettors GAC9202X.... **£16.20**

SU HS & HIF CARBURETTOR SERVICE KITS

- MGB HS4 service kit WZX1859X... £76.80
- MGB HIF-4 service kit WZX1850X... £70.90
- MGB GT V8 HIF-6 service kit WZX1858 £77.00
- HS6 repair kit (for our HS6 conversion) CRK253£115.60

SU PLAIN THROTTLE DISCS

If your throttle discs are fitted with a pop valve these should be replaced with plain discs to maximise air flow through the carburettors on full throttle.

- Plain throttle disc for HS4..... WZX1323.....£13.60
- Plain throttle disc for HS6..... WZX1321.....£12.60

SU CARBURETTOR DASHPOT COVERS

Dashpot covers are an ideal way to enhance and brighten the engine bay.

- Alloy dashpot cover for HS4/HS6 SFR23 NCA
- Anodised blue dashpot cover for HS4/HS6 SFR23B..... £18.80
- Anodised red dashpot cover for HS4/HS6 SFR23R..... £18.80
- Chrome dashpot cover for HS4/HS6..... SFR150..... £12.10
- Chrome dashpot cover short type for HS4/HIF6 . SFR175 £11.60

SU SPECIAL TOOLS

These tools are designed specifically for working on SU carburettors.

- Jet adjustment spanner, 5/16" AF..... AUD2693..... £3.30
- Jet adjustment spanner, 17mm..... JZX1187..... £6.30
- SU carburettor tool kit GAC6101X ... £20.60

SU OVERSIZED SHAFTS

Worn throttle shafts and carburettor bodies cause bad idle and uneven running. This can be remedied by replacing your carbs or by reaming out your carburettor bodies and fitting oversize throttle shafts.

- Oversize throttle shafts for HS4..... WZX1177RP . £20.40
- Oversize throttle shafts for HS6..... WZX1178RP . £20.40
- Carburettor reamer..... 386-385.....£231.00

SU CARBURETTOR CONVERSION KIT

MGB twin HS6

A pair of HS6's add about 6bhp to a fast road car with a free-flow exhaust. The main improvement is torque at low to mid revs, with a small increase in fuel consumption. Our kit includes a pair of carburettors, matched inlet manifold, throttle cable linkage assembly, K&N filters and fittings.

- SU 1.3/4" HS6 carburettor conversion MGS10761.£1,627.60

Note: Carburettors and manifold also available separately.

- HS6 carburettors with linkage (pair) TT1156.....£923.60
- Inlet manifold with fixings TMG10758 ..£138.10

TRIPLE SU MGC INLET MANIFOLDS

Set of three single inlet stub manifolds using 3.1/2" long tracts, with balance pipes and servo take off. Linkages for HS6 carburettors will depend on the units used and can only be custom made to the car.

- MGC inlet manifolds (SU HS6) TMG11758 ..£708.20

MG CARBURETTOR CAPS

These very distinctive solid brass dashpot damper caps for SU carbs will improve your engine compartment. Your original damper rod must be re-used and pressed into the new cap.

- Carburettor caps with MG logo (pair)370-735£54.70

PIPER AIR SOCKS

These air socks can be used with our piper ram pipes. They are supplied in pairs at 100mm long. They can be cut to size, though you must leave a minimum of 30mm between the inner face and the ram pipe mouth.

- Piper air socks (pair)..... PXC1050 £28.60

MM222-260

DOWN DRAUGHT WEBER CARBURETTOR CONVERSION

Complete kit designed to replace the original single Zenith carb used on MGB's supplied to emission control regulated markets. Kit inc: carb, manifold, air filter, linkage and fittings. A K&N performance air filter is also available separately.

- Weber down draught carburettor kit MM222-260. .£811.10 (1962-74 with manual choke).
- Weber down draught carburettor kit MM222-265. .£811.10 (1974 on with automatic choke).
- K&N filter assembly. 222-366.£130.00

DOWN DRAUGHT WEBER V8 CARBURETTOR KIT

This genuine Weber carburettor kit features a 4 barrel down draught carburettor and a dual plane induction manifold and a polished low-rider style air filter. The conversion has been developed for improved engine torque and fuel economy, also providing an increase in power over standard SU carburettors. This comprehensive kit also includes gaskets, hardware, breather systems and linkage.

SIDE DRAUGHT WEBER CARBURETTOR CONVERSION

MGB 1800-1950cc

Our Weber kits inc: Inlet manifold, carburettors with suitable jets, throttle linkage & fittings. Alternative settings can be provided, please enquire.

Single Weber 45 DCOE carburettor kit fast road . TMG10759. . £803.00

LP42411

WEBER DCOE THROTTLE LINKAGES - MANGOLETSI

This new simple design, for DCOE carburettors, features a cast bracket which fits over the top of the carburettor, holding the linkage neatly to the side of the carburettor. This unique design has an ultra-low profile - the highest point of the linkage is only 10mm higher than the carburettor, ideal if clearance is limited.

Each kit is suitable for single or twin carburettor set-ups for in-line engines. The unique design also gives a wide range of throttle adjustment. Cable travel and spring tension can be adjusted independently. The adjuster can be set to give the desired cable travel, the spring tension can then be set to give the correct throttle shut off. This allows the throttle feel to be fine tuned to the driver's requirements.

- Throttle linkage DCOE, twin cable LP42451.£134.10
- Throttle linkage DCOE, single cable LP42411.£119.10

Note: This is a universal carburettor kit and is supplied with an initial calibration to suit Range Rover donor engines, but it can be recalibrated as required. Please check the height of your V8 conversion for bonnet clearance before ordering. We suggest using either an MGC bonnet (part no. MGS71007) or an MG RV8 bonnet (part no. ZKC5425) to give suitable clearance for your conversion. See our website for a dimensional diagram and more information.

Weber V8 down draught carburettor kit TTK1859 . £1,166.40

TWM0033

WEBER CARBURETTOR INLET MANIFOLDS

All manifolds are supplied with fittings and seal plates, for more details please contact Moss. With some installations using Weber carburettors, the inlet manifold no longer supports a closed circuit engine breather system.

MGB

These aluminium manifolds follow the rule of using the longest necked manifold possible in the space available. All flanges are 12mm deep.

- Short inlet manifold 9.5cm..... TWM0033...**£278.30**
(For all RHD models with a deep air filter by using an AHT85 throttle cable and post 1975 LHD cars. This short manifold will not fit in conjunction with TT10730/SS exhaust manifolds. Supplied with linkages).
- Medium inlet manifold 12.5cm..... TT10750**£244.00**
(This is the popular for RHD models with deep K&N air filters and LHD models with a brake servo).
- Long inlet manifold 17cm..... TT10750A...**£232.10**
(The best length of manifold for RHD models only where no air filter is used).

MGC

Alloy inlet manifold TWM0087...**£976.80**
(These are supplied in cast aluminium as a set of three including throttle linkage and seal plates, inlet tract is 4" long).

LP4100

WEBER DCOE THROTTLE LINKAGES - WEBCON

These high quality linkages are available for Weber DCOE side draught carburettor. The main bracket, lever and fittings are manufactured from zinc plated steel which gives excellent corrosion resistance and matches other components on the carburettor. They feature a self-lubricating bronze pivot bush, twin return springs and high quality ball joints, giving a smooth operation. They are suitable for single or twin carb set ups and are fully adjustable. Kits are available for top or bottom mounting, with a choice of single or twin cables. Single cable kits are supplied with a ferule to attach to existing throttle cable. Twin cable kits include a pair of cables, with pedal end fitting block.

- T/linkage DCOE, top mount/single cable..... LP4100**£117.30**
- T/linkage DCOE, top mount/twin cable LP4101**£140.00**
- T/linkage DCOE, bottom mount/single cable ... LP4102**£117.30**
- T/linkage DCOE, bottom mount/twin cable.... LP4103**£140.00**

WEBER MOUNTINGS

These competition mounting rubbers and sealing plates with integral rubber o-rings help to dampen vibration giving more consistent idling and fuel supply.

- Seal plate for 40-45 DCOE (each)..... TT2937A **£7.10**
- Carburettor mounting bush kit (per carburettor).... TT2939..... **£13.00**
- Thackery washers (each)..... AJD7731..... **£0.82**

MIKUNI CARBURETTOR CONVERSION KIT

Moss is proud to offer these new Mikuni carburettors for your MGB. Mikuni are known for their legendary performance motorcycle carburettors and in our ongoing quest to provide the best performance parts for your classics; we have developed these modern, performance carburettor systems.

“The Mikuni system is ready to be installed straight onto a stock MGB and will instantly enhance the performance of your car”.

The carburettor improves the throttle response that comes from the integrated accelerator pump and can be tuned to work with engines built for high revs and higher compression. The clever Mikuni design makes them tougher against the damaging effects from modern fuels with ethanol, and can support more power with more fuel flow than standard SU carburettors. The system is more adjustable and easier to tune than the Weber or SU carburettors and have replaceable needles, pilot jets and main jets. They also feature adjustable accelerator pumps, throttle stops, idle screws, and needle positions.

Moss designed a PCV kit (366-395) specifically for the Mikuni carburettor applications for MGB models 1962 to early 1964, and 1970 to 1975. Please note this conversion kit does not come with air filters. Moss developed the carburettors using high performance filters with a classic design (053-391).

- Mikuni carburettor conversion kit (1962-75)..... 366-380....**£1,315.40**
- PCV kit (1962-64 & 1970-75)..... 366-395..... **£53.90**
- Air filter..... 053-391..... **£19.60**

COLD AIR INTAKE

This CAI combines computer designed velocity stacks with a remote modern air filter. This system was designed with airflow and practicality foremost in mind. The years of wrestling with your MG's filters are over. Furthermore, the design is such that the original air hose duct can easily be used to remote mount the air filter behind the grill for full cold air intake.

Cold air intake..... 223-065.....£172.10

RAM PIPES

Ram pipes (except period style) are fitted inside the air filter to help smooth the air flow into the carburettor. The shorter the ram pipe the higher up the rev range power is produced. If using with an air filter, a minimum clearance of 1 1/2" between the ram pipe and the filter case is recommended to ensure maximum air flow.

Ram pipes for SU carburettors

- 1 K&N ram pipe for HS4..... KN85-5039 ... £30.20
Piper 30mm ram pipe for HS2..... SFR230 £31.60
- 2 Piper 30mm ram pipe for HS4..... SFR430 £33.50
- 3 Piper 30mm ram pipe for HIF44..... SFR4430..... £35.70
- 4 Piper 50mm ram pipe for HS6..... SFR650 £31.60

- 5 Period short ram pipe for HS2..... SFR1 £21.20
Period short ram pipe for HS4..... SFR2 £21.20
- 6 Period short ram pipe for HS6..... SFR3 £21.20
Period long ram pipe for HS2 SFR4 £21.20
- 7 Period long ram pipe for HS4 SFR8 £21.20
- 8 Period long ram pipe for HS6 SFR9 £21.20

Ram pipes for Weber carburettors

These ram pipes are genuine Weber replacement products.

- 9 Ram pipe 40 DCOE 16mm KNSS1640 £42.30
- 10 Ram pipe 40 DCOE 26mm KNSS2640 £42.30
- 11 Ram pipe 40 DCOE 39mm KNSS3940 £42.30
Ram pipe 45 DCOE 16mm KNSS1645 £42.30
- 12 Ram pipe 45 DCOE 26mm KNSS2645 £42.30
Ram pipe 45 DCOE 39mm KNSS3945 £42.30
Ram pipe 45 DCOE 60mm KNSS6045 £34.40

BREATHER FILTERS

Engine breather filters are an alternative to running pipes from crankcases, clutch housings and timing cover breathers to the inlet manifold, they are particularly useful if induction set ups have been changed. Filters simply push on and are retained by a hose clip. Just remember to block off the other fitting on the carburettor or air filter where the original pipe was attached.

K&N crankcase breather filters

Breather filter 2" diameter 1/2" external inlet KN62-1010 ... £29.00
(Filter has 1/2" (12mm) OD metal inlet stub to fit into 1/2" (12mm) ID breather hose).

Breather filter 2" diameter 1/2" internal inlet KN62-1330 ... £29.00
(Filter has 1/2" (12mm) ID rubber inlet to fit onto 1/2" (12mm) OD breather pipes).

Aftermarket crankcase breather filters

- Breather filter 12mm inlet - blue..... MT1200 £7.70
- Breather filter 12mm inlet - chrome..... MT1201 £6.60
- Breather filter 12mm inlet - red..... MT1202 £7.70
(Filters have 1/2" (12mm) ID rubber inlet to fit onto 1/2" (12mm) OD breather pipes).

K&N FILTERS

The last air filter you will ever need. K&N filters have a 1,000,000 mile guarantee, they just need cleaning and re-oiling periodically. K&N cotton gauze filters give virtually unrestricted air flow, whilst still providing very high levels of filtration to protect your engine.

K&N marque sports filters for SU carburettors

- MGB HS4/HIF4..... KNMG240...£138.30
- Replacement filter..... KNE240 £50.00
(Also fits standard air filter case).

K&N sports air filters for SU carburettors

Choose the filter that best suits your application. Centre mount has the inlet hole in the centre of the filter, offset has the inlet hole below the centre line effectively raising the filter, useful where clearance may be an issue. Use as deep a filter as possible.

- Filter element to fit original filter cases KNE240 £50.00
- HS/HIF4 centre mount 45mm 1.3/4" deep KN56-1390A.£120.00
- HS/HIF4 centre mount 54mm 2.1/8" deep KN56-9093 ..£125.00
- HS/HIF4 centre mount 83mm 3.1/4" deep KN56-9095 ..£100.00
- HS/HIF4 offset mount 45mm 1.3/4" deep..... KN56-9128 ..£120.00
- HS/HIF6 centre mount 45mm 1.3/4" deep KN56-1400A.£120.00
- HS/HIF6 centre mount 54mm 2.1/8" deep KN56-9096 ..£120.00
- HS/HIF6 centre mount 83mm 3.1/4" deep KN56-9098 ..£105.00
- HS/HIF6 offset mount 45mm 1.3/4" deep..... KN56-9132 ..£120.00

SUPERCHARGERS

Superchargers have been used on cars and piston engined aircraft since before World War II in order to obtain maximum power without losing vital torque. The Moss supercharger kits give increased torque and horsepower throughout the rev range without adding extra stress to your engine.

Our supercharger kits use an Eaton MP45 charger unit that features a bypass valve. During light throttle conditions this valve remains closed bypassing the compressor, but then opens to feed the charge through the compressor to give maximum power when required. This system gives good drivability and maintains economy during light throttle conditions then boosts the charge the moment the throttle is pressed, giving an instant boost of power.

Our engineers designed an intake manifold that provides equal airflow, pressure and fuel mixture to each cylinder. By optimizing the distribution in the manifold for each cylinder, you can run more boost pressure without the chance of harmful detonation. The Moss supercharger system produces 7.5-8.25 PSI of boost at sea level. Bolted on to a standard engine you may

expect a horsepower increase* of 40% at the flywheel. Just hold on to the steering wheel when you decide to press the pedal!
The kits include an MP45 supercharger, intake manifold and SU carburettor, alternator (1968 on models only), special pulleys and a serpentine drive belt, K&N sports filters, fittings and comprehensive fitting instructions.

To optimize the performance of a supercharger installation we offer a special high lift, short duration camshaft. This camshaft is only available new/outright. To maximise the full benefit of the supercharger we recommend that you fit the 8° static advance distributor (TMG10771). Please visit our website or contact your branch for more information.

***Note:** These systems are designed to supplement an engine in good condition, not make up for lost power in a tired one. If your car has an old, tired engine you will need to overhaul it first.

Supercharger kit - RHD and LHD (1965-67).....	150-050.....	NCA
Supercharger kit - RHD (1968 on).....	150-060....	£4,281.00

MGB GT V8 air filters

MGB GT V8 102mm 4" long.....	KNRB50.....	£59.70
MGB GT V8 114mm 4.5" long.....	KNRB51.....	£55.00

(Fit onto the stubs of the original air plenum, replacing the cases for the OE filters).

K&N sports air filter for Holley carburettors

Holley low rider filter assembly 14" x 3".....	KN60-1280 ..	£125.00
--	--------------	---------

K&N sports air filters for Weber carburettors

All these filters are 180 x 120 mm.

DCOE fitting 45mm-1.3/4" deep.....	KN56-1270 ..	£125.00
(Not suitable for ram pipes).		
DCOE fitting 45mm-1.3/4" deep.....	KN56-9106 ..	£100.00
DCOE fitting 63mm-2.1/2" deep.....	KN56-9104 ..	£125.00
DCOE fitting 83mm-3.1/4" deep.....	KN56-9265 ..	£110.00

STELLING & HELTINGS AIR FILTERS

Stelling & Hellings air filters were a popular aftermarket air filter used on many American hot rods & sports cars. Their filters were supplied as original equipment on the 427 Cobra. These exact reproductions are chrome plated with a mesh filter and are a smart accessory for your MGB.

Stelling & Hellings air filter - SU 1 1/4" carbs (each)...	223-100.....	£46.30
Stelling & Hellings air filter - SU 1 1/2" carbs (each) ..	223-200	£46.30

LOGO AIR FILTERS

Enhance the appearance of your SU carburettors and engine bay with these chromed MG & SU logo air filters. Fits 1 1/2" carburettors.

MG logo air filter (each).....	GAC1055X ...	£65.00
SU logo air filter (each).....	GAC1078X ...	£65.60

OUR BRANCHES ARE HERE TO HELP

No matter which Moss branch you use, you can expect the same quality service. Whether you have an inquiry about a product, or simply want some advice, our staff of like-minded enthusiasts are there to help.

When you have a question don't hesitate to call one of our branches. We look forward to being of service.

Full contact details of our branches can be found on the back cover of this catalogue

PERFORMANCE ENGINE UNITS

Auxiliary components not included.

If you don't have the inclination to prepare, modify or build the engine yourself, we can build it for you. We also offer a wide range of high quality standard engines for all Abingdon classics. Please refer to the Restoration section or contact your nearest Moss branch. Here are some of the more popular options, although we can build an engine to your exact specification, please talk to your nearest Moss branch for details. (All our performance engines are fully balanced complete with clutch and flywheel).

Note: A refundable surcharge will apply to all units unless the customers own unit is supplied for modification.

MGB stage 2 performance engines

To gain torque and power there really is no substitute for a 2000cc or 2100cc engine, which reduces the need to rev the engine so highly and makes wilder camshaft profiles much easier to use on the road. Our 2000cc stage 2 engine units are supplied with fully balanced flywheel, clutch and crankshaft. Our 2100cc stage 2 engines also come with balanced clutch, flywheel and crankshaft as well as inlet manifold, carburettors, distributor, and alloy rocker cover.

Engines are supplied less rear engine plate, water pump and front pulley. Units come with slave side covers. 2000cc units also have a slave rocker cover.

Cylinder head modifications include gas flowing of the ports and chambers, standard size reshaped valves, re-cut valve seats, new guides and double valve springs. We also stock a full range of standard 5-bearing engine units available in 1800cc, 1950cc, and 2100cc capacities.

MGB (1964-67) 18GB

2000cc stage 2 performance engine 48G73920ST2 **£3,507.00**
 2100cc stage 2 performance engine 48G73921ST2 **£5,069.00**

MGB (1967-71) 18GG

2000cc stage 2 performance engine 48G75520ST2 **£3,507.00**
 2100cc stage 2 performance engine 48G75521ST2 **£5,069.00**

MGB (1972-74 chrome bumper)

2000cc stage 2 performance engine 48G73320ST2 **£3,507.00**
 2100cc stage 2 performance engine 48G73321ST2 **£5,069.00**

MGB (1974 on rubber bumper)

2000cc stage 2 performance engine BHM111120ST2.. **£3,507.00**
 2100cc stage 2 performance engine BHM111121ST2.. **£5,069.00**

ALLOY ROCKER COVERS & FITTINGS

An alloy rocker cover will improve the appearance of your engine bay and, as an added advantage, will help to muffle valve train noise. Always fit a new gasket when replacing your rocker cover, and do not over tighten rocker cover nuts.

MGB rocker covers

Polished alloy rocker cover GAC4069P ... **£45.40**
 Black crackle finish rocker cover GAC4069X ... **£67.40**

Fitting kits & fittings

Fitting kit for rocker cover 1964-67 GAC4069FK **£20.80**
 (Kit includes: Oil cap, seals and chrome spacers/nuts/washers).
 Fitting kit for rocker cover 1967-On GAC4069FKL ... **£25.50**
 (Kit includes: Oil cap, dome nut, seals and chrome spacers/nuts/washers).
 Spacer and chrome washer kit GAC4069WK **£8.00**
 (Kit includes: Chrome washers, chrome spacer kit and rubber grommets).
 Rocker cover gasket (each) AJM402 **£1.90**
 Stud long (each) 12H2557L **£5.40**
 (For 1967 on cars, you will need 2 extra studs to fit an alloy rocker cover).

1 Oil filler cap black plastic GFE6003 **£5.20**
 2 Oil filler cap chrome..... 8G612CP **£9.70**
 3 Oil filler cap steel/matt finish..... 8G612 **£8.30**

MG LOGO ROCKER COVER NUT

Our polished rocker cover securing nuts feature the MG logo in solid brass. Look great on any rocker cover, the perfect finishing detail to any engine bay.

Rocker cover nut (each) 460-119 **£30.00**

MGB UPRATED ENGINE MOUNTS

These uprated engine mountings will help to reduce engine movement.

Chrome bumper models

RH engine mounting MGS10763R **£11.70**
 LH engine mounting MGS10763L **£11.70**

Rubber bumper models

RH & LH engine mounting BHH1318 **£7.10**

UPRATED HEAD GASKETS

Leyland Special Tuning specification copper/asbestos competition head gaskets retain higher compression and are suitable for competition use. The cylinder head to block joint faces must be clear of even the slightest distortion, so it is essential when building the engine that these faces are checked professionally. Solid copper head gaskets are suitable for both Road or Competition. Adaptable for standard/oversize bores and can be re-used. Suitable for flat blocks only.

- MGB solid copper head gasket (1.1mm) GEG377C **£30.10**
- MGB solid copper head gasket (1.1mm) overbored . . GEG377C/20 . **£46.20**
- MGB solid copper head gasket (0.32") MGS10736 . . **£131.60**

ALUMINIUM CYLINDER HEADS (STANDARD)

Working to original drawings, these brand new cylinder heads are designed to the original factory specification. When fitting an aluminium head, you must run with 100% antifreeze/summer coolant that contains the correct inhibitors to prevent corrosion and electrolytic reaction. We recommend you use new hardware, nuts, studs, etc... when fitting these heads to ensure a good fit. All our 5-port heads are supplied as fully machined bare heads, with bronze valve guides and lead free valve seats. Heads can be modified to a higher specification. For detailed specifications please call your nearest Moss branch.

- MGB (1962-80) aluminium cylinder head 451-805 . . . **£1,279.40**
- MGB (US Smog Spec) aluminium cylinder head . . 451-815 . . . **£1,279.40**

UPRATED CYLINDER HEAD FASTENERS

You should consider the strength and reliability of all critical fasteners used on your engine. Increased reliability can be obtained for mild states of tune by replacing the head studs and nuts with uprated versions. The greater strength of these studs will restrict stretching under pressure and therefore keep the head and gasket securely in place. Remember, just a simple nut and bolt check could prevent "shake, rattle and break"! Use these to help keep your cylinder head gasket in one piece.

- MGB cylinder head stud and nut kit TMG10764 . . **£195.80**
- MGB flanged head nuts 51K1193B **£2.05**

SMOG PUMP BLANKING PLUGS

Later USA spec engines were equipped with an air/smog pump to help the emission regulations in most American states. Most people try and do away with this smog equipment and end up fitting these blanking plugs to fill the vacant holes in the cylinder head. **Note: Please remember some laws state you cannot remove or alter the emission controls. Please check you local laws before attempting to remove the air/smog pump and emission controls.**

- Blanking plug air/smog pump 052-242K **£23.00**

MGB CROSS FLOW ALUMINIUM HEADS

These cross-flow aluminium cylinder heads with in-line oil feed, give up to 30% more flow, plus they have a much improved water flow for increased cooling. All our cross-flow heads are supplied as fully machined bare heads, with 37cc* chambers, bronze valve guides and lead free valve seats. The heads are compatible with our sports extractor exhaust manifolds, to give even more power, and we have developed inlet manifolds to accept either Weber or SU carburettor installations. When fitting an aluminium head, you must run with 100% summer coolant that contains the correct inhibitors to prevent corrosion and electrolytic reaction. We also recommend you use new hardware, nuts, studs, etc... when fitting these heads to ensure a good fit. *These heads are machined at 37cc, suitable for most road applications providing no previous extra machining work has been carried out, if in doubt, please contact your nearest Moss branch.

- MGB cross-flow aluminium cylinder head 451-690 . . . **£1,761.80**
- Heater connector adaptor (rear of head) 451-685 **£51.50**
- Heater valve (use with adaptor 451-685) 565755 **£42.20**

Weber carburettor and inlet manifold applications

- Aluminium inlet manifolds (pair) 373-985 **£328.80**
- (Suitable for 40 or 45 DCOE carbs, manifolds come with linkage and coupling levers for direct action throttle, gaskets, studs, nuts and seal rings).

- 40 DCOE* Weber carburettor - fast road/sprint . . TT29343308 . **£596.60**
- (40 DCOE is jetted with 35 chokes).
- (*39mm ram pipes supplied with 40 DCOE and 63mm with 45 DCOE).

- Standard single throttle cable AHH8462 **£6.00**
- Twin throttle cable LP42451 **£134.10**
- (Smoother operation complete with brackets and fittings).

- Braided fuel pipe set TT1455 **£178.70**
- Inlet manifold gasket (each) 451-705 **£6.00**

K&N sports oval air filters 180 x 120mm (as required)

- 45mm-1 3/4" deep (use 16mm ram pipe) KN56-9106 . . **£100.00**
- 63mm-2 1/2" deep (use 16/26mm ram pipe) KN56-9104 . . **£125.00**
- 83mm-3 1/4" deep (use 16/39mm ram pipe) KN56-9265 . . **£110.00**

SU carburettor and inlet manifold applications

- Inlet Manifold 373-975 **NCA**
- (For SU HS6/HIF4 carbs, manifolds come with gasket, studs and nuts).
- SU HS6 carburettors (pair) TT1156 **£923.60**
- (Supplied without linkages and needles, please contact Moss for details).
- Inlet manifold gasket (each) 451-705 **£6.00**

MODIFIED CAST IRON CYLINDER HEADS

Our range of gas flowed heads are available to suit all needs. On some heads the work is carried out to the customers own unit, the more popular heads may be available on an exchange basis. All heads are supplied with bronze-alloy valve guides and valve seats suitable for use with unleaded petrol unless requested otherwise. Please advise us of the engine capacity and any planned improvements/changes at the time of ordering.

All our modified MGB heads are of the 18V type and only available on exchange for an old serviceable unit. For earlier engines, 18G to 18GG, please contact your nearest Moss branch concerning possible modifications required when fitting an 18V cylinder head.

MGB in-line and offset rocker feeds

The two types of 18V cylinder head are identified by the position of the oil feed hole under the fourth rocker pedestal. Early 18V heads had a hole in-line with the two studs securing the pedestal, later heads had an offset hole.

While the modification is assumed to have taken place around the introduction of the rubber bumper cars, factory rebuilt 18V engines whether chrome or rubber bumper type are supplied with either head and there is no documented engine number change point between the two.

Stage II

Fast road heads include gas flowed ports and reshaped combustion chambers. New reshaped standard valves are fitted with new guides and uprated valve springs.

Stage III

Fast road/sport heads have further modifications to the ports and chambers. Large inlet valves are fitted with new guides, uprated valve springs and alloy valve caps.

Stage IV

Race heads are competition based heads with extensive modifications to ports, valve seats and chambers. New large inlet and exhaust valves with Moss ST valve springs and alloy caps. Not available with lead free valve seats. Work is carried out to customers own head, we will need full details of your engine to achieve the optimum compression ratio.

Stage II in-line feed cylinder head* (lead free) . . .	TMG10702UL . . .	£760.60
Stage III in-line feed cylinder head* (lead free) . . .	TMG10703UL . . .	£894.60
Stage II offset feed cylinder head** (lead free) . . .	12H4735LFS2 . . .	£1,423.10
Stage II offset feed cylinder head* (lead free) . . .	TMG10712UL . . .	£760.60
Stage III offset feed cylinder head* (lead free) . . .	TMG10713UL . . .	£894.60

(*Reconditioned, **new).

TMG10781

UPRATED ENGINE FASTENERS

MGB

- Main bearing stud kit (3 bearing engines) 322-868 £161.40
- Main bearing stud kit (5 bearing engines) 322-938 £187.90 (18GB-GG engines).
- Main bearing stud kit (5 bearing engines) 322-948 £131.60 (18V-on engines).
- Con rod bolts and nuts (engines to 18GG) (each) . MGS10780 . . . £56.90
- Con rod bolts and nuts (later engines) (engine set) . TMG10781 . . £131.60
- Flywheel ARP bolts (all later engines) (each) TMG20723 £8.10

TMG10709

UPRATED PUSHRODS & CAM FOLLOWERS

Our lightweight (40g) cam followers are the type with extra drain holes, they allow high rev's while reducing loads on the camshaft. Our lightweight tubular pushrods are stronger than the originals and are made to suit a high compression cylinder head.

If fitting lightened/tufridged cam followers to MGB engines with numbers prior to 18V, longer push rods either of the 18V standard type or, TMG10733 (listed here) will be required. When fitting uprated push rods and cam followers you are advised to fit them in engine sets.

MGB

- Tubular push rods (8 required) TMG10733 . . . £12.30
- Lightened/tufridged cam followers (engine set) . . . CAEG579 £59.20
- Lightened/tufridged cam followers (individual) . . . TMG10709 £8.40

GEG269

MISCELLANEOUS GASKETS

For standard gaskets/seals etc... refer to pages 18-27 in the Restoration section.

- MGB (USA 1975 on) single carburettor AJM1211Z £9.80
- MGB GT V8**
- Head gasket standard (each) AJM340 £6.20
- Head gasket set (pre SD1 engines) AJM115 £61.20
- Bottom end gasket set (pre SD1 rope seal) GEG269 £23.20
- Exhaust port single gasket (each) (8 required) AJM692 £1.12
- Exhaust port single gasket (set of 8) TT1836 £6.20
- Exhaust port double gasket set (set of 4) GUG704448MG . . . £3.50

Miscellaneous gaskets - MGB GT V8

- Front crankshaft oil seal (pre SD1 rope seal) 602178A £2.15
- Front crankshaft oil seal (SD1 neoprene seal) ERC7987A £8.50
- Rear crankshaft oil seal (pre SD1 rope seal) 602178A £2.15
- Rear crankshaft oil seal (SD1 neoprene seal) LUF10004 £10.20

SILICONE GASKET SET

These silicone rubber gaskets, which are made from aerospace mechanical grade AMS silicone, are 100% reusable, designed to withstand temperatures up to 200°C, and to last the life of the engine. (Not 18V engines).

- Silicone gasket set 1962-71 (18GA-GG engines) 296-425 £30.00

UPRATED VALVES & VALVE GUIDES

Our high-flow and gas-flow valves, made from EN21/4N stainless steel, are essential to maximise the flow of gases through the head. These valves should be fitted with our bronze alloy valve guides for improved reliability with less friction, especially when running with unleaded petrol.

Rimflow valves are considered to be the best valves on the market. Also produced in EN21/4N steel, they have chromed plated stems to enable them to be installed with iron guides, we recommend bronze guides as these help with heat dissipation. Rimflow valves use single groove collets (AHU1709A).

Choice of valve size will depend upon the torque or high revs required, this must be considered with camshaft and rocker gear choice. Larger valves with suitable modifications can increase power output by up to 8 bhp.

- MGB**
- High-flow large inlet valve (42.9mm) TMG10734 ... **£36.00**
- High-flow standard exhaust valve (34mm) TMG10715 ... **£12.20**
- High-flow large exhaust valve (36.6mm) TMG10735 ... **£36.00**
- Bronze valve guide (set of 8) TMG10719 ... **£78.90**

- MGC**
- Bronze valve guide (set of 12) TMG11719 .. **£107.40**

- MGB GT V8 (gas-flowed standard size valves)**
- Gas-flowed inlet valve (pre-SD1 engines) 602165A **£9.30**
- Gas-flowed exhaust valve (pre-SD1 engines) 602166A **£7.80**

UPRATED VALVE SPRINGS & CAPS

Competition valve springs work well with either a tufrided rocker shaft or high ratio rocker gear, as well as performance camshafts and, depending on specification, are good to 8000rpm, but they must be used with our alloy caps. Half the weight of steel, our lightweight alloy valve caps will help minimise wear on the valve gear and cam.

MGB, MGC, MGB GT V8
For MGB 18V engines fitted with single valve springs alloy valve caps **MUST** be fitted.

- MGB uprated valve spring set fast road TMG10707 ... **£41.10**
- MGB uprated valve spring set sport/race TMG10708 ... **£58.80**
- MGC uprated valve spring set fast road TMG11707 ... **£59.70**
- MGB MGC alloy valve cap (each) TMG10716 **£5.80**

SPORTS EXHAUST SYSTEMS

Tourist Trophy manufacture some of the finest, most durable stainless steel exhaust systems available.

Tourist Trophy polished stainless steel exhaust systems are manufactured using the highest quality materials and workmanship.

These exhausts produce a distinctive 'sporty' exhaust note. Whilst the stainless steel has a mirror polish finish that shines like chrome. These systems provide a fantastic sound and look stunning.

- High quality manufacture
- Durable stainless steel resistant to corrosion
- Attractive polished appearance
- All systems are covered by a 5 year limited warranty.

See page A20 for more information

ROLLER ROCKERS

TMG107481

The roller rocker kit replaces the complete rocker assembly. The advantages of having roller tips are lower friction, less side loading on the valves and the ability to withstand the stresses of high rpm without breaking. Using a higher rocker ratio is ideal for increasing the valve lift and improving torque, best combined with a hi-lift camshaft. The ratio of our roller rockers (1.625:1) means the valves are opened earlier for a longer duration, making breathing far more efficient. If using rockers with a higher ratio it is vital to check the valve springs for coil binding when a high lift camshaft is fitted. Tubular push rods must be used with roller rockers. Unfortunately, we cannot supply our roller rocker kits at this time, however, we can still provide replacement parts should they be required.

MGB

Roller rocker set in-line oil feed (type A head) TMG107481 NCA
 Roller rocker set offset oil feed (type B head) TMG10748 NCA

Replacement parts

Rocker arm TMG107484 NCA
 Adjuster screw TMG107485 NCA
 Locknut rocker adjuster. TMG107483 £5.57

Note: When installing high ratio roller rockers, take great care, checking all aspects of clearance and lift before running the engine. See page 05 in the Restoration section for full technical advice.

UPGRADED ROCKER SHAFTS & FITTINGS

All cars will benefit from a tufrided rocker shaft, particularly tuned cars using higher revs. They are stronger, so will resist wear and prove more reliable. Tufrided rocker shafts must be thoroughly cleaned of the salts used during the hardening process. As with all rocker shafts check the end plugs are in place before fitting.

The friction and side loads on the rockers can be reduced and the location improved by using a steel spacer set instead of the rocker shaft springs.

TMG107822

MGB 1950cc HIGH PERFORMANCE PISTONS

These flat top pistons and piston liners are specifically for MGB 1950cc performance engines. A good quality forged piston is lighter and stronger than a cast piston, which means higher compression ratios and revs are achievable with increased reliability enabling you to get the maximum power advantage for your car.

Liners should be used with all 1950cc pistons to ensure adequate cylinder wall thickness. The liners will require machining to size after they have been fitted to the engine block.

Flat top forged piston and ring set (set of 4) TMG107822 . £1,123.60
 Flat top cast piston and ring set +.040" (set of 4).. TMG107823 . £580.00
 1950cc piston liners (each) TMG107824 . . £32.40

DUPLEX CHAIN KITS & VERNIER TIMING GEARS

It is preferable to change from a single row chain (simplex) to twin row chain (duplex) as the twin chain is less prone to stretching. The cam timing can also be optimized via an adjustable Vernier cam gear, or by using offset cam keys. Please see camshaft manufacturers data for correct timing figures.

MGB

Single row timing chains and gears were fitted as standard to MGB's manufactured after 1971 with 18V type engines. We offer several conversions to upgrade to the more reliable duplex chain.

TMG10728

Type 1. Full duplex and vernier conversion

This kit contains all the components required including crank sprocket, vernier cam gear, upgraded timing chain, tension and locktubs.

Duplex conversion kit TMG10728 . . £140.50

Type 2. Gear and chain kit

Contains crank sprocket, vernier cam gear and the upgraded timing chain.

Vernier camshaft gear. TMG107281 . £142.00
 Vernier cam gear only. TMG10725 . £133.20
 Upgraded timing chain only 2H4905UR . . £38.00

MGB GT V8

Please call your nearest Moss branch for details.

Standard crankshaft gear 90602372A. . . £11.80
 (The more reliable steel gear should replace the standard fibre cam gear in all engines).
 Fibre type camshaft gear 610289A £19.80
 Standard timing chain ERC7929A. . . £29.20

Camshaft steel gear JRS3341 NCA
 (The replacement steel gear is suitable for most road applications, where either standard or hotter camshaft is fitted, it uses the standard timing chain).

Vernier cam gear TT1825. . . . £114.90
 (This camshaft gear uses the standard cam chain, but allows fine adjustment of cam timing to achieve the correct installation angle. It is recommended in preference to offset keys. For use with roller chain kit).

UPDATED CAMSHAFTS

To assist in selecting a suitable camshaft we have prepared tables showing their various characteristics, these will change from engine to engine and with other modifications such as carburettor or valve size. A scatter profile is where the cam timing on No.2 and 3 cylinders has been altered slightly to combat the poor scavenging of the Siamese port design. This will benefit both the tickover and high end performance.

Care must be taken when choosing your camshaft and other components, to ensure you get the best out of them. For the more extreme camshafts you will need a flowed head with bigger valves and the fuelling will have to

be modified to suit, either with SU's or Weber carburettors. If you want to minimise other modifications use a mild camshaft. If you are considering fitting one of our supercharger kits, please contact our Research and Development department at our London branch.

Install settings = when No.1 Inlet valve is fully open ATDC (after top dead centre).

All our camshafts which end in the suffix 'N' are ground from new blanks, eliminating problems resulting from regrinding worn old camshafts, they will only be warranted if assembly lube is used and fitted with new followers.

HARMONIC CRANK BALANCER

A rubber insulated crank dampener dramatically smoothes out engine vibration, significantly reducing engine wear. Many original dampeners are now either delaminated with age or have become unbalanced if chipped or dented. A slightly longer belt might be required for 1975 and later MGB engines with 6" diameter crank pulley.

Harmonic crank balancer (5 1/8" diameter) 433-707.....£231.60

OFFSET CAMSHAFT TIMING KEYS

These keys are required by most performance cams, they must be used in some race classes if vernier gears are not permitted. The kit of three keys with 2°, 4° or 7° offsets, permits a choice of angle of fitment. The individual keys offer angles of offset from 1° through to 9°.

Please see manufacturers data for correct timing figures.

GRILLE ASSEMBLIES

Moss are proud to offer these new British manufactured MGB grilles to brighten up your classic. Made in the UK on our own tooling to exacting standards, these are the finest quality grilles on the market.

Originally fitted to earlier (1962-69) MGB models, the top quality slatted grilles feature a superb chrome finish on a brass shell with bright trim aluminium slats. The plinth is die cast and this grille will also fit later models.

Along with the chrome grille we offer a superior quality 'honeycomb' grille with a black plastic centre as fitted to later models (1972-74). Both grilles are made in the UK by an OE supplier to guarantee the best quality.

WIRE WHEEL TOOLS

The use of a soft-faced hammer is essential if you do not want to damage chrome plated spinners when removing or fitting centre lock wheels. We have a choice of three soft hammers. Extra long spanners are also available, providing much greater leverage for spinners and therefore easier fitting. To help keep your wire wheels looking like new we recommend you use our specialist cleaning kit. We also supply a special lubricant to help keep the splines in good condition.

MM386-120

- Copper and hide hammer C27290 **£33.20**
 - Copper faced hammer 453g (1lb) 386-000..... **£18.20**
 - Copper faced hammer 907g (2lb) 11B5166..... **£28.76**
 - Spoke adjusting spanner MM385-800... **£12.30**
 - Short octagonal spanner AHH5839 **£7.10**
 - Long octagonal spanner..... MM386-120... **£60.10**
 - Long spanner 2-eared..... MM386-125... **£59.20**
 - Wooden wrench 2-eared AHH5839W .. **£21.60**
- (This unique double ended knock-off wrench, made from plywood, slips over the spinner for easy tightening and removal of spinners. Will not work with centre laced wheels).
- Wire wheel cleaning kit GAC4134X ... **£36.50**
 - Spline lubricant copper-eze 50g..... GGL9205X **£4.10**
- (Essential for maintaining the splines and threads of hubs, wheels and spinners).

WIRE WHEEL ESSENTIALS

Creating an air tight seal on a wire wheel can be somewhat difficult, making the use of inner tubes necessary and, to prevent the inner tube chaffing against the spoke nipples, the fitting of a rim band is highly recommended.

- Inner tube for 14" x 155/165 tyres 452-735..... **NCA**
- Inner tube for 14" x 175/185 tyres 452-745..... **£27.30**
- Inner tube for 15" x 155/165 tyres 452-755..... **£19.40**
- Inner tube for 15" x 175/185 tyres 452-765..... **£25.30**
- Rim band for 14" wheels 452-740..... **£17.20**
- Rim band for 15" wheels 452-750..... **£16.90**

WHITE WALL TRIMS

A popular accessory in the past were white wall tyres, unfortunately if you can find them now they tend to be made for the US market and of a much harder compound than European tyres. However, we are able to supply a rubber ring which is sandwiched between the wheel rim and the tyre wall, recreating the look of white wall tyres but allowing the use of quality modern tyres.

- White wall trim for 14" wheels (set of 4) GLZ226WWX4. **£59.60**
- White wall trim for 15" wheels (set of 4) GLZ227WWX4. **£59.60**
- White wall trim wide for 15" wheels (set of 4) GLZ228WWX4 **£59.60**

WIRE WHEEL & TYRE SETS

Wire wheels are synonymous with classic British cars, and a set of new wire wheels really enhances the look of your classic.

Our range of wheel and tyre packages are assembled by the wire wheel specialists, Motor Wheel Services (MWS), and supplied as a set of 4 wheels and tyres ready to fit on your car. Each set is assembled and balanced by their tyre fitting specialists and inflated.

Wheel spinners are not included in the set. MWS wheel spinners can be found on our website in a variety of options. Please visit our website for technical details and contact information for more help on buying wire wheel & tyre packages.

CENTRE LOCK CONVERSION KITS

Convert your conventional steel wheel front and rear hubs to accept splined hubs, enabling the fitting of 'centre lock' alloy or wire wheels. Our kits contain everything you need to convert to centre lock wheels, including full instructions, splined hubs and all the necessary hardware, chrome spinners and a copper hide mallet. Our hub conversion kits do not contain road wheels. Check local regulations for eared spinners.

WIRE WHEELS

An essential part of a British classic sports car's styling was the fitment of wire wheels. Whether fitted as standard or not, a set of chrome wire wheels will not only enhance the appearance of your car, but also the value.

Our wire wheel spokes and nipples are manufactured from stainless steel, with the chrome wire wheel spokes and nipples finished by chroming over the top in keeping with the rest of the wheel. They are available in different specifications; 60 or 72 spokes, and a choice of classic chrome finish, or painted in wheel silver.

Depending on how you are intending to use your car, these wheels are available in standard or uprated specification. Before fitting your tyre choice, please ensure there is adequate clearance between the tyres and wheel arches.

GAC8214X

MINATOR BOLT-ON ALLOY WHEELS

These stunning looking eight spoke, Minator bolt-on alloy wheels are a timeless classic design adding sporty, period charm to your MG. They are manufactured using the latest casting techniques and testing procedures to ensure the highest quality & reliability, available in 14" or 15" to suit all models as detailed. The MGB 15" wheel option looks really good, filling the arch nicely.

Important fitting notes: Standard fitment for MGB's is 14", however 15" wheels are available as an alternative. MGC standard fitment is 15". If fitting our 15" alloy wheels to your MGB you will need to fit lower profile tyres (e.g. 60 or 65 aspect ratio) to maintain the rolling circumference and speedo accuracy. Always have the speedo recalibrated if in doubt. Remember to check your tyres for clearance!

Alloy wheels

- MGB alloy wheel 14" x 5.5", silver (ea.) GAC8204X. **£99.80**

CENTRE LOCK SPINNERS

All our centre lock spinners are made from the highest quality materials and are precision engineered to ensure an accurate fit. We have three styles of spinner to choose from: octagonal, two or three eared.

Two and three eared spinners can be fitted with either a hammer or a spanner, octagonal spinners require a spanner. MGB hubs changed from 12TPI to 8 TPI in approximately 1964. Please check before ordering.

Note: Please check local regulations for eared spinners.

Wheel nuts

Our Minator alloy wheels can be used with standard wheel nuts, but, a thin walled socket may be required to allow clearance against the holes in the wheel. We recommend using our special 'bulge' nuts which feature the correct seating taper, with a smaller shank (3/4") for use with wheel braces. Suitable for MGB & MGC Minator alloy wheels. Other wheel nuts can be found on page A50.

Wheel nut bulge type (each) TMG60720 **£3.10**

GAC8201XP

GAC8201XPP

Replacement hub caps

Minator alloy wheel hub caps are available in two different types to suit different size centre holes in the wheels. For wheels with a 59mm centre hole, the cap is made from spun aluminium and available silver painted or polished.

For wheels with 61mm centre holes the cap is made from plastic and available painted silver or anthracite. If you are replacing a missing hub cap please check the hole in the centre of the wheel before ordering.

- 59mm hub cap metal, silver (each) GAC8201XP. . . **£10.90**

CENTRE LOCK ALLOY WHEELS

Offered as an alternative to wire wheels, these 8 spoke MiniLite replica alloys are an ideal way to add period sporting style to your classic. The wheels are for fitment to splined hubs only, they can be used in conjunction with our centre lock hub conversion kits featured on page A51.

- Alloy wheel 14" x 5.5", silver. GAC8254X ... **£250.00**
- Alloy wheel 15" x 5.5", silver. GAC8255X ... **£250.00**
- Alloy wheel 14" x 5.5", black/polished GAC8256X ... **£239.60**

Please note: All wheels are sold individually unless otherwise stated. If purchasing bolt-on wheels ensure you use the correct wheel nuts for that wheel style.

ROSTYLE WHEEL PAINT KIT

The paint and masking kit contains everything you need to renovate a complete set of 14" MGB wheels, a specially moulded wheel mask, silver and satin black paint and wet and dry paper. Wheels not included.

- 14" Rostyle masking and wheel paint kit GAC7043K ... **£67.00**
- Wheel mask 14". GAC7044X ... **£16.75**
- Wheel paint 300ml (aerosol), silver. CCWP1 **£16.20**
- Wheel paint 300ml (aerosol), satin black. CCSB2 **£16.20**

MGB LE ALLOY WHEELS

These wheels were original equipment for the late MGB LE models. Originally two versions of this wheel were offered, a light grey for UK market and this darker grey for US markets.

They are one of the most distinctive and better looking of the factory wheel options and look great on rubber bumper models. These wheels are 14" x 5", half an inch wider than standard and were factory fitted with 185/70 tyres. A special wheel nut is required which is not interchangeable with other types.

- MGB LE alloy wheel 14 x 5", grey (each) BHH2451 **£135.20**
- Wheel nut, black (each) BHH2269 **£9.70**
- Wheel nut, chrome (each) BHH2269CP **£9.80**
- Wheel badge, black (each) CHA747 **£6.40**
- Wheel badge, red (each) BHH2687 **£7.70**
- Wheel badge clip (each) 160053 **£3.20**

GAC1061X

Cockpit covers

Hot sun, wind and dirt will slowly but surely destroy your interior. Our cockpit cover serves the vital function of protecting your interior without the bulk of a full tonneau or car cover.

Roadster, Cockpit cover GAC1061X . . . £55.20

HEATED WINDSCREENS

These high quality heated screens are the easy way to demist your windscreen - perfect for motorsport applications and these damp mornings. Manufactured to the latest British Standard these laminated windscreens feature a virtually invisible micro-wire element within the screen to effectively demist without impairing vision, it's the type of element used in many modern luxury cars.

Our wiring kit includes relay, fuse, warning lamp & cable to allow for easy installation. Switches supplied separately, choose the one to suit your car.

- Roadster plain glass heated windscreen HZA5415H . . .£336.50
- GT plain glass heated windscreen AHH8228H . . .£332.60
- Wiring kit GAC4025 £37.20

PILKINGTON TRIPLEX WINDSCREENS

Pilkington Classics has acquired the original Triplex tooling and the rights to the Triplex name. We are now pleased to offer the highest quality windscreens available for your MGB. "Original style corners" are the common rounded corners, while "modified style" has slightly recessed corners to minimise breakage.

- Windscreen, clear, original corners, (1962-72). . . . AHH8227OE. . .£418.00
- Windscreen, clear, modified corners, (1972-80) . HZA5415OE. . .£438.70
- Windscreen, tinted, modified corners, (1972-80) . HZA5415TOE .£396.00

CLASSIC HORNS

The distinctive sounding Lucas style windtone horns are superb replicas of the horns fitted to many classic cars including MG T-Types. The high quality Altette style horn is an exact reproduction of the TC original.

Octane Cars

BY OCTANE STAFF AND CONTRIBUTORS

David's MGB gets its skates on

1971 MGB GT
DAVID LILLYWHITE

For the last few weeks my car has been sat on three wheels, initially ignored and then the problem of which tyre to swap. Now it's on 20 wheels to say it handles like a brick. But it's much easier around my packed road. I'll start again with jokes. A flat tyre can pump up me to the tyre, and I found to they date back to 2000. A flat road/track day car haven't used it much lately. I gathered up information, the barn filled up with photographs. Matthew Howells' lovely '62 Beetle joined by publishing director Geoff Lowe's not-so-lovely Morris 1000 Tourer (it's a restoration project for his wife), alongside my own (cough) long term project Saab 96.

The barn is dry, secure and cheap, but it's an awkward shape, and the doorway is roughly 20mm wider than the width of the MGB's extended arches, so manoeuvring cars around, in and out, isn't easy. Hence the B's new skates, two per wheel, the TC type.

So that allowed me to get back in the case, changing the oil, replacing a leaking fuel pipe and re-routing the wiring for the heated front windscreen (a brilliant addition, by the way, bought a while back from Moss Europe).

That just left the tyres to sort out. The MGB sits low, on 6in Mini-style lock wheels, and when you're tight. Right. Orignal pointed out that the previous super sticky Yokohama 185/60s

Below and right: The MGB is easier to move around on its new (castor) wheels. Direct with the heated front screen wiring, its incorporate warning lamp and signal switch.

were probably limiting my trackday fun and my learning, because they're actually too grippy and because the MGB wasn't designed for such wide, low-profile rubber. Both advised that a 185/70 Arcon CR52Z, which was designed specifically for fast road and classic cars, would be a better fit. I went with the extra 18.5mm radius under the wheel arches. They aren't cheap and I was too much of a risk, went with a less sticky but up Wulfsprung. I came on my Impreza 800 miles and they've proved to be quieter than the previous tyres, and remarkably hard-wearing.

I've no idea how they'll feel on the B but once it's now fitted, and the others are jammed into the boot ready to be changed at the MCT station, along with a new track rod end that I ran out of time to fit.

I did take the B for a quick run, initially across the barn on the skates (handling was unpredictable) and then around the local lanes on one new tyre and three old ones.

As ever, it started immediately and was as much fun as ever. It's noisy and scruffy but I love it.

GAC9978X

1B9007/8

- Chrome horn round, 105mm (each) MT9143 £18.90
- Altette horn (each) 165-900 £197.90

SPEEDSTER HARD TONNEAU COVER

Turn your Roadster into a Speedster with this two-piece hard tonneau cover exclusively from Moss! Precision engineered from design through manufacturing and made from high quality ABS plastic, which is superior to fibreglass as it won't crack or break under normal stress. The two-piece design was chosen so the pieces fit easily in the boot. The kit includes the two-piece hard tonneau cover, all mounting brackets, straps and hardware for easy installation. Supplied un-painted. Will not fit with roll bars or wind deflectors.

- Speedster hard tonneau cover 458-325 **NCA**

TONNEAU COVERS

Protect your interior from prying eyes and the harmful effects of the suns rays when parked with the hood down with a quality tonneau cover made to the original specifications. For full details and hood frame/fixings please refer to the Restoration section for your model.

Tonneau Covers are generally stocked in black although there were other factory colours, other colours and special requirements may be available to order, please contact your nearest branch.

- *No seat belt holes.
- Vinyl hood cover (with seat belt holes), black. BHH1050. ... **£263.50**

WHICH HOOD MATERIAL SHOULD I CHOOSE?

The hoods supplied by Moss are made on jigs matching those used by the factory, by staff that have over 100 years experience of hood manufacturing between them. The vinyl we use is from the same supplier that originally supplied the factory, these are the closest you will get to an original hood in terms of quality, fit and appearance. Double duck material is a canvas based material which whilst being durable, is prone to fading in direct sunlight.

We also make hoods in Mohair, a high quality material that gives a fade free

look but can be more difficult to fit as it has less stretch than vinyl based materials. All Mohair and double duck hoods have their windows sewn in, although this is a time consuming and laborious process it is the only reliable way of attaching a window to these materials.

All these listings are for black hoods, other colours are available. For full details and hood frame/fixings please refer to the Restoration section for your model. Special requirements may be available to order, please contact your nearest Moss branch.

Water temperature gauge

- Full face capillary..... LUSIB422..... £95.60

WALNUT VENEER KITS

Made individually by skilled craftsmen, using a combination of traditional coach building methods, with modern laser technology to ensure a perfect fit. Our burr walnut dash kits are designed to fit neatly over the existing dashboard without the removal of the gauges and, because the veneer kits are only 1.5mm thick, they still allow the bezels to protrude, giving a factory fit look.

Burr walnut veneer dashboard kits

- MGB chrome bumper (1962-71), RHD..... WDB101W..... £291.40
- MGB chrome bumper (1962-71), LHD..... WDB101WLHD..... £291.40

SMITHS CLASSIC ELECTRONIC GAUGES

These new Smiths digital speedos and tachos are designed for heritage cars and are the perfect way to bring modern technology into your much loved classic. If your car does not have an electronic speedo output, our speedo sensor kit (GAE1551) will also be required, which senses a magnetic object, such as a bolt head or a nut, moving past the end of the sensor, creating a 'pulse' which is sent to the gauge and then translated. Please note: Suitable for negative earth cars only.

- Gauge, speedo, el., 0-140MPH, black, 100mm ... GAE155 £318.70
- Gauge, speedo, el., 0-240KPH, 100mm GAE157 £318.70
- Gauge, tacho, el., 0-7000rpm, black, 100mm GAE156 £185.80
- Gauge, speedo, electronic, 0-140MPH, 80mm ... GAE165 £337.20
- Gauge, speedo, electronic, 0-240KPH, 80mm ... GAE167 £337.20
- Gauge, tacho, electronic, 0-7000rpm, 80mm GAE166 £174.80
- Sensor, speedo, electronic GAE1551 £76.60

TOURIST TROPHY STEERING WHEELS & BOSSES

Designed to complement your classic, these wheels are handcrafted to high standards. Available with the choice of either a sporty leather rim or a classic riveted wood rim with a variety of spoke designs and finishes; drilled or slotted in either matt alloy or black. The frames are made from high strength aluminium.

SEAT BELT FITTINGS

Mounting bolts

These mounting bolts for the seat belt fixing on the rear deck are as close to the original as possible.

Seat belt mounting bolts (pair) . . .
SBK1001K **£48.00**

MG seat belt shoulder pads

Easily installed, these shoulder pads add both comfort and flair. Sold as a pair.

Seat belt shoulder pads, red MG logo
231-300..... **NCA**

Shoulder belt lock button

After a long time of being unavailable we can now offer again these shoulder seat belt lock buttons. The button locks/releases the shoulder strap to its rear fastening point on 1968-71 cars. Made from nylon, they will last for years to come.

Shoulder belt lock button (each) . .
222-187 **£18.90**

Seat belt guides

These clever guides keep your shoulder strap properly in position, and stop the seat belt from getting tangled. Made of tough but flexible plastic for durability. Installs by removing your headrest and simply sliding on for a friction fit.

Seat belt guides (pair)
222-188 **£36.60**

SEAT BELT & HARNESS KITS

This is our range of Securon replacement seat belts to best suit MGB and MGB GT models. All Securon seat belt products are 'E' approved for road use. We can offer the Securon range of belts in black, red, grey, beige or blue. Below we list just the black and red options; you can find our full range of colours on our website.

Front static seat belt kits

This can be bolted to the existing seat belt bosses on the lower side of the wheel arch, just above the battery cover. The end of the webbing is retained at the sill mounting, and the stalk is fitted to the tunnel. Once positioned the strap can be adjusted for length and fit on the over-shoulder section of the belt.

- Static seat belt 30cm stalk, black SBS300/30..... £33.80
- Static seat belt 30cm stalk, red SBS300/30RED ... £40.70

Front automatic seat belt kits

The reel of this belt can be bolted to the existing seat belt bosses on the lower side of the wheel arch, just above the battery cover. The end of the webbing is retained at the sill mounting, and the stalk is fitted to the tunnel. Once positioned the special adjuster mechanism can be set to allow correct operation of the inertia reel mechanism.

- Auto/adjustable seat belt 30cm stalk, black... SBS514/30..... £60.80
- Auto/adjustable seat belt 30cm stalk, red SBS514/30RED ... £60.80

Rear static seat belt kits

The lap belt fastens to 2 mounting points, one either side of the seat, and provides lap restraint only.

- Static seat belt 2 point, black SBS210 £23.50
- Static seat belt 2 point, red SBS210RED £34.50

Seat belt extender

This can be used to safely extend the seat belt if required. It should only be bolted to the sill mounting position 'E' approved for road use.

- Seat belt extender, red SBS227 £21.80

Harness kits for road use - 'E' approved

These belts feature 2" webbing with bolt through plate mountings (use with bolts TT7969). Fully adjustable lap and shoulder straps with compact buckle catch. 'E' approved for road use.

This period style seat belt features a chrome catch and fittings. Note: Not 'E' marked, requires plates TT7968 and bolt spacer kit TT7969).

Period style seat belt AKF1646B NCA

VINTAGE COMPETITION LAP BELT

The ultimate sporting accessory, ideal for early MG classics, it features a quick release buckle and includes fittings. This belt is not type approved therefore should only be used in cars that pre-date seat belt regulations.

Vintage competition lap belt (each) MM222-211 NCA

PERTRONIX ELECTRONIC IGNITION

These self contained electronic ignition units offer a simple alternative to traditional points and condenser arrangement.

Designed to fit entirely within the distributor cap, they are easy to install with no external control boxes to mount and only two wires to connect. No permanent modifications are involved. The unit uses a sealed Hall Effect sensor that is impervious to dirt, dust, moisture, or vibration and retains standard advance curve. Unaffected by distributor shaft wear, maintains firing accuracy to within 1/4°, reduces spark scatter over the full rpm range. One year warranty.

See page A24 for more information

MGB ELECTRIC KITS

These kits have proved successful in ensuring MGB's will be classics well into the 21st century.

ELECTRIC WINDOW KIT

Designed to replace the original window lift mechanism with minimum of effort. Kits include two lift systems (with high quality Bosch motors), wiring, switches, plinth, fittings and instructions.

MGB electric window kit (1968 on) WPA4000X ..£286.70

KEYLESS ENTRY KIT

Lock and unlock at the press of a button when used with our central locking kit. Also immobilises the starter motor when the car is locked and ignition is off.

MGB keyless entry kit WPA4002X ..£132.50

CENTRAL DOOR LOCKING KIT

Central locking for the MGB is a useful addition from the 21st century. Can be used with our keyless entry kit for remote central locking.

MGB central door locking kit WPA4003X ..£119.60
(Kit includes: 2 motors, relay, linkages, wiring and full instructions).

HAZARD WARNING LIGHT KIT

If your classic pre-dates the fitting of hazard lights as standard, you can now be that little bit safer with our easy to install hazard warning light kit that includes all fittings. (This warning light kit is suitable for models with standard negative earth system).

Hazard warning light kit (negative earth) GSS159 £37.10

UPDATED HEATER ASSEMBLY

Now there's no excuse to have the top up when the sun goes down. Our updated heater includes a copper and aluminium element with strong heat transfer capabilities and is rated at 1Kw output with a high power motor and 2 speed fan. Please Note: An air control flap and box (Part Number 17H2286) will also be required.

Updated heater unit BHH1865X ..£509.00
Air control flap 17H2286 £51.40

SMARTSCREEN WASH/WIPER SYSTEM

These SmartScreen wiper kits allow intermittent wiper delay of between three and thirty seconds, programmed by using your existing wiper switch. SmartScreen wash/wiper kit allows you to have an automatic wiper system when using your electric screen-wash. All kits are easy to fit and come with full instructions.

SmartScreen wiper system

Positive earth (to 1967) GAC9222X ... £31.80

PRO START PUSH BUTTON

Add that race car feel to starting your classic with the pro start push button starter switch. Easy to fit with no cutting of wires required. The LED type illuminates green with the ignition on and goes out when the engine is running.

Pro start push button GAC0060 **£39.80**

PADDY HOPKIRK PEDAL

The Paddy Hopkirk pedal (extension) is specifically designed to help heel and toe gear changing. Installation will require hand tools. (Not suitable for floor mounted pedals).

Paddy Hopkirk pedal extension 900-315 **NCA**

MANIFOLD HEAT INSULATION

Excessive heat build up in the engine bay can cause premature failure of components, and leads to poor engine running due to reduced inlet air density. Excess heat in the engine bay can also cause fuel cavitation. Wrapping a tubular manifold will keep engine bay heat to a minimum, reducing temperatures by up to 70%. Thermo-Tec is made from Silica based yarns capable of withstanding up to 1000°C. As a guide a 2" x 50' roll will cover approx. 13 ft of 2" pipe. Supplied in various sizes, see right for details.

Roll size (w x l)	Natural		
1" x 15' roll	GAC150	£16.90	GAC151 £19.70
2" x 15' roll	GAC152	£27.80	GAC153 £30.60
1" x 50' roll	GAC154	£54.40	GAC155 £54.50
2" x 50' roll	GAC156	£83.30	GAC157 £96.00

Manifold blanket and starter motor cover

Using a manifold blanket provides excellent heat retention for exhaust manifolds and can be easily installed to both cast iron and tubular manifold.

Manifold blanket 4-6 cylinder	GAC182	£140.10
Manifold blanket V8 2 piece	GAC183	£148.80
Starter motor cover with straps	GAC181	£50.00

Snap Straps

Use Snap Straps to hold the wrap or blanket in position.

Snap Strap kit 8 x 9" and 4 x 18" lengths	GAC172	£45.30
Snap Strap kit 6 x 9" and 4 x 18" lengths	GAC173	£39.20
Snap Strap kit 12 x 9" lengths	GAC174	£42.20
Snap Strap kit 6 x 18" lengths	GAC175	£27.80
Snap Strap kit 4 x 14" lengths	GAC176	£15.10

BILLET PEDAL COVER SET

Machined from billet aluminium these covers feature grooves for traction and a smart MG logo. Drilling is required as these custom fit covers are bolted to the original pedals to ensure they stay put no matter how hard you drive.

Pedal cover set 3 piece chrome bumper (1968 on) 190-780 **£87.30**
(Includes: clutch, brake and accelerator pedal covers).

Pedal cover set 3 piece rubber bumper (1974 on) 190-785 **£88.40**
(Includes: clutch, brake and accelerator pedal covers).

Pedal cover set 2 piece all models (1962 on) 190-790 **£54.10**
(Includes: clutch and brake pedal covers only).

HEAT & SOUND INSULATION

Insulate against heat and sound deaden bulkheads and under bonnet areas. Both materials can be easily cut to shape and fixed using contact trim adhesive.

Dynamat hoodliner

Made from 3/4" urethane foam with a water and oil resistant foil face that reflects 97% of radiant heat while providing sound insulation and preventing heat damage to paintwork. The hoodliner 'sound soaker' foam absorbs engine noise giving a quieter environment in your car.

Foil heatshield

This foil covered heat and sound deadening material can be installed under carpets, over the transmission tunnel, against bulkheads, etc. Insulates against hot and cold, deadens noise and provides protection against fire. The insulation material is lightweight, has a layer of foil on both sides and will not absorb moisture.

Dynamat hoodliner 813mm x 1.37m (32" x 54") GAC90541. **£94.00**

Foil heatshield insulation 1.21m x 1.82m (48" x 72") .. 409-016 **£35.90**

Bitumen type sound deadening pad self adhesive CHM228 **£7.80**

High temperature adhesive aerosol 400ml GAC9908X **£12.70**

Standard adhesive aerosol 400ml UBS203 **£9.00**

EXHAUST HEAT INSULATION

Exhaust heat shield can be used on the underside of the floors where the exhaust runs close to the floor particularly above silencers and catalytic converters. It effectively reflects 90% of the radiant heat from exhausts and can withstand temperatures up to 1000°C. The general purpose material can be used to cover bulkheads and floors to keep general heat transfer to the cockpit to a minimum. It can also be used to cover components in the engine bay to prevent heat damage.

Exhaust heat shield 40" x 24" GAC184 .. **£110.80**

General heat shield 1m x 1m GAC185 .. **£101.40**

SEAT COVER KITS & ASSEMBLIES

Our trimmers have created a range of seat covers and fully assembled seats that are a unique combination of concours detailing, flute placement and correct stitching that makes our seat covers & assemblies excellent quality and good value for money.

The range faithfully replicates the original production colours with contrasting piping as required. We also offer our Custom Deluxe range of interior trim for those looking to personalise their MGB in a wide range of colours, see pages A80-81 for details. Please contact us for a free material sample swatch.

Seat covers colour swatch

Note: We make every effort to match colours as closely as possible. However, older trim materials discolour over time and we cannot guarantee matching existing or other manufacturer's colours. If you are replacing a complete interior please order all kits at the same time for an 'as close as possible' colour match.

MGB ORIGINAL TRIM COLOUR OPTIONS

Colour options - Roadster & GT (1962-69)

Between 1962 and 1969 MGB seats were available in the following colours, with leather as an optional extra. Trim kits were manufactured in vinyl and colour matched to seats.

Year	Colour	Piping alternatives
1962-68	Black	Red, White, Blue
	Red	Black, White
	Blue	Blue
1969	Black	Black
	Mushroom*	Mushroom*

*Note: Mushroom was a very rare colour option and is no longer available.

Colour options - Roadster and GT (1970-76)

From 1970 to 1976 the MGB's interior trim was changed. Leather was discontinued as an option and seats were supplied in Basket Weave vinyl or nylon cloth depending on year, see seat details. The standard colour was black, with options of: Autumn Leaf, Navy Blue and Ochre. The colour options used from 1970-76 were:

Year	Standard	1st option	2nd option
1970	Black	Autumn Leaf (late '70)	
1971	Black	Autumn Leaf	
1972	Black	Navy blue	Autumn Leaf
1973	Black	Navy blue	Ochre
1974-76	Black	Ochre	

Colour options - Roadster and GT (1976-80)

1976 saw a split in trim styles between RHD and LHD markets. All RHD cars were produced with black trim panels with 'Deck Chair' seat covers. LHD cars were produced with matching colour seats & trim.

Year	1st option	2nd option
1976-80	Silver/Grey	Brown/Orange
1976-78 LHD	Black	Autumn Leaf
1978-80 LHD	Black	Beige

641-210

Type 1: Roadster (1962-68) and GT (1965-68) front seat covers and assemblies

For these early cars we are able to offer a choice of complete seat assemblies or seat cover kits. The complete seat assemblies are supplied in pairs and trimmed on new frames with leather seating faces and vinyl non-seating faces, they also include new diaphragms, back boards and foams. Runners are not included. Seat cover kits are available with either leather seating faces or all vinyl and include covers for a pair of seats. Foams, diaphragms and other fittings are all sold separately.

	Leather seat assemblies (pair)	Leather seat cover kits (pair)	Vinyl seat covers (pair)

641-311

Type 2: Roadster and GT (1969) front seat cover kits

This style of seats was fitted for one year only, and is of a reclining design with leather facings. Nearly all cars were trimmed in black, but a few vehicles were manufactured with a mushroom coloured interior, this colour option is no longer available. We offer a range of alternative colours to special order, please see website for full details. The same seats were used in Roadster & GT models. Cover sets are available with either leather or vinyl seating faces and are also available for USA spec cars with 2 pole head rests. Please see website for details.

Seat cover kit - leather, black/black piping	641-311	£657.30
Seat cover kit - leather, black/black piping, with headrest covers (US Spec)	641-310	£657.30
Seat cover kit - vinyl, black/black piping	641-241	£437.00
Seat cover kit - vinyl, black/black piping, with headrest covers (US Spec)	641-240	£437.00

Type 3: Roadster (1970-72) and GT 1970 front seat cover kits

In 1970 the interior trim was revamped by MG, which had by now become part of British Leyland, using vinyl trim throughout for both Roadster and GT models. The reclining seats have fluted centre panels embossed with a basket weave design. The outer panels were of plain vinyl. During this period the colour range was expanded with the addition of autumn leaf, navy blue and ochre. Basket weave material is becoming unavailable in certain colours, we offer a range of alternative seat covers to suit these models. Please see pages A80-81 for details.

Seat cover kit - vinyl, autumn leaf	641-552	£328.70
Seat cover kit - vinyl, black	641-522	£328.70
Seat cover kit - vinyl, navy	641-532	NCA
Seat cover kit - vinyl, ochre	641-542	NCA

641-522

Type 4: GT (1971-72) front seat cover kits

This seat was unique to the MGB GT, and was introduced at the same time as the advent of the 'plasticrome' mouldings on the door trim panels. The seat covers had outer panels of vinyl, with fluted centre panels of brushed nylon.

Seat cover kit - vinyl/fabric, autumn leaf	636-162	£315.80
Seat cover kit - vinyl/fabric, black	636-152	£315.80
Seat cover kit - vinyl/fabric, navy	636-182	£315.80
Seat cover kit - vinyl/fabric, ochre	636-172	NCA

Note: For our range of alternative Custom Deluxe seat cover kits to suit these seats please see pages A80-81.

636-172

Type 5: Roadster (1973-76) front seat cover kits

This style of seat is vinyl faced and was fitted to the Roadster models only. It has embossed centre panels, with heat welded stitching across both these and the outer panels.

Seat cover kit - vinyl, autumn leaf	641-592	£355.10
Seat cover kit - vinyl, black	641-562	£355.10
Seat cover kit - vinyl, navy	641-572	NCA
Seat cover kit - vinyl, ochre	641-582	NCA

Note: For our range of alternative Custom Deluxe seat cover kits to suit these seats please see pages A80-81.

641-562

Type 6: MGB GT (1973-76) front seat cover kits

This style corresponds to the type 5 Roadster seat, but has a facing panel of brushed nylon material with double stitching across the centre and outer panels. The options of navy blue, and ochre, were discontinued in 1974, although they can be used to trim later seats if the colour is preferred.

Seat cover kit - fabric, autumn leaf	641-687	£342.10
Seat cover kit - fabric, black	641-682	£342.10
Seat cover kit - fabric, navy	641-617	£342.10
Seat cover kit - fabric, ochre	641-622	NCA

Note: For our range of alternative Custom Deluxe seat cover kits to suit these seats please see pages A80-81.

641-622

Type 7 Roadster and GT (1976-80) RHD front seat cover kits

When the interior was changed to include door panels with large circular markings following the sweep of the window winder handle, the last style of seat cover with multi-coloured facings was introduced. These cars were affectionately known as deck chair models, the seats being supplied in either silver/grey or orange/brown combinations. The same seats were fitted to both Roadster and GT models. The original 'deck chair' material is no longer available.

Seat cover kit - fabric, orange & brown	636-175	NCA
Seat cover kit - fabric, silver & grey	636-185	NCA

Note: For our range of alternative Custom Deluxe seat cover kits to suit these seats please see pages A80-81.

636-185

Type 8 Roadster and GT (1976-80) LHD front seat cover kits

When the MGB interior for the UK market was updated, the USA market was given a new design of vinyl embossed facings with cross stitching across the whole face of the seat.

Seat cover kit - vinyl, autumn leaf	641-632	£342.10
Seat cover kit - vinyl, beige	641-527	NCA
Seat cover kit - vinyl, black	641-602	£342.10

Note: For our range of alternative Custom Deluxe seat cover kits to suit these seats please see pages A80-81.

641-527

MGB GT (1976 on)

Corresponds to front seat: Type 7.

Seat cover kit - fabric, orange & brown	636-177 NCA
Seat cover kit - fabric, silver & grey	636-187 NCA

HEAD RESTRAINTS

Three different shapes of head restraint were fitted to MGB's:

- 1969, two tube fixing (USA models) - this is no longer available.
- 1970-76, 'D' section.
- 1977 on, 'Oval' section.

The 'D' and 'Oval' section headrests are interchangeable.

(1969-70) USA models

2 pole fitting - black leather (1969 USA)	AHH9679 NCA
'D' section - embossed centre black vinyl (1970 USA)	KGA310 £89.50
'D' section - embossed centre autumn leaf vinyl (1970 USA)	KGK301 NCA

(1970-76) fitted with 'D' section headrests

'D' section headrests have been remanufactured as a cover and foam, originally they were a one piece moulding.

D section, plain centre black vinyl	GLZ135Z	...£102.00
D section, plain centre black leather	GLZ135L	...£151.30
D section, plain centre autumn leaf vinyl	GLZ133	...£102.00

Oval section, embossed autumn leaf vinyl (USA)	X2K7875 £77.60
Oval section, embossed beige vinyl (USA)	X4X7875AK	£103.60

Headrest stem fittings

These parts are fitted around the hole in the seat back trim where the headrest stem protrudes through.

Eyelet & washer set	CZA4500S £4.00
Finishing washer	CZA4263 £1.30
Blanking plug - black	BD36610A £1.60

SEAT FOAMS & DIAPHRAGMS

There is sometimes confusion concerning cushions and squabs. We refer to the cushion as the part you sit on and the squab as the back rest foam. We strongly recommend that if you are retrimming your seats with one of our seat cover kits you should use new foams and diaphragms. This will give the seat more comfort and a better shape.

Type A: to fit seat type 1 MGB (1962-68)

Seat foam set, RH seat foams only (1 required)	AHH7037C	£63.40
Seat foam set, LH seat foams only (1 required)	AHH7038C	£63.40
Foam cushion, RH (1 required)	AHH7037	£28.70
Foam cushion, LH (1 required)	AHH7038	£28.70
Foam squab (2 required)	AHH7036	£49.00
Seat backing stiffener (2 required)	SBB3001	£9.30
Cushion diaphragm (2 required)	AHA7878	£15.70

Type B: to fit seat type 2 MGB (1969)

Foam cushion, RH (1 required)	AHH9970	£28.30
Foam cushion, LH (1 required)	AHH9971	£28.30
Foam squab (2 required)	AHH9681	£47.20
Seat backing stiffener (2 required)	SBB3002	£9.30
Cushion diaphragm (2 required)	AHA7878	£15.70

Type C: to fit seat types 3 and 4 MGB (1970-73)

Seat foam set, RH foams only (1 required)	AHH9970C	£48.90
Seat foam set, LH foams only (1 required)	AHH9971C	£48.90
Foam cushion, RH (1 required)	AHH9970	£28.30
Foam cushion, LH (1 required)	AHH9971	£28.30
Foam squab (2 required)	AHH9969	£28.90
Seat backing stiffener (2 required)	SBB3003	£9.30
Cushion webbing (2 required)	BHH580	£24.70

Type D: to fit seat types 5, 6, 7 and 8 MGB (1973-80)

Seat foam set, RH foams only (1 required)	BHH922C	£56.70
Seat foam set, LH foams only (1 required)	BHH923C	£56.70
Foam cushion, RH (1 required)	BHH922	£29.60
Foam cushion, LH (1 required)	BHH923	£29.60
Foam squab (2 required)	BHH1398	£41.70
Seat backing stiffener (2 required)	SBB3003	£9.30
Cushion webbing (2 required)	BHH580	£24.70

Type E: to fit GT rear seats

Seat foam set, rear (1965-69)	AHH9682C	£100.00
Seat foam set, rear (1970 on)	BHH921C	£65.00

INTERIOR TRIM KITS

As with our seat cover kits our trimmers have created a range of trim kits that feature concours detailing, accurate stitched piping and correct welded patterns as original. The range faithfully replicates the original production colours with contrasting piping as required with the vinyl carefully trimmed onto accurate die cut boards. We also offer our Custom Deluxe range of interior trim for those looking to personalise their MGB in a wide range of colours, see pages A80-81 for details. Please contact us for a free material sample swatch.

Note: In 1974 re-designed door boards and seals were introduced for both Roadster and GT models. The size of the door board was reduced and the seal section was enlarged to allow the seal to act directly on to the door frame, this reduced both wind noise and water ingress. The only seal available is the later 'larger' section type, therefore, we produce all 1970-On door panels to the later specification.

Roadster trim kits contents

- 1 pair door panels
- 1 pair front kick panels
- 1 pair rear quarter panels

- 1 rear bulkhead panel
- 1 radio console panel (behind)
- Material to re-cover door top cappings and rear cockpit finisher

GT trim kit contents

- 1 pair door panels
- 1 pair front kick panels
- 1 pair rear quarter panels
- 1 pair tailgate panels

- 1 radio console panel (behind)
- Material to re-cover door top cappings and rear quarter light cappings

643-310

Interior trim kits - Roadster (1962-65)

These kits are vinyl covered with a main colour of black or red with contrasting piping. This kit has a door panel suitable for use with the pull type exterior handle and has the cut-out for the interior door lock. No extra material is supplied with this kit for the door cappings.

Trim kit - black/black piping.....	643-280.....	£414.00

643-390

Interior trim kits - Roadster and GTs (1965-68)

These kits again are vinyl covered in red or black with contrasting piping. This style is suitable for doors with the push button exterior handle. Roadsters have a single line of contrasting piping, whereas GTs have a double line of piping. These trim kits are not suitable flush fitting interior handles.

643-635

Interior trim kits - Roadster and GT (1970-71)

This style was fitted for approximately only one year in an attempt to upgrade the interior, it is identified by flutings along the bottom. The only colour available is black.

	Roadster	GT
Trim kit, black.....	643-635.. £276.30	643-635.... £276.30

643-660

Interior trim kits - Roadster and GT (1971-76)

As a development of the previous style the, 1971 update involved the introduction of 'plastichrome' mouldings along the door panel. The update included the introduction of a new colour range of Black, Navy blue, Ochre and Autumn Leaf.

	Roadster	GT
Trim kit - autumn leaf	643-660. £276.30	643-660... £276.30

Trim kit - ochre	643-650....NCA	643-650.....NCA

Interior trim kits - Roadster and GT (1976-80)

In 1976, the MGB's trim went through its final development. A different heat formed design was introduced. The style is easily distinguished by the circular pattern outlining the sweep of the window winder handle.

Black was the only colour available to the UK, whereas the USA market also had the choice of autumn leaf and then latterly, beige. These kits can be interchanged with the black UK kit if so desired. The door panels have the markings for speaker holes stamped in them, though the backing board is left intact for those owners who do not wish to fit speakers.

DOOR CAPPINGS & WAIST RAIL FINISHERS

Door cappings - Roadster and GT

Our door cappings are made to original specifications. Where applicable the wood bases come with helicoil thread insert, inner door glass weather strip and matching piping. From 1970 the door cappings were padded. All door cappings and waist rails are sold in pairs.

DASHBOARDS & DASH TOPS

Reconditioned metal dashboards

If you are restoring the interior of your MG why not invest in one of our reconditioned dashboards to finish it off? Our reconditioned dashboards are repainted with the correct wrinkle finish paint and are offered on an exchange basis, subject to availability. The pricing is based on repainting a standard dashboard, any extra holes that need filling or repairing are at an extra charge. Speak to a member of our staff for full details.

- Reconditioned dashboard, RHD (1962-66) HZA452E . . . **£110.00**

AKE5155

Dash top repairs

This area of the car can also suffer greatly from the effects of exposure to the elements, the vinyl can become brittle, leading to unsightly cracks. For MGB and GT models we can offer new trimmed crash rail and scuttle liner material to spruce up that tired dash area. The crash rail is supplied fully trimmed and the recovering kit contains:

- Crash rail and scuttle kit AKE5155 . . . **£97.20**
(Includes fully trimmed crash rail and vinyl material to retrim the scuttle).
- Dash top recovering kit, black vinyl AHH7597X . . . **£27.80**
(Includes vinyl material and piping to retrim crash rail and scuttle).

643-902

643-903

GT 'C' post trims

These C post trims are available in grey or grey and black. The split colour was introduced on 1976 although the panels are interchangeable if desired.

- C post finisher (pair) (to 1976), grey..... 643-902..... £72.30
- C post finisher (pair) (1976 on), grey/black 643-903..... £72.30

643-900

GT HEADLINING & POST TRIMS

Headlining kit

This complete headlining kit contains all the trim parts required to refurbish a GT's headlining.

The kit contains pre-cut vinyl or fabric pieces (depending on kit) for the main roof area and cant rails, and a foam backing for the main roof panel. Trimmed fibreglass tailgate hinge cover, trimmed fibreboard windscreen pillar and C post trims. The C post trims supplied in this kit are trimmed in a single colour material.

- Headlining kit, grey vinyl 643-900..... £491.70
- Headlining kit, deluxe grey fabric 643-915..... NCA
- Headlining kit, deluxe tan fabric..... 643-905..... £360.60

Headlining material kit

Our headlining material kit contains pre-cut pieces to retrim the headlining of your car. It includes a foam backed material for the main section, all other pieces are supplied loose to be fitted to existing backing panels. Includes aerosol of trim adhesive.

- Headlining material kit RLK102 £125.60

389-110

XGA2917W0

MAP POCKETS

These very useful map pockets fit neatly to the outer sidewall of the passenger's footwell. **Note: The pockets do not have the chrome (top) finisher.** These were fitted as standard on GT models but can be fitted to Roadsters and also on drivers side if desired.

- Footwell map pocket, black XGA2917W0. £40.30
- Footwell map pocket, red XGR2917W0... NCA
- Footwell map pocket, autumn leaf XGK2917W0. £40.30
- Footwell map pocket, navy blue..... XGN2917W0 £40.30
- Footwell map pocket, ochre XGT2917W0... NCA
- Finisher AHH8117 NCA
- Screw (2 required)..... AD606071 £0.41
- Cup washer (2 required) FWP906 £0.34

Made of black ABS plastic (just like the centre console) our map pockets are far more durable than the fibreboard the factory used. The new design is more functional than the original and can be screwed either into the kick panel or the door. This storage solution can be painted or covered in carpet or vinyl to match your interior panels.

- Map pocket, LH 389-105..... £40.20
- Map pocket, RH 389-110..... £40.20

CARPET SETS

Premium carpet kits

Our premium range of carpet kits are manufactured to exacting standard from high quality carpet to give a perfect fit & finish to your MGB's interior. They are easier to install as the gearbox tunnel carpet is moulded with a flexible felt backing, contouring the gearbox tunnel perfectly. All sections of the carpet are die cut for accuracy and where required are felt backed to maintain shape and help reduce cockpit noise. Where required carpets are bound with a stitched vinyl edging which gives a smart finish to footwell and floor carpets.

Standard carpet kits

Our standard carpet kits are manufactured from good quality carpet but do not have a moulded gearbox tunnel section. All carpet pieces are supplied flat without underfelt backing, edges are bound with braiding (where originally bound). Kits also include separate pieces of underfelt to go under the gearbox tunnel and footwell carpets. These carpet kits require more trimming, particularly around the tunnel, but give a nearer original look.

All our carpet kits have full carpeting for all areas of the car including floors and sills, which were originally covered by rubber mats. The sets do not include the moulded rubber starter motor cover, these are available separately. They are manufactured by skilled trimmers cut and sew our carpet kits using precise templates and patterns to ensure that the components accurately fit car.

Carpet sets colour swatch

Note: We make every effort to match colours as closely as possible. However, older trim materials discolour over time and we cannot guarantee matching existing or other manufacturer's colours. If you are replacing a complete interior please order all kits at the same time for an 'as close as possible' colour match. Material swatches available on request.

BOOT TRIM

244-250

We offer a range of carpet kits and spare wheel covers to tidy, protect or upgrade the boot area of Roadster & GT models.

Roadster boot carpet sets and trim

Our Roadster moulded 5 piece kits follow the shape, and details, of the boot area with pre-formed carpet sections that give a neat appearance. These pre-formed sections offer easy installation. All our moulded kits include main floor, wheel arch/wing pockets, bulkhead section & carpet spare wheel cover.

CUSTOM DELUXE INTERIOR TRIM

As many owners of later MGBs often want to personalise the appearance of their interiors, we offer our Custom Deluxe interior trim range. These high quality seat cover kits and trim panel kits can be used with the appropriate colour carpet kits (see page A78) to enhance the interior of your MGB.

Seat cover kits

Our Custom Deluxe seat cover kits feature a vertical, stitched pleating design on padded leather seat faces giving a feel of true luxury, with the sides and back panels made from our high quality vinyl.

These seat cover kits are manufactured to exacting standards to give stylish alternative to original seat designs. Front seat kits include covers for both front seats including headrest covers to suit either 'D' or Oval headrests.

Rear seat kits include squab and base covers with fittings.

Note: These seat covers are designed to fit our Type D seat foams (see page A71), which fit all 1970-on reclining seat frames. Therefore, owners looking to upgrade 1970-73 seats must change the foams too.

DYNAMAT HEAT & SOUND INSULATION

We now stock Dynamat, a revolutionary range of products designed to keep your classic cool and quiet.

- Non absorbent materials
- Self adhesive 'peel & stick'
- Easily cut & moulded to fit

Dynamat Xtreme

A highly efficient, composite material designed to reduce noise, vibration & heat soak through panel work.

- Dynamat Xtreme, speaker pack GAC90511... £16.80
(2 sheets of 254mm x 254mm (10" x 10").
- Dynamat Xtreme, wedge pack GAC90512... £33.00
(1 sheet of 457mm x 812mm (18" x 32").
- Dynamat Xtreme, door pack GAC90513... £90.00
(4 sheets of 305mm x 914mm (12" x 36").
- Dynamat Xtreme, bulk pack..... GAC90514... £219.60
(9 sheets of 457mm x 812mm (18" x 32").

Dynaliner

Dynaliner is an ultra-light weight, durable single layer insulation material that can be used as an alternative to traditional underfelt. It provides acoustic isolation and excellent thermal insulation.

- Dynaliner, 1/8" thick GAC90531... £69.20
(1 sheet of 813mm x 1372mm (32" x 54").
- Dynaliner, 1/4" thick GAC90532... £99.00
(1 sheet of 813mm x 1372mm (32" x 54").
- Dynaliner, 1/2" thick GAC90534... £124.00
(1 sheet of 813mm x 1372mm (32" x 54").

Hoodliner

Designed specifically for under bonnet insulation, Hoodliner absorbs engine noise to help keep your car quieter. The aluminised skin creates a water & oil barrier that reflects up to 97% of heat to protect the bonnet's paint.

- Hoodliner GAC90541... £94.00
(1 sheet of 813mm x 1372mm (32" x 54").

Carpet fixings and adhesives

Use these fixings to hold down sections of carpet that you may need to remove, such as footwell, under seat and boot floor.

- Carpet fixing set, 15 pieces 2H8445SP £8.10
- Trim adhesive, aerosol 400m UBS203..... £9.00
- Trim adhesive, 0.5 lt..... UBS110..... £25.90

Sound deadening felt kit

Our underfelt kit provides pre-cut pieces of felt to fit beneath the carpet to prevent noise.

- Underfelt kit 242-005..... £163.20

BMH9500

Sound deadening pad kit

These bitumen type material panels are pre cut to fit MGB floor panels preventing 'drumming'. Originally factory fitted these are often missed when floors are replaced.

- Sound deadening kit, bitumen BMH9500 £99.96
- Sound deadening pad, bitumen (300 x 190mm) .. CHM228 £7.80

QUICK-LIFT BATTERY COVER

Get easy access to the MGB's battery with this Quick-lift battery cover, no tools necessary! Made in the USA with stainless steel quarter fasteners, this cover is both handy and high quality. E-coated with a gloss black finish, this cover replaces your existing battery cover.

- Quick-lift battery cover 456-277..... £72.40

DOOR TREADPLATES

Protect sill paint from scratches and add a finishing touch of class to your MG. Our highly polished stainless steel door step threshold plates can be fitted by screws, rivets, glue, or double sided tape. Fittings not included.

Stainless steel treadplates

- 1 MGB with MGB logo (pair) AKP002 £33.10
- 2 MGC with MGC logo (pair) AKP005 £25.70
- 3 MGB MGC V8 with MG laurel (pair) GAC4032..... £26.60
- MGB MGC V8 with Safety Fast logo (pair) ... GAC4032SF .. £29.20

Aluminium treadplates

- 4 MGB ribbed OE style (each) AHH9887 £14.90
- Rivet (12 required) GHF400 £0.22
- Screw stainless steel (12 required) AB606061SS ... £0.56

RETROMOD SPEAKERS BY RETRO SOUND

The RetroMod range of speakers from RetroSound has been designed to compliment their range of Classic radios and have been manufactured to meet the demands of modern high performance amplifiers.

Dual voice coils (DVC) speakers

This system allows for 2 stereo channels (left & right) to be connected to the same single speaker. This means that originality can be maintained on cars where a single speaker was fitted in the centre of the dash or rear shelf. These speakers are supplied individually without mesh grilles, to fit existing mountings.

- 6.5" dia 3 way, DVC, no grilles (each) 230-505 **£58.40**
- 5" x 7" 3 way, DVC, no grilles (each) 230-545 **£64.20**
- 6" x 9" 3 way, DVC, no grilles (each) 230-510 **NCA**

Single voice coils (SVC) speakers

The SVC range of speakers is a standard configuration single channel speaker for normal installations (left & right mounted speakers, such as doors or dash). These speakers are available in a range of sizes and specifications, see our website.

- 4.5" dia 2 way, 40W max, with grilles (pair) 230-535 **£84.20**
- 5" x 7" 3 way, 60W max, with grilles (pair) 230-540 **£86.50**
- 6" x 9" 3 way, 100W max, with grilles (pair) 230-530 **NCA**
- 6" x 9" 3 way, 100W max, with grilles (pair) 230-531 **£124.10**
- Surface mount, 4" 2 way (pair) 230-565 **£50.00**
- Speaker pods, 4" x 6" (pair) 230-570 **£134.20**
- Speaker pods, 6.5" (pair) 230-575 **£181.30**

RetroMod 8" Subwoofer

The compact design and powerful bass response make this ideal for under seat mounting and numerous other in-car applications. The rigid die cast aluminium chassis and powerful Class D amplifier allows this sub to reproduce low frequencies down to 35Hz.

- 8" Subwoofer with internal amplifier 230-550 **£195.30**

MGB Restoration Parts

A series of horizontal dashed lines for writing notes.

General Information

This section will give you further information and specific details on tuning theories and rules for the MGB, C and V8 models.

Suspension Characteristics

Modifications to the suspension are aimed at improving handling and road holding. The primary way of changing these characteristics is to alter the car's tendency to over steer or under steer. The latter two terms are defined thus:

1. Under Steer

The car still tends towards the straight ahead, even after the front wheels have been turned into a bend; the slip angle of the front wheels is less than that of the rear wheels.

2. Over Steer

When the car is steered into a bend, the rear end of the car will increase the turn in angle by tending towards the outside of the bend; the slip angle of the rear wheels is therefore greater than that of the front wheels.

There are many reasons for these two situations and hopefully as many ways of changing them. The aim, certainly on a road car, is to produce a neutral chassis, which is easy to drive quickly and safely.

Front Coil Springs

Effort has been taken to list the fitted lengths of all the springs, so that the customer may determine the likely effect on his or her car. One car can vary considerably from the next. It may be found that on some cars the road springs do not reduce the height, because the originals have sagged to a lower ride height through old age or damage.

For this reason, quoting 1" lowered springs has no real meaning unless the original factory specified ride height of the car is known. The relationship between the new spring's fitted length and the resulting ride height is a ratio of approximately 5:8. Therefore if the spring's fitted length is 5 units shorter, the reduction in ride height will be 8 units, the amount increasing because the lower wishbones do not sit horizontally on the car.

Nylatron Bushes

Nylatron, a compound of nylon and molybdenum disulphide, is an extra tough material designed for high load conditions with low rotational movement. Its main advantage is that, due to the molybdenum disulphide, it requires very little lubrication. The use of a copper based grease on the pivot pin inside the bush is all that is usually required.

What Problems Might Nylatron Cause?

As it is a great deal harder than standard rubber bushes, road noise and any harsh surface vibrations will be transmitted more readily into the car. A nylatron bush will alter the way a joint works, a rubber bush, gripping both the pivot within it and the sleeve around it, will allow its outer surface to twist over itself. The nylatron equivalent, having no obvious elasticity must be given clearance between itself and the pivot to allow free rotation. The amount of clearance has to be judged while fitting the component, it must not be excessive, or the benefits of the bush will be lost. As an example, nylatron rear spring shackles should allow an otherwise unattached spring to swing easily under its own weight. In an instance when a pivot nut would normally be nipped up to hold a rubber bush tightly, but now gently secures a nylatron item instead, it

is suggested that an extra lock nut may be required. As the bushes are primarily designed for competition use, they may require slightly modifying to suit the customer's own pivot pin or bolt. The bushes supplied by Moss Special Tuning are injection moulded for consistent quality, this therefore means that adapt to fit operations should be kept to a minimum, but may still be occasionally needed to obtain the best results. Nylatron bushes should be checked over regularly and re-tensioned or replaced as necessary.

Wheels

Even different makes of tyre, let alone different widths or profiles (aspect ratios), tend to affect road holding of the car much more than most owners realise, just by changing to another brand the handling of the car can be transformed.

MGB 14" Diameter Wheels

Standard steel rim widths are 4" for 1962-69 roadsters, 5" for all GT's and 1970 on roadsters, 4.5" wire wheels were used on both body styles. Optional alloy wheels were 5" wide. For a road going car the optimum width is 5.5" and for a road and sprint car the use of 6" wide wheels might be recommended.

Note: Check tyre to rear wing clearance.

MGB 15" Diameter Wheels

Standard MGC's use 5" rims, the recommended widths are 5.5" or 6" for faster road cars and wider for racing.

MGB GT V8 14" Diameter Wheels

All factory built V8's were equipped with steel/alloy composite 5.5" wide wheels. For fast road cars up to 6" is perfectly adequate, with wider being used for competition work.

Brakes

When fitting new harder linings it is essential that they are bedded in correctly for them to work efficiently and give the best results. Remember, some, but not all brake pads and linings, are still made from asbestos, for personal safety do not use a brush or air line to remove brake dust, but instead use a vacuum cleaner or a damp cloth together with a can of brake cleaner. Make sure the dust or cloths are disposed of properly.

Brake Discs

Discs, especially ventilated, need bedding in on low speed gentle braking for about 10 miles. Then gradually raise the speeds, but maintain the gentle braking application. Then make 2 to 3 heavy braking applications, which should complete the bedding in.

Engines

Here we show some formulae which are useful when modifying an engine.

Swept Volume = $\pi r^2 h = 3.142 \times (\frac{1}{2} \text{ Bore Diameter})^2 \times \text{Stroke}$.
(All dimensions should be in centimetres).

Cubic Capacity = Swept Volume x Number of Cylinders.
Compression Ratio = Swept Volume + Chamber Volume.
Chamber Volume = Where Chamber Volume includes Gasket, Piston (if Dished) and Amount of Deck Height as well.

MGB Engine

Once again this section deals specifically with four cylinder MGB's, although owners of the other vehicles covered in this catalogue could benefit from the theory and advice.

Cylinder Block

When rebuilding an engine, the cylinder block should be able to be retained without any problems, as long as it is checked over carefully once stripped. The usual working life of piston rings seem to be around 40,000 miles, after which excessive oil consumption usually begins. Check the stripped block for cracks around the fourth main bearing cap and by the distributor drive, damage here sometimes only comes to light when the crank has been loaded into position and spun. If the crankshaft requires grinding or the block needs honing or boring, then check that the crankshaft is easily rotated in the block, if not, get the main bearing caps line bored to suit. When over-boring, pressure test the block for porosity, as the walls can become very thin on some units. Also check that the block to head faces are flat, distortion here will obviously give problems later on. The head studs can be countersunk slightly to ensure that the cylinder head is seated on a flat surface on the block. Moss recommends the use of a copper competition head gasket for any car with a raised compression ratio or overbore, as it tends to give a better seal and therefore lasts longer. Remember when using a high lift camshaft or high lift rockers that the exhaust valves may touch the top edges of the bores, which should therefore be cut back enough to clear the face of the valve, allow about 0.040" extra depth in clearance for safety. If the block is decked for racing use, also check for clearance between piston crowns and valves at full lift.

Crankshaft

There were two types of crankshaft fitted during production of the five main bearing engine, a steel item was used in the early, 18GB - GG, units and a cast iron version in the later 18V's. For road and sprint use the cast type is the better option, as it seems more durable. However, for racing and applications where maximum engine revolutions will often be reached, special EN40B steel crankshafts are almost a necessity.

Con Rods

There are essentially three types of con rods used in the five main bearing engines:

1. Angled big end joint, floating gudgeon pin 18GB.
2. Horizontal big end joint, floating gudgeon pin 18GB To-Early 18GG.
3. Horizontal big end joint, press fit gudgeon pin late 18GG through 18V.

Always use the last type and if building a competition engine, make sure new ones are chosen. Carefully check big ends when the opportunity arises for signs of oval wear.

Oil Pump

On a road going car the standard pump is adequate for engine speeds up to 5000rpm. Above this speed it is quite common for oil pressure to drop off due to cavitation, if necessary use the specially modified oil pump to counter the potential drop. The oil pressure can be increased easily by the use of an uprated pressure relief valve spring, which resets the relief valve to create a higher working pressure.

Cylinder Head

On early engines a significant improvement can be achieved simply by fitting a cleaned up 18V cylinder head, which has an improved combustion chamber shape, an increase in inlet valve size and does not usually suffer from the cracked seat problem of the early types.

As stated earlier in this book, Moss Special Tuning only supplies modified cylinder heads of the 18V type, with larger inlet valves and re-designed combustion chamber, however there are two different rocker shaft oil feed hole positions on this range of cylinder heads.

The heads can be interchanged from engine to engine, but only as long as the appropriate rocker pedestal or assembly is also used. When using a stage 3 or stage 4 head, it is imperative to machine a cut out into the top edge of each cylinder bore to provide clearance for the exhaust valves, whether or not a higher lift camshaft is being used. These cut outs, standard on all 18V blocks, must be made if any kind of 18V head is to be used on a pre 18V block.

Compression Ratio

The standard high ratios for UK market cars vary from 8.8:1 to 9.0:1, low compression cars have from 8.0:1 to 8.2:1. For fast road cars 9.5:1 to 10.0:1 is recommended, while for racing up to 11.5:1 may be used. If the car is to be used on roads in countries that suffer with low octane rated fuel, then the compression ratio must be kept low to prolong engine life. The compression ratio is normally altered by removing material from the cylinder head face, but if using a 1950cc engine the amount to be removed can be changed. The block of a 1950cc engine can be skimmed instead of the head, which allows a better chamber shape to be maintained. If the customer intends to use a previously modified head and a new 1950cc engine, the chamber depth and required compression ratio must be known to ensure compatibility.

Valve Springs

There are a number of different valve caps, cotters and springs used during the production run of the 'B' series engine. Early models (up to 18GD) used a different cotter design to the later engines; the former is not catered for in the Moss Special Tuning range. All engines prior to 18V used double valve springs; these may be uprated and the standard caps either retained or substituted

by the alloy type. Later models 18V, use single valve springs which are adequate for road profile camshafts, but it is recommended that uprated double springs and alloy caps are used if any serious modification is envisaged. Double springs cannot be used with the 18V single spring cap. The fitted (installed) length of the springs may need changing to suit roller rocker gear or increased camshaft lift, to ensure that there is adequate clearance at full lift and to allow very high engine speeds to be used, 0.025" is usually adequate.

Note: That the installed height for the TMG10707 springs is between 1 15/32" and 1 17/32" (37mm and 39mm), whereas for the TMG10708 springs the installed height is 1 17/32" (39mm). With uprated springs and a high performance camshaft, it is recommended that strengthened rocker pedestals are also fitted to prevent the rocker shaft from flexing.

Rocker Arms

If it is the intention to keep the engine's original rocker arms, it is recommended that the face and bore of each one are checked carefully and the items replaced or repaired if at all damaged or worn. For instance, if a new camshaft profile is to be used, it is essential to ensure that each rocker face is not ridged with an earlier wear pattern, if there are marks on the faces ensure that they are stoned back to standard shape, otherwise premature failure of the guide may follow due to excessive side loadings.

Roller Rockers

When installing high ratio roller rockers, the following points must be taken into account. Remember that the fitting of roller rockers must be carried out very carefully, checking all aspects of clearance and lift before running the engine, also that the MGB engine requires the maximum possible reduction in reciprocating mass within the valve train.

1. Check the lift capabilities of the valve springs for coil binding and ensure the correct pressure range is used to suit the engine revs.
2. Valve to block clearance must be checked and adequate measures taken.
3. The weight, length and strength of the push rods will be critical due to increased valve gear loadings.
4. In some cases the alignment of individual rockers to each valve may need adjustment to achieve optimum results.
5. For best results it has been found that the camshaft full inlet lift position should be greater than 108° ATDC.

Carbon Fibre Push Rods

When installing these push rods, it is of the utmost importance to ensure that the rods do not rub or touch the side of the cylinder head or block during the engine's rotation. Due to the production variations in the block castings, it is recommended that all the push rod apertures are elongated by at least one millimetre at right angles to the rocker shaft.

Then, with the camshaft and rocker gear in position, ensure that full clearance has been obtained. It is advised that all the push rods are painted up to the end caps in a light colour, then installed dry with zero tappet clearances. Rotate the engine by hand a number of times, without the spark plugs fitted, then check the push rods individually for abrasions in the paint. If any are marked, ensure that the offending block material is removed, then re-check. Having cleaned the paint from the rods, they are then ready for final assembly. It is possible to go through the process described above and only open up those apertures that need modifying, but it is safer to assume that all holes will need to be opened out. Also remember if a camshaft profile is subsequently changed or high lift rockers are installed, the clearance checking will have to be repeated.

Note: That push rod holes in the cylinder head and block are slightly inclined towards the camshaft, so make sure that the angle of drilling is correct. Tappet clearances can be reduced by 0.004 - 6", due to the lower expansion rate of the carbon fibre compared to that of steel.

Cam Followers

There are two combinations of cam followers and rods fitted to the B series engines:

1. Up To 18GG

Long followers and short push rods:

These are heavier on the camshaft, so it is recommended that they are changed to the later style if any major modifications are contemplated.

2. All 18V

Better design of short followers and long push rods: Preferable for competition work, this set up can be obtained if needed in a lighter weight, which will allow the engine to spin more easily. A feature of the light weight followers are the extra drainage holes drilled in the side walls, improving oil supply to the cam lobes.

MGB Axle Ratios

There are two axle designs used on MGB's, the components not being interchangeable, the customer must be sure of the type on his or her vehicle. Banjo axles are fitted on roadsters up To-GHN3 132923 (wire wheels), 132916 (disc wheels). Tube axles are fitted to all GT's, plus roadsters after the chassis no. change points mentioned.

BANJO AXLE RATIO	C/W & PINION PART NO.	SALISBURY AXLE RATIO	C/W & PINION PART NO.	DIFFERENTIAL CAGE
4.55:1	88G284	3.07:1	BTB900	BTB840
4.30:1	88G283	3.307:1	BTB841	BTB840
3.907:1	BTB653	3.907:1	BTB856	BTB866

The 3.9 ratio was standard fitment on the four cylinder MGB's, while the 3.07 ratio was used on MGC and V8 models. For a road going car the 3.3 ratio can be used to give a good long distance cruising ratio particularly useful for motorway work.

MGB Clutch

The standard clutch, if in good condition, is adequate for a road car, if the car is being highly modified but still intended for road use then the uprated cover and plate is recommended, together with a roller release bearing. The race clutch plate is supplied for those requiring the strongest clutch without going to a sintered type. In full competition use, the sintered clutch is essential to cope with racing starts; this item should not in any way be used on the road. The sintered clutch must use the light alloy flywheel together with other special installation parts.

The standard BL/Austin Rover type of bearing is sufficient for road or competition use, although the roller bearing type has been found to be smoother and more able to cope with heavier loadings.

MGB Close Ratio Gear Sets

3 Synchromesh Gearboxes

Four speed, three synchromesh gearboxes were fitted with the 18G, 18GA and 18GB engines, for such gearboxes there are now sets of helical and straight cut close ratio gears.

Note: MGB clutch plate must be used when fitting these kits to MGA's.

	STANDARD RATIOS				CLOSE RATIOS			
Standard Ratios	1st	2nd	3rd	4th	1st	2nd	3rd	4th
All 3 Synchro	3.64	2.21	1.37	1.00	2.45	1.62	1.268	1.00

STN70X straight cut close ratio gear set*- This 4 piece gear set was primarily used on the MGA using the thinner, 0.643" 3 bearing layshaft (part no. 1H3305) and is not supplied with 1st speed or reverse gears. The kit uses 4 caged needle rollers (part no. AAU3052) with 4 thin spacers and 1 long spacer and will not fit 3 synchro boxes with the thicker, 0.6681" layshaft. The bronze 2nd gear baulk ring 11G3063 must be used as the synchro cone has not been metal sprayed. Modify standard thrust washers to suit. When fitting to 18GB engines, 5 main bearing crankshaft, a special spigot bush will be required (part no. STN71X). Also, EP80 oil should be used (no fancy stuff).

*Note: Straight cut gears are not for the faint hearted, they are....noisy. They are really only suitable for racing.

STN70 helical cut close ratio gear set. This 5 piece gear set again was primarily used on the late competition MGA. It uses the thicker, 0.6681" 4 bearing layshaft (part no. 88G400) and includes a straight cut 1st gear including the inner hub (part no. 48G422). The kit uses 4 caged needle rollers (part no. 22H471) with spacers. Pre-1966 gearboxes will require machining to suit (refer to the Special Tuning handbook AKD4034, First Edition).

The bronze 2nd gear baulk ring 11G3063 must be used as the synchro cone has not been metal sprayed. Modify standard thrust washers to suit. When fitting to 18GB engines (5 main bearing crankshaft), a special spigot bush will be required (part no. STN71X). EP80 oil instead of standard engine oil should be used in competition racing/rallying - no additives.

4 Synchromesh Gearbox

For 4 synchromesh gearbox fitted cars, a set of original type Special Tuning straight cut close ratio gears. STN80 straight cut close ratio gear set- Straight cut gears are not for the faint hearted, they are....noisy. They are really only suitable for racing. Layshaft and laygear can be modified to accept double needle rollers to improve reliability. EP80 oil instead of standard engine oil should be used in competition racing/rallying - no additives.

	STANDARD RATIOS				CLOSE RATIOS			
Standard Ratios	1st	2nd	3rd	4th	1st	2nd	3rd	4th
All 3 Synchro	3.44	2.17	1.38	1.00	2.34	1.67	1.25	1.00

MGB Fuel Supply

The standard fuel pump should produce about 13 imperial gallons per hour, although an old unit can deliver as low as 6 gallons per hour. As a standard engine requires 7.2 gallons per hour at minimum, with up to 9 gallons per hour being needed for a modified engine, it is always advisable to check the efficiency of the pump used. Always make sure that the pump is capable of delivering much more than the engine is likely to demand when being driven hard. It is preferable to run the car with a pressure regulator or filter unit together with a high pressure pump to ensure a degree of safety.

Tuning Your MG

Many people dismiss special tuning as little more than maximum revs in all gears all of the time. As such it is a subject that is consequently ignored by the serious classic car enthusiast. This is a shame because in many cases performance produce can have a useful and beneficial effect on those cars that are in constant use on the modern strained road network. In truth special tuning is nothing more or less than modifying a car to suit its environment - and has that environment changed since the first MGB's hit the road in 1962.

More power lower down the rev range, without having a dramatic effect on the fuel gauge, would please a good many MGB owners. People are put off by the discomfort, lack of flexibility, economy and even the look of many 'modified' cars. In fact there is a sensible between the standard MGB and a race tuned, road lowered, torque inducted race car.

JET DESCRIPTION	DELLORTO 45 DHLA		DHLA SPLIT TWINS			WEBER 45 DCOE

Dellorto And Weber Carburettor Jet Settings

The selection of jet settings (shown in chart above) that have been found to be most suitable for the MGB range. It is only a guide to possible requirements and should really be used in conjunction with a rolling road and an exhaust gas analyser. The setting up of Weber or Dellorto carburettors is not particularly difficult, but when using a rolling road the trap of setting the car up for maximum power, rather than for driving on the road, may easily be fallen into. When arranging for carburettors to be set up, make sure the rolling road technician knows the ultimate application of the car.

Development Procedure

Normally our parts catalogues begin with the engine and work towards the drive train, then to the brakes and suspension. Here, the Engines come last, and the suspension and brakes first. The reasoning is simply that all tuning work should be done with safety in mind. Make the car handle better and stop quickly then, having developed a safe platform on which to work, begin making the engine a little more exciting...

Suspension

Front Suspension

MGB Models

As well as fitting a anti-roll bar handling kit, many owners want to further modify their car for fast road or competition use. On MG sports cars the front suspension should be stiff and the rear pliable, this reduces body roll at the front, lessening the chance of lifting the rear inner wheel when cornering hard.

MGC Models

By virtue of using the more efficient torsion bar suspension the range of possible modifications is reduced. To guarantee any improvements made, the torsion bars and other standard components retained must be in good condition. The first stage of modification is to use the handling kit described earlier, further improvements may be made using the components listed here. Remember, that to lower the ride height on MGC's, it is only necessary to adjust the torsion bar end stops, see workshop manual part no. AKD7133 for details.

MGB GT V8 Models

The V8 complies with the MGB suspension rule, in that road holding is governed by the front suspension, by reducing body roll at the front of the car, road holding can be improved considerably. The handling kit packages are covered earlier and all other modifications are as for the MGB suspension. The range of alternative anti roll bars are also listed earlier. The dynamic coil over suspension kit is particularly ideal for V8's.

Damping

The lever arm shock absorbers fitted as standard have suffered unwarranted criticism. There are now all manner of conversion kits available to replace these units. It is worth noting, however, that the cars rallied and raced by the works competition departments over the years all retained lever arm units albeit in an advanced form with adjustable damping at the rear.

New lever arms are preferred, mounted with fresh bushes and sound linkages, to provide a good combination for safe and predicable handling. Use uprated valves to replace the originals which simply screw in and stiffen the damping action of the lever arms. They improve high speed ride on all roads and were, in fact, always used to uprate the front shock absorbers of works competition cars.

Telescopic shock absorber kits offer a great improvement over the standard items - specially in terms of handling. As well as Spax and Koni kits, we also offer Bilstein damper kits.

Uprating Suspension

One often hears that handling modifications will adversely affect comfort. This is no longer necessarily true since the introduction of new suspension systems takes the MGB into a far superior league. Many modifications have been noted for a harsh ride and excessive bump steer, not a problem on a smooth race track but less than ideal on ordinary road surfaces. We have a selection of modifications offering a great improvement over the standard set-up. These complement the engine modifications proposed later, and avoid making the car uncomfortable.

The very first step forward in improving the suspension is to increase the diameter of the front mounted anti roll bar - or even fit one. Standard fitment from 1965 onwards, it was only omitted from 1975 cars due to USA weight and safety restrictions! The front anti-roll bar clamps to the lower front wishbone arms and the chassis via rubber bushes and mountings which allow the bar to twist. During cornering the bar gets pulled in two different directions, but valiantly limits suspension movement, thereby restricting body roll and subsequent understeer.

The suspension design, although efficient, unfortunately allows different slip angles between the front and rear tyres during cornering. Cure understeer by reducing body roll, and you'll not have to worry about those nasty hedges on a tight bend again. If you're not convinced that a simple bar can make such a difference try this simple test. If you have an ARB fitted, disconnect it and head for the first bend - just don't do it too quickly...

Note: When carrying out any suspension modifications, it is vital to ensure that all other components are in good working order to handle the increased cornering speeds and, to maximise the benefit of any modification.

Front Anti-Roll Bars

As mentioned, the handling is mainly controlled by the front anti-roll bar. For those owners who wish greater control of their vehicles, here we list the full range of bars together with the basic recommendations. Increasing the diameter of the bar will progressively reduce body roll and understeer tendencies. Too strong a bar will allow understeer to develop and will increase the harshness experienced on bumpy roads, making the car twitchy. Larger wheels and tyres may allow a stronger bar to be used due to the increase in unsprung weight.

The amount of load transferred by the bar is proportional to the square of the bars diameter (as shown in the table), this shows the changes brought about when changing the diameter of the anti-roll bar. Competition cars will usually benefit from the fast road bar when using slick or competition tyres, they are usually much lighter than standard, so may benefit from a smaller bar which can be selected from the table.

MGB & GT V8 Front Anti-Roll Bar

BAR SPEC.	BAR DIA.	BAR RATE	INCREASE ON STD. 9/16"	PART NUMBER
Standard	9/16"	50lb/"	0%	BHH1217
Standard	5/8"	60lb/"	120%	BHH882

Special F/Road	7/8"	295lb/"	590%	TT30784
Competition	1"	382lb/"	760%	TMG30785

Front Anti-roll Bar Handling Kits

The simplest - and most cost effective way to improve your vehicles handling is to fit one of our front anti-roll bar handling kits. All MGB's and to some extent MGC's suffer from an inherent handling problem, the standard MGB front suspension design allows body roll which induces understeer. This is the tendency of the car to go straight on when steered into a corner because the slip angle of the front tyres is less than that of the rear tyres.

With its rear wheel drive design, the MG is more comfortable and stable when this understeer has been reduced towards what is known as oversteer. This is the tendency of the car to turn into the corner because the slip angle of the front tyres has become greater than the rears.

Moss special tuning anti-roll bar handling kits have been carefully produced as complete packages to suit each model - research has shown that the requirements for each model are different. Because the anti-roll bar provides the key to improved handling, we focused our research and testing on all the production anti-roll bars, as well as testing many experimental units. From this work, the correct components were selected to provide excellent roadholding while preserving the ride quality - without the need for other modifications.

Moss Front Anti-Roll Bar Handling Kits

For the MGB, each Moss special tuning kit contains an appropriate anti-roll bar complete with new eye bushes, uprated centre mountings (for positive location) with new straps and screws (to replace the rusty ones!) The original end stops are no longer needed as the uprated components stop the bar wandering from side to side.

The location of the lower wishbone arms has also proved to be very important, so we include the V8 type inner wishbone bush. Rear suspension location has been improved by the inclusion of uprated rear spring shackle bushes, that give lateral support to the leaf springs, eliminating rear-end steering.

MGB Chrome Bumper Models 1962-74

During our extensive testing, we found that the fitting of a rear anti-roll bar to these models was detrimental to the balance of the car when close to the limit of adhesion.

MGB Rubber Bumper Models 1974-76. Evolution 2 Kits

Due to customer demand, because these models were not equipped with rear anti-roll bars, we have introduced a kit based on the Harvey-Bailey (front and rear) anti-roll bar combination that was popular in the 80's. We commissioned Harvey-Bailey to improve the original design to eliminate the snap-oversteer that occurred when close to the limit of adhesion that was a feature of the evolution 1 kits.

MGB Rubber Bumper Models 1976-80

Post 1976 cars have a rear anti-roll bar as standard, this is very effective and does not require changing, but, it should be removed if you intend to reduce the standard ride height. Please contact Moss branch if unsure.

MGC

The MGC was fitted with a more advanced front suspension that utilised torsion bars, telescopic dampers and double wishbones. Major improvements can be simply achieved by fitting our special 3/4" anti-roll bar and the uprated rear spring shackle bushes. This combination works extremely well with the MGC suspension to give a well balanced ride and excellent roadholding.

MGB V8 Original GT Models

The increased ride height of the chrome bumper models, and the even higher ride of rubber bumper models, combined with the greatly increased power and torque produced by the V8 engine, necessitates the use of our 7/8" front anti-roll bar. The fitting of the uprated rear spring shackle bushes is particularly important on these models to help control rear-end steering. The kit also includes a set of V8 inner wishbone bushes.

MGB V8 Roadster Models

Many of these vehicles have a higher centre of gravity and much more power than the original factory models. We have determined that our conversion kit will provide the best balance for roadholding and ride quality. On these powerful cars, the fitting of our uprated rear spring shackle bushes will help greatly to control rear-end steering.

Rear Suspension

MGB Models

The rear suspension does not work as hard as the front, it should allow more movement, keeping the rear wheels on the road. While spring rates should not be altered, some lowering is recommended. Leaf springs settle with age and also lose their spring rating, new lowered springs are recommended to overcome aging and provide the benefits of lowered ride height. Dampers used may be either uprated lever arm units or the adjustable telescopic type to improve location and ride. Lateral location is further improved by the use of nylatron bushes and anti tramp bars.

MGC Models

Modifications to MGC rear suspension are precisely the same as those carried out to the MGB. As an outline, the car should be lowered slightly and fitted with telescopic dampers with uprated shackle bushes (as in the handling kit) used to locate the rear springs. To stop spring wind up, tube axle type anti tramp bars TMG30730 are also recommended. To lower the car either tube type spring spacers may be used or, to special order only, lowered MGC springs can be supplied.

MGB GT V8 Models

The same procedure is used here that would be used on 4 cylinder MGB's, the car should be lowered slightly, telescopic dampers fitted in preference to the lever arm type and nylatron rear shackle bushes used to locate the springs. With the increased power available, the use of anti tramp bars becomes more important.

If fitting anti tramp bars to an original factory chrome bumper V8 bodyshell, the special V8 spacers listed with the anti tramp bars must be used, for rubber bumper V8's, normal rubber bumper MGB spacers are used.

Uprated Springs

A more permanent solution is to use a pair of new lowered ride height leaf springs which retain the standard spring rate. The standard rates for leaf springs is 93lb/in for chrome bumper models and 110lb/in for rubber bumper models, roadsters use six leaf springs and GT's have seven. While retaining the above specifications, the springs listed here are designed to lower the ride height by 1" for road use and by 2" or more, depending on the vehicles weight, for competition use. The

springs which are sold individually, are suitable for MGB's, MGC's and V8's and must be fitted in pairs.

If larger than standard diameter tyres and wheels are being used the competition springs can also be used for a road car, especially a rubber bumper model. It is recommended that the shackle bushes are replaced by nylatron items on not only racing, but road cars as well. Reducing the centre of gravity improves cornering ability no end. We supply springs which have been lowered by around 1", retaining sufficient ground clearance while reducing body roll. This equates to faster and more confident cornering.

Stiffer springs are often unacceptable for road use because the vehicle can become uncomfortable. Our lowered springs are only a little stiffer and this means that the ride quality remains virtually unchanged despite really gripping handling. Strong words maybe, but absolutely true. Our front springs are uprated only slightly to avoid coil binding while the rear springs are standard units, professionally reset to provide the lowered action necessary for safer fast road work.

Note: When installing lowered front springs shorter bump stops are required to allow full movement of the suspension system. These simply replace the originals and just bolt on. Very important: Lowering modifications must begin at the front first otherwise extraordinary and dangerous, handling characteristics more suited to a circus are likely to occur!

Cheaper, but less effective than modified rear springs are lowering blocks. These fit between the rear axle and springs thus lowering the body. It does offer some improvement and the kit includes longer U bolts and fittings for easy attachment.

Uprated Bushes

Uprated bushes are a very cost effective means of improving your steering and suspension joints. We stock an extensive range of uprated bushes, including hard rubber, polyurethane and nylatron, far too many to list here individually. For full details and options please contact your nearest Moss branch.

Anti Tramp Bars

The use of anti tramp bars is highly recommended for cars which have more than standard power available, for example a tuned four cylinder, an MGC or a V8. They are fitted between the rear spring front eye bushes and the centre spring mountings on the axle by special brackets which are supplied as part of the conversion. When power is applied suddenly, usually from a standing start, the rear leaf springs tend to wind up into an S shape, and then revert to normal in a series of hops, referred to as tramping.

Anti tramp bars restrict flexing of the front half of the leaf spring when under extreme loadings, by allowing only vertical movement of the axle, thus deprived of its natural twisting motion the axle can no longer tramp. The anti tramp bar kits listed here fit (without modification), chrome bumper MGB's and all MGC's. Factory-built V8's, and all rubber bumper cars because of the different spring mountings on their bodyshells, also require one of the two spacer kits.

Brakes

Brakes General Condition

The standard MGB brakes should be powerful enough to use with stage 1 engine modifications. In any case the brakes should be checked over to make sure they are working efficiently. There's not much point modifying the MGB only to end up putting the car through a five bar gate because the brakes don't work.

A visual inspection will soon determine the state of drums, discs, pads, shoes, pipes and hoses. If anything is in anyway suspect, repair or replace it. Drums and discs should be replaced in pairs. If one wheel cylinder is leaking the other soon will be - renovate both. Replace old hoses. Check that the discs are within tolerance and running true, your workshop manual has details. Often a disc rusts leaving a scalloped outer edge which offers no braking surface. Its very easy to spot and any sign of this wear will mean machining or replacing the discs. In fact many MGB discs become so pitted that replacement is the only effective answer.

Note: Thinner discs heat up more quickly and this leads to brake fade. Since it is likely that a modified car will be driven harder you should expect more brake fade - so its important to have brakes in the best condition possible to minimise any problems.

Having said all of the above, it may be that if there are faults with the system, then you may wish to take the opportunity to uprate the brakes, rather than just replacing them with standard units. If that is the case, now is a good time to read on, because there is a lot you can do to make an MGB stop faster than a rabbit can jump off a grass verge...

Tweaking Standard Brakes

If the general condition of the braking system is good then there are some worthwhile improvements to be made before attempting serious modifications. Uprated pads will fit directly into the standard calipers. The greater pad area and harder linings reduce brake fade and provide more efficient braking.

Some owners feel that even good MGB brakes seem spongy. The problem may well be caused by old hoses which, having lost their strength, begin to expand under pressure. This expansion causes the spongy feel. To prove it clamp pipe pliers around the hoses so that they are unable to expand. If the pedal becomes stiffer then you know the cause.

To stop it, simply replace the hoses with stainless steel braided equivalents. The steel braiding constricts the hose and stops expansion forcing fluid all the way down into the calipers and cylinders giving a firmer pedal. Remember to change or even improve the fluid. DOT4 fluid is the minimum standard and, should be replaced every two years!

An alternative, especially if you are replacing calipers and cylinders, is to flush out the pipes and install silicone fluid - it is non-hygroscopic, so it does not lead to rust problems in the lines, calipers or cylinders. The bonus is it won't damage paintwork! Once silicone fluid is used it will provide years of trouble free braking and put to an end to the monotonous - and expensive pastime, of repairing or replacing worn or leaking brake components. DOT5 really is the ultimate in brake fluid. Its anti-boil properties mean that even when the brakes get hot the fluid remains efficient, rather than boiling away into useless vapour.

Vented Disc Brakes

Brake fade, as mentioned previously, is the problem to solve in order to overcome inefficient braking. If you want to stop your MGB time and time again while driving hard and fast, then something has to be done to keep the pads and discs cool, otherwise the braking ability will just drop off. Our vented brake disc kits provide efficient braking that is easily a match for most modern cars.

The secrets are the vents within the disc walls. They force air inside the discs, keeping them exceptionally cool which in turn improves braking. Fade is caused when the discs get too hot during use. For example, standing on the brakes going down a steep hill will lead to overheated discs and brake fade - this in turn leads to the ever popular non-stopping motor car and thick hedge at bottom of steep hill scenario. With vented discs, this thankfully tends not to happen!

Our 4 pot kit which as the name suggests has twice as many pots or pistons to get the maximum possible grip on the vented discs. The unique design makes use of the original wheel hubs, fits easily and neatly and, will help you save many a hedgehog from an early and unfortunate demise!

Note: Wheel spacers may be required for some wheel types and are available from all our branches.

Rear Brake Cylinders

Sometimes uprating the brakes can lead to the rear wheels locking up (only in extreme circumstances we might add). This is actually more common on standard rubber bumper MGB's anyway, but we realise that many owners would not be too happy if the car persistently broke into a wild tango. To solve the problem we can recommend fitment of different rear wheel cylinders that will stop any unforeseen and frenzied dancing activities.

Engine Tuning

Tuning The MGB 1800cc Engine

Reference pre 1965 MGB's fitted with 3 bearing engines. Much of the information regarding MGB 1800 engine modifications relate solely to the five bearing engines fitted from 1965 on. We are unable to accept three bearing engines in exchange for 5 bearing engines.

Having considered the brakes and suspension it is now time to look at the ways in which you can get more performance from the engine. If you have turned straight to these pages then read on, but consider the importance of those vital components. Once you have decided how much extra performance you want you may find it easier to choose from the suspension and braking modifications available. Before tackling the engine you should improve those aspects first for your own safety.

Engine modifications need to be carefully thought out, a modified engine can be much less practical and even unpleasant when put to the wrong use. A full race engine is no use for the road. So, unless you are going to prepare your car for outright competition, here we suggest how to improve the performance of the standard MGB engine while maintaining a useful, practical,

everyday vehicle for use in town or on the open road. You can't just mix and match components.

Development needs to be co-ordinated. Sadly, many people begin to tune cars without care and the result is usually poor performance, high fuel costs and even engine damage - then just sell the car on... The stages of development are based on tractability and price. They offer progressively more power and there is a direct relation to power and money here, but importantly all of the stages work well on ordinary roads.

Note: Alternatively, you can choose the easy route and fit one of our stage 2 full engines. Ask your nearest Moss branch for details.

Stage 1 Tuning

The stage 1 modification simply involves replacing the air filters and exhaust. Fitment requires little more than true grit and a set of spanners. K&N filters have re-usable elements offering vastly improved air flow, while the fine filter mesh stops even the smallest particles wrecking the engine. To get more mixture into the engine you need to get the burnt gases out just as quickly. Our extractor manifold and straight through exhaust system provides a better escape route than anything WWII POWs could have ever come up with. The tubular free flow manifold fits directly to the large bore system and we offer variants of the system for chrome and rubber bumper cars.

Stage 2 Tuning

Stage 2 is a big step up, and involves a bit more in the way of technical knowledge, but its well worth it for the results. Retaining the stage 1 exhaust system it includes a choice of Weber or SU HS6 carburettor kits with all fittings. K&N air filters, high lift camshaft, ignition and a modified cylinder head.

Note: After fitting tuning equipment it may be necessary to use a rolling road to optimise fuel and ignition settings. Alternatively, fit a full stage 2 engine, ask your nearest Moss branch for details.

Cylinder Head Identification

There are two MGB cylinder heads with in-line or offset oil feeds. You can tell which you have by looking at the rocker pedestals. If no. 4 pedestal has a lump on the side then its an offset type. If not, its an in-line feed.

Carburation

A pair of bigger SU's, or a twin choke side draught Weber, were the two options offered by the works competition teams of the 60's and 70's. Correctly set-up SU's offer plenty of extra power throughout the normal rev range, whereas the Weber gives greater top end performance and acceleration at the expense of fuel economy.

SU's are of course fairly easy to set up by most competent home mechanics (see the Books & Manual section), but, to get maximum performance from Webers you really need a rolling road. Don't let that put you off Webers though, because a rolling road will give optimum tune up very quickly. The staff can even provide you with print-outs showing power/torque curves and figures, which is sure to be of interest.

Our SU HS6 kits include everything needed for installation - inlet manifold, air filters, heatshield, throttle cable and linkages. The Weber Kit includes inlet manifold, linkages and all necessary fittings to secure it in place. K&N air filters are not included with these kits because of the brake servo. If the servo is mounted on the bulkhead by the carburettors order KN56-9104. If the servo is fitted elsewhere in the engine bay order KN56-9265.

Note: There is no facility on a Weber for re-circulating crankcase fumes, so vent the crankcase to atmosphere or feed them through one of the neat catch tanks.

SU carburettor needles

When modifying the gas flow of the engine, either simply by adding a free-flowing air filter and extractor manifold or doing more comprehensive modification including camshaft and cylinder head work its essential that you get the right amount of fuel into the engine to match the improved air flow. If you are using SU carburettors modifying the fuel characteristics is done by changing the needle located in the piston. However, getting the right choice of needle can be a complicated process. We have detailed below a range of needles that we believe are good starting points, which may suit your purposes. We always recommend that you have the car set up properly on a rolling road to get the very best out of your classic.

The descriptions detail 'fixed' and 'biased' needles refers to how the needle is retained in the piston. Fixed needles are solidly fixed into the piston with a screw, biased needles are retained by a collar and allowed to move governed by a spring at the top of the needle in the piston. Always ensure the carburettors are in good condition before embarking on performance modifications. Check spindles, jets and dashpots for wear. If in doubt either rebuild with the kits listed opposite or see page 50 in the Restoration section.

It is likely that most MGB's receiving power modifications will be using replacement/rebuilt carburettors, most likely HS4 or HS6s as these are more suitable for power gains and have full needle recommendations. HS4s are unlikely to be adequate for serious power gains or for a 1950cc engine so a simple needle change cannot be recommended.

High Capacity Fuel Pumps

The standard fuel pump may not be able to maintain adequate fuel pressure at higher engine speeds. The range of Facet high pressure electric fuel pumps however, suit all modified applications, the position in the car where the pump is mounted will determine which model is used.

The cylindrical interrupter pumps can be fitted to the front or rear of the car and can pull fuel up to 18 inches from the bottom of the fuel tank. The cuboid solid state pumps must be mounted close to the tank and below the fuel level, the installation instructions must be adhered to. They can pull fuel up to 12" from the bottom of the fuel tank and the filter union must be fitted to the suction side of the pump.

Both types of pump are supplied in negative earth only, they come complete with mounting bobbins and unions, you will have to re-plumb the fuel system around the new pump using a combination of standard pipes and hoses.

Fine tuning of the fuel pressure can be easily achieved by installing a pressure regulator, we can supply either a simple regulator or a filter regulator with a replaceable filter. We have the road competition version with 1/4" and 5/16" connections and the larger competition version with all 5/16" connections. With safety in mind, we also supply a inertia fuel cut off switch, so that in the event of an accident, fuel delivery is cut-off.

Tuftridged Rocker Shaft, Roller Rockers...

All cars can benefit from a replacement tuftridged rocker shaft, they will resist wear and breakage especially when using high revs. The friction and the rocker side loads normally associated with

the standard rocker gear can be reduced and the location made more positive, by fitting the three piece steel spacer set instead of the standard shaft springs.

Up-rated pedestals are to be used with a conventionally operating rocker shaft, they differ from original outer pedestals in being cast with additional outer supporting branches which allow the use of stronger valve springs and very high engine speeds without the rocker shaft flexing. There are two different rocker feed hole positions which may be found on an MGB cylinder head, there is no specific point in time when the design was changed, so the customer must inspect the cylinder head to be used to ascertain the position of the feed hole, either in line with the rocker pedestal mounting stud holes, or offset, before ordering the pedestals.

The higher ratio is ideal for increasing the valve lift and improving the torque and is best combined with a suitable camshaft as listed in our camshaft table. The ratio of our hi-ratio roller rocker is increased so that the valves are opened earlier for a longer duration, therefore making the breathing much more efficient, the standard ratio is 1.426 against the new high lift ratio of 1.625. The set comes ready assembled for easy installation onto the cylinder head and uses solid spacers between the rocker arms. Each rocker is fitted to the rocker shaft with twin needle roller bearings and uses a roller to make contact with the valve stem thus lessening wear and reducing side loads on the valve stem.

Note: Installation of roller rockers must be carried out very carefully to ensure the safety and expected reliability of these parts.

Valve Springs And Caps

The selection of valve springs is made by taking into account the combined specifications of the valves, camshaft and rocker gear, once again it is felt that the point must be stressed about taking the utmost care and attention when choosing and assembling these components on an engine.

The road up-rated springs are designed for use with standard ratio rocker arms and any of the camshaft profiles up to, but not including, the racing types. They will help to improve power in the usable rev. range, while not being so strong that they might affect reliability. They are designed to be used with alloy valve caps but can also be used on pre-18V engines with the early double spring type valve caps.

Weight reduction of all reciprocating components within an engine is vital to the fuel efficiency, the lighter a component, the less power will be lost through friction and heat. For this reason, along with the benefits of less stress and wear on related components, Moss can offer many light weight engine parts such as alloy valve caps. These aluminium valve caps are approximately half the weight of standard steel caps, while also being stronger. They are designed to match the later type of valves and must be used only with double valve springs, they are supplied individually.

Valves And Guides

The selection of valves is dependent on the vehicles use and whether the basic need is for torque or the ability to use high revs. In either case their compatibility with the intended camshaft profile and rockers is important, as is the extent of cylinder head modifications. In general, larger exhaust valves should not be used unless high revs are needed, as with the sprint or race profiles. A useful power increase is achieved with re-shaped and smoothed standard valves, as fitted in Moss stage 2 cylinder heads. Larger inlet valves can further improve this by up to 8bhp if fitted along with K&N filters and a stage 3 head. Gas flowed inlet and exhaust valves can improve engine breathing considerably, especially when the cylinder head is also properly modified. They are made in EN21/4N material for maximum strength with reliability.

Note: That the early style of valve/cap/cotter assembly is not catered for, so if the cylinder head is from an engine numbered prior to 18GD 835 then all of these components must be changed together, the problem valves are marked with * below. The intermediate and late model exhaust valves differ in slight variations of material specification only. All valves are sold individually.

Bronze aluminium guides provide increased life especially when used with lead free heads, where the extra heat allows the possibility of sticking valves. They may be used for the same safety reasons on road and race engines.

Vernier Timing Gear, Push Rods, Cam Followers...

The Vernier duplex (i.e. twin chain) camshaft gear has a boss, which fixes rigidly to the camshaft, onto which is clamped the outer gear ring. Upon loosening the clamps, the gear may be rotated thereby adjusting the camshaft relative to the gear. This method of camshaft timing has two advantages, firstly it makes the task of timing much easier than when using offset keys and secondly it permits further advancement of the timing.

Advancing camshaft timing, that is making the full inlet valve lift occur before the rotation angle specified by the manufacturer, will make the engine produce more torque lower down in the rev range while losing a little of the top end power. Thus a vernier cam gear allows a camshaft's characteristics to be changed to make, say, a competition cam more flexible for road use.

Single row timing chains and gears were fitted as standard to cars manufactured after 1971, which have 18V type engines. The duplex chain kit supplies all the components: chain, crankshaft gear, vernier camshaft gear and lock tab, tensioner assembly and timing plate, necessary to convert to the stronger system used on earlier MGB's. Use of a duplex chain is particularly recommended on engines with high lift camshafts. Our lightweight cam followers are the type with extra drain holes, these apply less load on the camshaft lobes and are less prone to wear. If fitting these followers to engines with numbers prior to 18V, longer push rods either of the 18V standard type or, TMG10733 (listed here) will be required.

Check your engine number before ordering new cam followers. The 18GB to 18GG engines all use 12H3167 cam followers. The later 18V engines were fitted with 2A13 followers which offer far better lubrication due to their improved design. The two types of follower are interchangeable but one is longer than the other. All you need know is that 2A13 cam followers use 12H3357 pushrods (269mm long) and that 12H3167 cam followers use 11G241 pushrods (224mm long).

We offer lightened followers which replace only the 2A13 type followers - choose your pushrods accordingly. Make sure that when you fit a new camshaft and followers you use some cam lubricant to stop damage occurring during the initial start up period. Finally, when you do start up the car after installation, don't let it idle because the oil pressure will be so slow as to allow early destruction of the bearings and cam lobe faces...

Push rods made from carbon fibre are much stronger and lighter than their lesser steel counterparts and are therefore ideally suited to racing engines. Care must be taken to install them correctly. For fast road cars Moss Special Tuning offers a tubular push rod design which will stand up to the variety of treatment experienced by a road engine, the lower weight and slightly shorter length help the engine to rev more easily.

Camshaft

All camshafts act differently, depending on the cylinder head, carburettors, cylinder bore size, exhaust system etc. Ultimately, a race camshaft is great for track use but not on a car stuck in a traffic jam. Getting the right one to match your car can be confusing, and the implications of getting it wrong means the car won't ever run properly. If you require any help on this matter please contact your nearest Moss branch. Replacing the camshaft but using old followers will lead to rapid wear of the camshaft and a deaf ear to warranty claims.

Here are further points to help explain the subject of camshafts:

1. **The B series engine used in MGB's breathes best when the valves are opened further (up to 0.510" valve lift is not uncommon for racing).**
2. **A roller rocker set works best when operated by a camshaft which produces full inlet lift later (equal to or above 108° after top dead centre).**
3. **When fitting any high-lift camshaft it is essential for both valve springs and the valve to block clearance to be checked at full lift, springs must be checked for coil binding, and all engines using more than 0.360" valve lift should have a small cut out area on the top edge of each bore to provide the necessary clearance for exhaust valves (on later engines this feature will already be there).**
4. **Whenever a new camshaft is fitted, it should be accompanied by new followers and preferably new valve springs as well.**
5. **Welcome increases in both power and smoothness can be found by timing the new**

camshaft correctly. Depending on the camshaft used, the point in the engine's induction stroke when the inlet valve reaches full lift will have moved, the cam gear has to be rotated slightly on the camshaft to account for this. The fine adjustment needed can be made either by using one of a choice of offset cam gear locating keys or by a vernier adjustable cam gear. The latter is the best option, but the offset keys give a permanent solution if the correct position is known, and further alterations of camshaft timing are not expected.

Road Camshafts

Road cam profiles have a reasonable duration period, 250° to 280°, combined with a valve lift of over 0.260", using either standard or roller rockers, thus mid range punch is greater than that of a standard cam and the power band is still usefully wide to cope with town driving.

Fast Road Camshafts

Fast road cam's provide more power in the mid and upper rev. ranges, because their longer valve duration, between 280° and 290°, assists scavenging (exhaust gases leaving the cylinder at speed, creating a vacuum to draw in the new fuel/air mixture). However, at low engine speeds scavenging does not take place, so the longer valve duration instead causes inlet and exhaust gases to either mix or impede each other, preventing the engine from running efficiently. This situation may be partly cured by a using a cylinder head with better flow characteristics and/or higher capacity carburation, thereby creating an engine which may be used not just on the open road, but without too much difficulty around town as well.

Competition Camshafts

Every competition cam has several power and torque characteristics, each dependent on the other modifications to the engine that it will work with, so the customer is advised to contact their nearest Moss branch to discuss the exact use and specification of the engine before ordering. Most importantly the customer's induction equipment, exhaust and cylinder head, together with the intended application (circuit racing, hill-climbing, sprinting, etc...) are all variables in the equation determining the type of competition cam used.

Performance Camshafts

To assist in selecting a suitable camshaft we have prepared the table below showing their various characteristics, these will change from engine to engine and with other modifications such as carburettor or valve size. A scatter profile is where the cam timing on No.2 and 3 engine cylinders has been altered slightly to combat the poor scavenging of the siamese port design. This will benefit both the tickover and high end performance. Care must be taken to ensure that installation is carried out correctly and that components all work together or you will not get the expected power output or reliability. It is essential that the new cam is fitted with new followers as they mate with the lobe that they run on and should never be used on another lobe.

Fast Road 770	STB770	43/64	61/40	287-281°	0.462"	-5	N/A
Sprint 863	STB863	53/73	75/53	306°	0.464"	-5	N/A

Lightened and tufrided followers wear more slowly and put less load on high lift cam lobes, they are also manufactured with a drainage hole. Another essential is the special lubricant that must be used with all new cams, it provides vital lubrication during initial starting and protects your cam from extreme wear in its first minute of use. Don't forget the cam timing degree disc (TT2929), you will need this to set your cam timing.

Valve Timing Explained

- a. Angle when inlet valve opens, before top dead centre.
- b. Angle when inlet valve closes, after bottom dead centre.
- c. Angle when exhaust valve opens, before bottom dead centre.
- d. Angle when exhaust valve closes, after top dead centre.
- a+b+180°. The period or duration during which the inlet valve is open.
- c+d+180°. The period or duration during which the exhaust valve is open.
- a+d. Valve overlap.

Gas Flowed Cylinder Heads

Having dealt with camshafts and valve gear the next step is the cylinder head. The B series head, having siamese ports, produces a notoriously bad breathing engine, this can be improved by gas flowing the cylinder head. To achieve further improvements larger gas flowed valves are also installed. All of the heads listed here are of the 18V type and only available on exchange for an old serviceable unit. For earlier engines, 18G to 18GG, please contact your nearest Moss branch concerning possible modifications required when fitting an 18V cylinder head.

In Line And Offset Rocker Feeds

The two types of 18V cylinder head are identified by the position of the oil feed hole under the fourth rocker pedestal. Earlier 18V heads had a hole in line with the two studs securing the pedestal, later heads had an offset hole. While the modification is assumed to have taken place around the time of the introduction of the rubber bumper cars, factory rebuilt 18V engines (whether chrome or rubber bumper type) are supplied with either head and there is no documented engine number change point between the two.

Stage 2 Heads

Modifications include more detailed gas flowing of the ports and chambers, standard size reshaped valves, re-cut valve seats, new guides and double valve springs.

Stage 3 Heads

These heads are for tuned engines requiring flow capability to match the relevant camshaft and carburation modifications. Recommended for all fast road engines, the inlet valve size is increased along with the ports and chambers to produce the special flow profile. All heads are supplied with new valves, road uprated valve springs and new valve guides.

Stage 4 Heads

This stage offers the ultimate in flow capacity for road/competition use, where the full potential of the modifications can be realised. The specification is as per Stage 3, plus larger exhaust valves and further extensive shaping of the ports and chambers. The compression ratio will depend on the customer's use of the engine, for road use up to 9.75:1 is recommended, for fast road and sprint use up to 10.5:1, whilst for racing up to 11.5:1 may be required. The preferred ratio should be specified at the time of ordering so that the correct compatibility with the engine build can be ensured.

Distributor

Having fitted a different cylinder head, carburettor(s) and camshaft, the relationship between the fuel mixture flow and ignition will alter by a considerable degree because of the improvements offered in mixture flow. The original distributor will not work properly even though the engine may run. The extra power resources available after modification work is completed will remain largely untapped because the ignition curve won't match the fuel flow.

MGC KENT CAMSHAFT TYPE	PART NO.	INLET	EXHAUST	DURATION INL - EXH	CAM LIFT	INSTALL SETTING	POWER RANGE
Blueprint*	TMG11783	33/65	65/33	278°	0.293"	N/A	N/A
Fast Road 715 New**	TMG11705	43/64	61/40	287°	0.323"	N/A	N/A

(*This is a standard profile blueprinted cam that will give you improved mid-range power.
 **This cam will give you improved power in the mid to upper range, best used with uprated carburettors and modified head).

Tuning The MGC Engine

The MGC's under stressed engine is ideal to modify for faster road use and can perform well in racing. The basic order of improvements is exhaust system, cylinder head, camshaft, then induction equipment.

Performance Camshafts

The MGC engine primarily requires improvement in low to mid range power, the Moss cam profiles have therefore been designed to enhance this for road and fast road work. Racing profiles are available to special order only, the specification depending on the customer's own requirements. All work is carried out to the customer's old camshaft. Please contact your nearest Moss branch for details.

Care must be taken to ensure that installation is carried out correctly and that components all work together or you will not get the expected power output or reliability. It is essential that the new cam is fitted with new followers as they mate with the lobe that they run on and should never be used on another lobe.

Lightened and tufrided followers wear more slowly and put less load on high lift cam lobes; they are also manufactured with a drainage hole. Another essential is the special lubricant that must be used with all new cams, it provides vital lubrication during initial starting and protects your cam from extreme wear in its first minute of use. Don't forget the cam timing degree disc (TT2929), you will need this to set your cam timing, or, camshaft assembly lubricant. For full details please contact your nearest Moss branch.

Tuning The MGB GT V8 Engine

The engine in the factory built V8 models was the early specification Rover engine, using 1/2" reach spark plugs. This unit is adequate for road cars, but if a great deal more power is required then the SD1 engine, using 3/4" reach spark plugs, is essential, this unit has much better cylinder head flow.

Performance Camshafts

Road High Torque Profile

This cam may be fitted to early or late V8's to give a very wide power band with good all round performance. It can be used with either SU or Holley carburettors, and a standard compression ratio. The profile works well in all applications, automatic cars included, but must be used with uprated valve springs (TT1807) and followers. Spring shims may also be needed. The spring fitted length should be 1.592".

Fast Road Profile

A fast road and rally profile best used with a 390cfm Holley carburettor. This is best set up with C.R. of up to 10:1 and must be used with uprated springs and followers. Not recommended for automatic models. The spring fitted length is 1.592".

Sprint Profile

A sprint profile for fully modified engines, it will pull well over 2500rpm and will idle at about 900 rpm. The top end power peaks at 5500, but the unit can rev to 7000rpm. The spring fitted length is 1.592".

To assist in selecting a suitable camshaft we have prepared a table showing their various characteristics, these will change from engine to engine and with other modifications such as carburettor or valve size. Care must be taken to ensure that installation is carried out correctly and that components all work together or you will not get the expected power output or reliability. It is essential that the new cam is fitted with new followers as they mate with the lobe that they run on and should never be used on another lobe.

Another essential is the special lubricant that must be used with all new cams, it provides vital lubrication during initial starting and protects your cam from extreme wear in its first minute of use. Don't forget the cam timing degree disc (TT2929), you will need this to set your cam timing, or, camshaft assembly lubricant.

All the camshaft profiles here are hydraulic versions, suitable for all road cars. We can also supply the competition, manually adjusted types, to special order. All our camshafts must be fitted with uprated cam followers and valve springs. Please contact your nearest Moss branch for the latest availability.

MG GT V8 CAMSHAFT TYPE	PART NO.	INLET	EXHAUST	DURATION INL - EXH	CAM LIFT	INSTALL SETTING	POWER RANGE
Mild Road	KCR200	28/64	64/28	264-268°	0.376"	N/A	1000-4500
Fast Road	KCR224	36/78	85/39	N/A	0.494/0.520"	N/A	2000-5500
Sprint	KCR234	38/80	87/41	N/A	0.520/0.542"	N/A	2500-6000
Road	VHR2702	28/64	64/28	272°	0.445"	N/A	1500-6000
Fast Road	VHR285	44/72	72/44	296°	0.450"	N/A	2000-6500

Transmission

For road use there is little alteration needed to any part of the transmission. Now, if you are going racing it is another story, because we can supply close ratio gear sets, strengthened overdrives, competition clutches, lightened flywheels and so on... When racing on the track, transmission noise will be at a premium and you will expect to work hard with gear changes, but on the road these problems could drive you bananas. A straight cut close ratio gearbox might be very practical, filling in the yawning chasm between second and third gear, but it sounds like a steam turbine and is downright unpleasant on long journeys. We also find that few people wish to dismantle their gearboxes to fit them!

A competition clutch designed to suffer maximum abuse is ideal for mud-pluggers and race enthusiasts everywhere, but it is not easy to operate in a traffic jam due to its heaviness. If you have a lead foot it's not a problem, but most people don't have this rare type of appendage. The standard transmission will work admirably well under most road conditions, but there are two or three practical modifications that may be worthwhile to deal with the extra power.

Clutch

Firstly, while you don't need a competition unit a 'fast road' clutch is a very desirable modification. It has a larger friction area than standard units. Consequently, you can expect better and longer lasting performance without having to resort to using both feet on the pedal while negotiating slow moving traffic.

Secondly, the standard release bearing can be replaced by a roller bearing version which provides a much smoother action. It does not wear out, fall apart or complain, unlike the usual carbon thrust type.

A replacement stainless steel braided hose to the slave cylinder will lead to an improvement in clutch control. The braided hose does not expand under pressure, forcing all of the fluid down to the slave cylinder for better clutch separation and improved gear changes.

Safety

4 Point Seat Harness

If you are going to put your car on the track, you really should fit a 4-point harness system.

Safety Roll Bars

Not that we think you will ever roll your car over, but just in case you do we would like to think that you will be glad that you fitted a roll bar to protect both you and your passenger.

Note: Owners of pre 1970 MGB's fitted with grey folding frames will be unable to fit roll bars as there is insufficient clearance between the bar and the frame to allow this type of soft top to fold down.

Aerodynamics

To enable a more secure line to be maintained at high speeds the fitment of a front spoiler will help by forcing air out to the sides and over the top, rather than allowing it to go underneath the shell where pressure can actually begin to lift the body from the road. For example, the weaving sensation often felt on motorways in windy conditions can be substantially reduced by fitting this simple device.

Rear spoilers catch air flowing over the top of the cars and force the rear end down onto the road offering increased rear traction, grip and stability on fast bends or corners and is again worthwhile fitment for the rapid style of driving we all know and love. Our range of spoilers includes a replica rubber bumper 'LE' type as fitted at the factory, a replica of the ST units fitted to works competition cars and the Moss ST model with cut outs suitable for brake duct/fog lamp fitment.

Sebring style front and rear valances are also available which smooth out the stepped appearance caused by removal of the rear bumpers from MGB's. The Sebring valances are complemented by replicas of the headlamp cowls so often seen on the works racing team cars. Although they can be screwed into place we are able to supply a fitting kit which secures the replica cowls just like the originals!

For GT owners we offer a fibreglass wheel arch kit which helps replicate the MGC GT Sebring alloy bodied race cars. These match the valance kits and undoubtedly produce a dramatic effect as well as allowing fitment of the wider alloy wheels that were popular with competition teams of the sixties.

Power Unit Identification

Serial Number Prefix Code (not V8)

The engine number prefix comprises a series of letters and numbers, presenting in code the cubic capacity, make, the ancillaries fitted, and the compression.

1st PREFIX GROUP - Cubic capacity, make & type
 1st PREFIX NUMBER: 18 - 1800
 1st PREFIX LETTER: G - MG or V - Vertical Line

2nd PREFIX GROUP - Gearbox and Ancillaries
 LETTER U - Centre gear change R - Overdrive RC - Automatic
 RWC - Centre gear change with overdrive
 OR NUMBER 581 F Prefix Letter
 Prefix number

Note: For a fuller list of prefix numbers and their breakdown see next chart.

3rd PREFIX GROUP - Compression and serial number
 H - High compression } Serial number of unit
 L - Low compression }

CODE EXAMPLE

18G U H 101 Serial number
 High compression
 Centre gear change
 1800cc MG

18V 581F L 101 Serial number
 Low compression
 Carburettor crankcase
 Ventilation and twin carburettors

Bf Pf We
 Alternator Centre gear change - all synchromesh
 Pre-engaged starter

1800cc Vertical (in line)

Always quote these prefixes with engine serial numbers.

Vehicle Identification

Serial Number Prefix Letter Code (not V8)

The car number prefix comprises a series of letters and numbers presenting in code the make, engine type and the series.

1st PREFIX LETTER NAME	2nd PREFIX LETTER ENGINE TYPE	3rd PREFIX LETTER BODY TYPE
G-MG	H	N-2 Seater Roadster D-Coupé or GT

4th PREFIX	5th PREFIX	6th PREFIX - MODEL YEAR
3 - 3 series	L - LHD	A - 1970
4 - 4th series	U - USA	B - 1971
5 - 5th series	D - 1973 E - 1974	C - 1972

CODE EXAMPLE

G - H N 3 L Serial number
 LHD
 3rd Series
 Tourer
 'B' type Engine
 MG

G - H D 5 U D Serial number
 1973
 USA
 5th Series
 GT
 'B' type Engine
 MG

Always quote these prefixes with car serial numbers.

Vehicle Identification Numbering (VIN)

From No. 501001 Onwards

The VIN system replaced the earlier car numbering system from the introduction of the 1980 model year.

Thus G V A D J 1 A G - 501001 is an MGB Home Market spec, open bodied, 1800cc RHD 1980 model.

1st & 2nd Prefix Letters (marque + model) GV-MGB	3rd Prefix Letter (Class) A - Base Line G - GT J - Japanese L - Canadian V - North America Z - California	4th Prefix Letter (body) D - 2 Door Sports Open E - 2 Door Sports Closed	5th Prefix Letter (engine) J - 1800cc
6th Prefix Number (transmission & steering) 1 - Manual 4 speed RHD 2 - Manual 4 speed LHD		8th Prefix Number (assembly plant) G - Abingdon	7th Prefix Number (model change) A - 1980 model year

Location Of Unit Numbers

The Car Number is stamped on a plate secured to the left-hand wing valance forward of the radiator.

The Body Number is stamped on a plate secured to the righthand front valance behind the radiator diaphragm.

The Engine Number is stamped on a plate secured to the right-hand side of the cylinder block.

The Gearbox Number is stamped on the top of the gearbox casing adjacent to the dipstick.

The Overdrive Unit Number is stamped on the solenoid side cover on the righthand side of the unit.

The Rear Axle Number is stamped on the front of the axle tube on the lefthand side adjacent to the spring seat.

General Information	_____

Note: These pages list only the major items in each area, such as body work, electrical and brake components.

In many cases minor fittings, clamps and linkages etc... are not shown. In most circumstances Moss can supply both an OE (Original Equipment) part or an aftermarket part. The aftermarket part offers a high quality part but usually at a reduced price and in certain circumstances replaces the OE part when no longer available.

The aftermarket part is indicated by a letter "Z" at the end of the part number.

3 Main Bearing Engines

External & Internal Engine (18G & GA) 1962-64

Our 'Lead Free' Full Engines are rebuilt by a major engine re-conditioner. They are supplied without a water pump & front pulley. All units are supplied with rocker cover, sump and side covers. They are not supplied with rear engine plate.

1800cc (Standard) Lead Free Engines

Ill	Part Number	Price £ea.	Description	Req.	Details
1	48G343E	£1,948.00	ENGINE ASSEMBLY, 1800cc, recon	1	standard 8.75:1
	48G343BE	£2,099.00	ENGINE ASSEMBLY, 1800cc, recon	1	standard, balanced unit
	48G343BF	£2,465.00	ENGINE ASSEMBLY, 1800cc, recon (Includes: flywheel & clutch).	1	standard, balanced unit
	48G343ST2	£3,025.00	ENGINE ASSEMBLY, 1860cc, recon (Includes: flywheel & clutch).	1	stage 2, balanced unit
Engine Components					
2	12H961	£212.70	PISTON SET, standard	1	8.75:1 compression
	12H961/20	£212.70	PISTON SET, 0.020"	1

65	51K282	£3.70	STUD, Short, (cylinder head)	7	
	51K281SET	£40.10	STUD KIT, (cylinder head)	1	includes 11 studs
70	FHS2515	£1.55	STUD, Long, (manifold to head)	4	
71	FHS2513	£1.18	STUD, Short, (manifold to head)	2	
72	1G2418	£1.40	YOKE	4	
73	GHF332	£0.43	WASHER, spring	6	
74	GHF261	£0.55	NUT, brass	6	

5 Main Bearing Engines

Full Engine Units (18GB & Future) 1964 on

Our 'Lead Free' Full Engines are rebuilt by a major engine re-conditioner. They are supplied without a water pump & front pulley. All units are supplied with rocker cover, sump and side covers. They are not supplied with rear engine plate.

Note: A refundable surcharge applies to units unless the customers own unit is supplied to be reconditioned.

1800cc (Standard) Lead Free Engines

Cylinder Head, Thermostat & Fittings

(18GB & Future) 1964 on

Lead Free Cylinder Heads

Our rebuilt heads come complete with valves, guides, springs, collars, collets and valve stem oil seals already assembled. Fully assembled cylinder heads can be interchanged - ensure rocker feed is correct, i.e. direct oil feed or offset oil feed.

ill	Part Number	Price £ea.	Description	Req.	Details
1	48G318LF	£483.80	CYLINDER HEAD ASSEMBLY, lead free (Reconditioned/Exchange)	1	18GB, 18GD, 18GG 1964-70
	48G318N	£566.00	CYLINDER HEAD ASSEMBLY, lead free (Brand New Unit)	1	
	12H2708LF	£408.00	CYLINDER HEAD ASSEMBLY, lead free (Reconditioned/Exchange)	1	18V 581/582/583
	12H2708N	£612.50	CYLINDER HEAD ASSEMBLY, lead free (Brand New Unit)	1	18V 779/780, 1970-74
	12H4735LFE	£510.00	CYLINDER HEAD ASSEMBLY, lead free (Reconditioned/Exchange)	1	
	12H4735LF	£573.80	CYLINDER HEAD ASSEMBLY, lead free (Brand New Unit)	1	18V 846 on, 1975 on rubber bumper
	12H4735	NCA	CYLINDER HEAD, (bare) (Bare, with guides, recon/exchange)	1	
2	12H1836	NCA	ROCKER COVER, (standard)	1	
3	GAC4069P	£45.40	ROCKER COVER, alloy, polished	1	without vent pipe
	GAC4069X	£67.40	ROCKER COVER, alloy, crackle finish	1	without vent pipe
	GAC4069FK	£20.80	FITTING KIT, rocker cover, chrome (Inc items: 6, 8, 9, 10 & chrome oil cap).	1	1964-67
	GAC4069FKL	£25.50	FITTING KIT, rocker cover, chrome (Inc items: 7, 8, 9, 10, chrome oil cap & dome nut).	1	1967 on
	GAC4069WK	£8.00	WASHER KIT, rocker cover, chrome (Inc items: 8, 9 & 10).	1	fits all types

Fitting an alloy rocker cover

If you are fitting an alloy rocker cover please select the correct fitting hardware for your car. The easiest way to identify which fittings you need is to look at the heater return pipe. If it runs along side the rocker cover then use our fitting kit (Part No: GAC4069FK), this includes a chrome oil cap, chrome nuts, spacers, cup washers & grommets. Later cars, 1967 on have the heater return pipe running along the top of the rocker cover. Use our fitting kit (Part No: GAC4069FKL) which includes a chrome oil cap, special rocker cover nut/stud, chrome domed nuts, spacers, cup washers & grommets.

4	GFE6003	£5.20	CAP, oil filler, (with breather)	1	standard cover
5	AJM402	£1.90	GASKET, rocker cover	1	
	296-311	£16.20	GASKET, rocker cover, silicone	1	standard cover
	296-312	£21.00	GASKET, rocker cover, silicone	1	alloy cover
6	12A1968	£6.00	BRACKET, engine lifting* (Remove before closing bonnet).	2	

*Note: When using lifting brackets, a safety strap should also be used around the engine.

7	2A150	£1.55	NUT, rocker cover	2	to 1967
	2A150CP	£3.50	NUT, rocker cover, chrome	2	alternative
8	12H2557	£3.80	NUT, rocker cover, with stud (For steel rocker covers).	2	1967 on
	12H2557L	£5.40	NUT, rocker cover, with stud, long (For alloy rocker covers).	2	
9	1B2925	£1.40	SPACER	2	
	CAM6921	£2.00	SPACER, chrome	2	alternative
10	1A2156	£1.18	CUP WASHER	2	
	12G679	£1.45	CUP WASHER, chrome	2	alternative
11	12A1358	£0.79	GROMMET, rubber	2	
12	GHF301	£0.10	WASHER, plain	2	
13	GHF332	£0.43	WASHER, spring	2	
14	GHF201	£0.18	NUT, plain	2	
	14B2685	£2.50	NUT, domed, chrome	2	alternative
15	CRCP349	£3.70	PLATE, 'MG', (metal/riveted)	1	alternatives

47	BH605141	£1.18	BOLT, long	2	
	BH605101	£1.01	BOLT, short	2	
48	GHF332	£0.43	WASHER, spring	4	
70	GRH305SK	£82.60	SILICONE HOSE SET	1	chrome bumper (Includes: top, bottom and 2 heater hoses).

18V on Fan, Water Pump & Pulley 1971-76

36	12H1058	£60.50	FAN, 3 blade metal	1	
37	12H4744	NCA	FAN, 7 blade plastic	1	From GHN5 345391
NI	AHH6999K	£46.80	FAN, 7 blade plastic	1	1972-76

NI	AHH6999Z	£42.20	FAN, 7 blade, plastic, Cobalt	1	1972-76
----	----------	--------	-------------------------------	---	---------

Note: This is the 7 blade nylon fan blade, AHH6999Z, almost a Hot Climate Fan, for the earlier model MGB with an adaptor which allows the fan to fit the later chrome bumper and early rubber bumper models; it is good for 18V engines.

39	12H1388	£0.72	LOCK TAB	2	
40	PWZ204	NCA	WASHER, flat	4	use with metal fans
41	12H1062	£0.71	SPACER TUBE	4	
42	12H1060	£0.90	GROMMET	4	
44	GCB10900	£6.40	FAN BELT, cogged	1	chrome bumper
	GCB10950	£7.60	FAN BELT	1	rubber bumper
49	12H3696	NCA	PULLEY	1	chrome bumper
50	12H3910	£31.10	SPACER	1	metal fan
51	GHF118	£0.77	BOLT	4	
	BH604151	£1.06	BOLT	4	plastic fan
52	GHF331	£0.41	WASHER, spring	4	
53	CHM56	NCA	PULLEY	1	rubber bumper
54	CAM1599	£12.00	SPACER, fan pulley	1	
55	GWP130	£36.00	WATER PUMP, with gasket	1	
	GWP130A	£33.70	WATER PUMP, aluminium	1	18V engines, 1970 on
56	BH605141	£1.18	BOLT, long	1	
57	GHF103	£0.65	SCREW, short	3	
58	GHF332	£0.43	WASHER, spring	4	
59	JAM2036	£0.77	GASKET, water pump	1	

Note: There was an alternative water pump used on US & Canada specification models, 1968-71 which also featured a smog pump. This water pump has thicker bolt bosses to allow clearance for the smog pump brackets. If required please order parts listed below:

	GWP117	£68.40	WATER PUMP, with gasket (3.26" from pulley flange front face to block face).	1	
	BH605161	£1.12	BOLT, pump to block, 2"	1	
	BH605141	£1.18	BOLT, pump to block, 1 3/4"	1	US & Canada
	SH605101	£0.95	SCREW, pump to block, 1 1/4"	1	specification 1972-74
	GHF104	£0.71	SCREW, pump to block, 1 1/2"	1	
	GHF332	£0.43	WASHER, spring	4	
	GHF301	£0.10	WASHER, plain	2	
	JAM2036	£0.77	GASKET, water pump	1	

Fan Shroud (Air Flow Improver) 1962-76

This shroud is suitable for 1962-76 models, it will significantly improve your fan efficiency and air flow by 'forcing & directing' air through the radiator (rather than around it) - especially useful if you have modified your engine and increased power output. This well made shroud attaches to your existing radiator mountings.

60	459-685	£70.00	FAN SHROUD	1	
70	GRH305SK	£82.60	Hose set, silicone	1	Includes top, bottom & 2 heater hoses

Note: For radiator air ducts please refer to page 194.

Clutch & Brake Fluids

When did you last change your Clutch/Brake fluid?

DOT3 fluid ought to be completely discarded, DOT4 ('GBF4') should be installed and replaced every 2 years, as recommended by manufacturers. An alternative, especially if you are replacing master cylinders, brake calipers and/or wheel cylinders, is to thoroughly flush out the pipes and install Silicone fluid (DOT5 'ABF'), which is 'Non-Hygroscopic', so it doesn't promote rust problems in the hydraulic system. The bonus is that it won't damage paint work.

When silicone is in use it will provide years of trouble free braking and an end to the monotonous and expensive pastime of repairing or replacing worn or leaking hydraulic components. Racing Fluid (DOT5.1 'GBF5') really is the ultimate in brake fluid. Its anti-boil properties mean that even when the brakes get hot the fluid will remain efficient, rather than boiling locally (such as in the calipers) into useless vapour. Ideal on the race track or when the brakes are used to their limits. Due to its high 'Hygroscopic' nature, DOT5.1 Racing fluid should be replaced annually otherwise the quality and effectiveness will be drastically reduced.

Brake/Clutch Fluid (DOT4 Specification)

Part Number	Price £ea.	Description	Req.	Details
NI GBF4102	£7.40	BRAKE/CLUTCH FLUID, DOT4	a/r	500ml
NI GBF4103	£13.70	BRAKE/CLUTCH FLUID, DOT4	a/r	1 litre
NI GBF4104	£53.00	BRAKE/CLUTCH FLUID, DOT4	a/r	5 litre

Racing Brake/Clutch Fluid (DOT5.1 Specification)

NI GBF5102	£11.90	BRAKE/CLUTCH FLUID, DOT5.1	a/r	racing, 500ml
NI GBF5103	£17.10	BRAKE/CLUTCH FLUID, DOT5.1	a/r	racing, 1 litre

Clutch Hydraulics

3	GRK3007	£15.80	SEAL KIT, master cylinder	1	
	GRK3007Z	£4.56	SEAL KIT, master cylinder, aftermarket	1	

Note: Original Master Cylinders (1a & 1b) are no longer available, they have been superseded by replacement Master Cylinders (1c & 1d). These can be easily identified by looking for the concentric rings on the barrel of the cylinder (at A and/or B). A final check can be made by looking at the main piston, if it has a 'Raised Shoulder' on the pressure end, it is designed to take the later type kit 4. If it is 'Flat' across the pressure end, it is designed to use the early type seal kit 3. (See also Brakes).

49	1B3363	NCA	LOCKTAB, reverse idler	1	original type
	AEC340	£1.79	LOCKTAB, reverse idler	1	alternative

Note: The original locktab (Part No.: 1B3363) is no longer available. Please use alternative locktab (Part No.: AEC340). To use AEC340 for gearbox reverse idler locking bolt applications the locktab should be cut half way along the joining bar. The locktab can then be positioned on the reverse idler retaining bolt. The bolt should be installed and torque to the correct setting ensuing the locktab bar is positioned to act against the gearbox casing, the locktab can then be bent up to lock the bolt head.

17	AHH5383A	£1.99	OLIVE	2	
18	AHH5385	£5.50	NUT	2	
19	PCR509	£1.18	CLIP, to boot floor	1	

Roadster 1964 on: from GHN3 44439 & All GTs

25	AZX1307	£132.80	FUEL PUMP, dual polarity	1	original
	AZX1307Z	£81.70	FUEL PUMP, dual polarity	1	aftermarket
	AZX1307EN	£146.20	FUEL PUMP, negative earth, electronic	1	
26	AUB6106A	£15.00	POINT SET	1	
	EPK12N	£79.20	CONVERSION KIT, electronic points	1	negative earth
27	WZX1710	£39.90	DIAPHRAGM KIT, fuel pump	1	with gasket
28	AUB809	£1.39	GASKET, diaphragm	1	
29	AHH6703	£25.10	PIPE, tank to pump (Use with screw-on pump banjo).	1	
	HFP8	£22.70	PIPE, tank to pump, 14", metal	1	use if earlier tank fitted

Note: HFP8 is for use on 1977-80 rubber bumper cars fitted with an earlier type of fuel tank with a threaded fuel pick-up in the body of the tank not the fuel tank sender unit. This pipe has a nut & olive at one end and is plain for a push on hose at the other.

30	AHH5383A	£1.99	OLIVE	a/r	
31	AHH5385	£5.50	NUT	a/r	
32	AUC1833	£10.90	BANJO, screw-on fitting, pump inlet	1	1964-76
33	AUC2698	£5.20	BANJO BOLT	2	
34	AUC2141	£0.46	WASHER, sealing	4	
	AUB654	£0.67	'O' ring*	2	
35	AHH7371	£13.10	HOSE, pump to carb pipe, petroflex	1	
36	GGT1117X	£1.66	CLIP	a/r	

Note: 1977-80 models have a push-on fuel pick-up incorporated into the tank sender unit (Part No: ADU3218) and use twin push on banjos and plain rubber hose to connect to the fuel pump. The fuel pump is also mounted in a rubber bush through the boot floor.

*Note: Some SU pumps have a recess instead of a flat seating surface on the inlet & outlet ports which needs an 'O' ring. The fibre washer is still used under the banjo bolt head but you only need 2.

40	BHH1940	£6.70	BANJO, push-on fitting, pump inlet	2	1977-80
41	AUC2698	£5.20	BANJO BOLT	2	
42	AUC2141	£0.46	WASHER, sealing	4	
	AUB654	£0.67	'O' ring*	2	
43	149608M	NCA	HOSE, rubber, per metre (Cut 56cm/22" for tank to pump hose) (Cut 21cm/8" for pump to carb feed pipe)	1	
44	GGT1113X	£2.20	HOSE CLIP	4	

*Note: Some SU pumps have a recess instead of a flat seating surface on the inlet & outlet ports which needs an 'O' ring. The fibre washer is still used under the banjo bolt head but you only need 2.

45	AHH6995	£33.90	PIPE, carb feed	1	
46	PCR509	£1.18	CLIP, to boot floor	1	1962-76
	PCR809	£1.18	CLIP, to boot floor	1	1977-80

Fuel Pump Mountings

50	AHH6709	£10.30	BRACKET, fuel pump	1	
51	AHH6708	£2.27	MOUNTING, fuel pump, rubber	1	
52	SH604051	£0.34	SCREW, clamping	1	1962-76
53	GHF300	£0.24	WASHER, flat	3	
54	GHF331	£0.41	WASHER, spring	3	
55	GHF200	£0.24	NUT	3	
56	BHH1635	£11.30	MOUNTING, fuel pump, rubber	1	1977-80
57	GHC11080	£4.30	CLAMP, locating	1	

Note: The 1977-80 MGB was fitted with a pump cover. This does not appear in the original factory parts list and is no longer available.

Fuel Pump Breathers

60	GWW202M	£1.90	BREATHER HOSE, 24", cap	1	per metre, cut to size

HIF4 SU Carburettors 1972 on

Types AUD434, AUD616 & FZX1001 & FZX1229T

The identification tag carrying the carb number is a rectangular plate attached to one of the three dash pot cover screws on each unit.

Ill	Part Number	Price £ea.	Description	Req.	Details
1	AUD434	NCA	CARBURETTORS, (pair)	1	1972
	AUD616	NCA	CARBURETTORS, (pair)	1	1973-74
	FZX1001	NCA	CARBURETTORS, (pair)	1	1974-76
	FZX1229T	NCA	CARBURETTORS, (pair)	1	1976 on
Note: The above listing details the original HIF4 type of carburettors. These are all now replaced with FZX1229T for all 1972 on cars. The specific needle for the application should be purchased separately.					
	FZX1229T	NCA	CARBURETTORS, new, (pair)	1	replaces all types

52	AHH6540	£42.00	TOOL BAG	1	

Note: For more wheel options please see the Accessories section.

How To Balance Centre Lock Wire Wheels

We show here the advice given to tyre fitters, produced by Motor Wheel Service.

These notes are intended as a guide in helping to solve problems that are commonly encountered when balancing centre lock wire wheels on an electronic balancer. The diagrams show the centre spline of a wire wheel attached to a balancer.

Diagram A: Is the correct method of locating the wheel.

Diagram B: Shows the wrong method and one which gives false readings, giving the appearance of untrue or wheels that require large amounts of weights to balance the wheel.

Points To Check

- The original high degree of balance may be affected by wheel damage as well as by factors related to the tyres uneven tread wear, cover or tube repairs.
- If roughness or high speed steering troubles develop, and this cause is not disclosed by mechanical investigation, then the complete tyre & wheel assembly should be checked for balance.
- It is IMPERATIVE that the hubs are located in the balancing machine in exactly the same manner as located on the car, and the factory truing jigs. Alternatively, balance on the vehicle, this operation can only be done on the front wheels.

1	GMC150	£69.30	MASTER CYLINDER, brake	1	} plastic reservoir } metal reservoir } remote reservoir, } Benelux system
	GMC150CG	£35.80	MASTER CYLINDER, brake, Classic Gold	1	
	GMC1500E	NCA	MASTER CYLINDER, brake	1	
	BAU1715	NCA	MASTER CYLINDER, brake	1	
2	GRK1026	£8.88	SEAL KIT, original m/cylinder	1	
3	GRK3004Z	£5.28	SEAL KIT, aftermarket m/cylinder	1	
<p>Note: As there have been original and aftermarket master cylinders available for some time both with metal reservoirs, it is important to check the identification of the master cylinder fitted to the car if you wish to rebuild it with a seal kit. The replacement master cylinder can be easily identified by looking for the concentric rings on the barrel of the cylinder (at A and /or at B). A final check can be made by looking at the main piston: If it has 1 cup seal & one ring seal and is flat across the pressure end, it is designed to use the original type seal kit (2). If it has 2 ring seals and a raised shoulder on the pressure end, it is designed to take the later type kit (3).</p>					
4	513123A	£4.00	FILLER CAP, (plastic)	1	
5	17H7985	£14.20	PUSH ROD	1	
6	17H7560	£1.40	CIRCLIP	1

Clutch & Brake Fluids

When did you last change your Clutch/Brake fluid?

DOT3 fluid ought to be completely discarded, DOT4 ('GBF4') should be installed and replaced every 2 years, as recommended by manufacturers. An alternative, especially if you are replacing master cylinders, brake calipers and/or wheel cylinders, is to thoroughly flush out the pipes and install Silicone fluid (DOT5 'ABF'), which is 'Non-Hygroscopic', so it doesn't promote rust problems in the hydraulic system. The bonus is that it won't damage paint work.

When silicone is in use it will provide years of trouble free braking and an end to the monotonous and expensive pastime of repairing or replacing worn or leaking hydraulic components. Racing Fluid (DOT5.1 'GBF5') really is the ultimate in brake fluid. Its anti-boil properties mean that even when the brakes get hot the fluid will remain efficient, rather than boiling locally (such as in the calipers) into useless vapour. Ideal on the race track or when the brakes are used to their limits. Due to its high 'Hygroscopic' nature, DOT5.1 Racing fluid should be replaced annually otherwise the quality and effectiveness will be drastically reduced.

Brake/Clutch Fluid (DOT4 Specification)

ill	Part Number	Price £ea.	Description	Req.	Details
NI	GBF4102	£7.40	BRAKE/CLUTCH FLUID, DOT4	a/r	500ml
NI	GBF4103	£13.70	BRAKE/CLUTCH FLUID, DOT4	a/r	1 litre
NI	GBF4104	£53.00	BRAKE/CLUTCH FLUID, DOT4	a/r	5 litre

Racing Brake/Clutch Fluid (DOT5.1 Specification)

NI	GBF5102	£11.90	BRAKE/CLUTCH FLUID, DOT5.1	a/r	racing, 500ml
NI	GBF5103	£17.10	BRAKE/CLUTCH FLUID, DOT5.1	a/r	racing, 1 litre

(Use to correctly align steering rack & column).

Quick Rack Assembly (Performance)

These Quick Racks are designed to reduce the number of turns lock-to-lock to just 2.6. You can choose to replace either the standard unit with a whole Quick Rack Assembly (with new rack bar and matched pinion inside a reconditioned assembly), or, you can just replace the rack bar and pinion in your own original assembly.

Note: No alterations required. Not suitable for MGB V8.

10	7H5339	NCA	BOLT, retaining	2	
11	7H5000	NCA	COVER BAND	1	
12	7H5498	NCA	END PLATE	1	includes 13, 14, & 15
13	24A2958A	NCA	BUSH, rear	1	
14	GSB102	£3.40	BRUSH SET	1	
15	27H2291	NCA	SPRING, brush	1	

4 Synchro Models & Automatic, Pre-Engaged Type Starter M418G & 2M1001968 on

We offer reconditioned/exchange starter motors and two direct replacement alternatives.

16	13H6130E	£129.55	STARTER MOTOR, recon/exchange	1	1968-72
			(Original type of starter for 68-72 models).		
	GXE4441Z	£134.60	STARTER MOTOR, recon/exchange	1	1968 on
			(Fits all 1968 on models).		
	GXE4441B	£90.10	STARTER MOTOR, new, modern type	1	

Note: This modern type starter motor uses high efficiency components, and is a lightweight and reliable direct replacement alternative to the original equipment.

	GXE4441X	£225.60	STARTER MOTOR, new, high torque	1	
Note: Our High Torque type starter motors are a direct replacement for the original unit and are geared for maximum cranking power, particularly suitable for high compression competition engines.					

17	BHH790	NCA	GAITER, (waterproof)	1	
18	BH506141	£1.36	BOLT, (top)	1	
19	GHF105	£0.44	BOLT, (lower)	1	
20	GHF333	£0.34	WASHER, spring	2

Dynamo Polarisation

Any replacement dynamo must be polarised to suit the vehicle's electrical system, and therefore the following procedures must be adopted:

1. Fit the dynamo to the vehicle, but do not at this stage connect any leads to the terminals.
2. Determine which terminal of the battery is 'live' (i.e. not earthed to the vehicle), and connect a length of wire to that terminal. If it is inconvenient to connect the wire directly to the battery, it may instead be connected to the 'battery side' terminal of the starter solenoid.
3. Taking the free end of the wire, hold it against the field terminal (the small one) of the dynamo for three to five seconds, after which the dynamo is correctly polarised.
4. Remove the temporary connector wire and then restore the original leads to the terminals of the dynamo.

18GD Alternator 16AC

Separate Regulator Box 1968 Only

Distributor & Ignition System

Distributors

Two types of Lucas distributors were used on home market production. They are:- Type A 25D4 from 1962-74, Type B 45D4 from 1974 on. The Lucas number of the distributor has been quoted for ease of identification & reference. This number can be found stamped on the main body of the distributor, close to the vacuum unit.

Type A: Lucas 25D Distributors - 1962-74

Ill	Part Number	Price £ea.	Description	Req.	Details
1	12H792	£95.80	DISTRIBUTOR (LU No: 40897), new	1	1962-67, 18G-18GB
	12H2722	£95.80	DISTRIBUTOR (41155) spec, new	1	1967-70, 18GD-18V581/582/583
	12H2894	£95.80	DISTRIBUTOR (41288) spec, new	1	1962-70, 18G-18V
	12H3580	£95.80	DISTRIBUTOR (41339) spec, new	1	1971-74, 18V779/780
	143-114	£44.20	DISTRIBUTOR, 45D4 alternative	1	1962-74
	12H5038	£89.70	DISTRIBUTOR, 45D4 alternative	1	requires GHT184 leads

Fitting Replacement Distributors

The replacement distributors above are manufactured with the push-on connections on the vacuum unit instead of the original screw connection used on early cars. To connect the metal vacuum advance pipe, remove the nut & olive from the distributor end of the vacuum pipe and make the connection with the straight adaptor (Part No. 12B2062). Alternatively replace the metal pipe with the plastic version & connectors.

12B2062	£1.66	CONNECTOR, rubber, angled	a/r
12B2095	£2.10	CONNECTOR, rubber, straight	a/r
37H4229M	£1.79	VACUUM PIPE, plastic	a/r

	BMK2508H	£20.70	LIGHT UNIT, 60/50 watts, LHD	2	(without pilot)

Wipac Headlamp Conversions

Fitting modern H4 halogen headlamps is one of the most worthwhile safety improvements you can make to your classic, offering a better light output, and with the convenience of being able to change just the bulb instead of the whole unit should it need replacing.

NI	GAC4022	£51.90	HEADLAMP CONVERSION, no pilot, RHD	1	Wipac
	MGE203	£68.50	HEADLAMP CONVERSION, no pilot, LHD	1	Wipac

					1970-71 GT, G-HD5-219001-258003

1971-72 Harnesses

Introduction of radio and tunnel consoles. Negative earth.

1	BHH644	£268.00	WIRING LOOM, main, PVC, Roadster & GT	1	1971-72 Roadster, G-HN5-258001-294250
2	BHH386	£74.00	WIRING LOOM, rear, PVC, Roadster	1	
	BHH385	£74.00	WIRING LOOM, rear, PVC, GT	1	
					1971-72 GT, G-HD-258004-296000

1972-73 Harnesses

'RVC' tachometer fitted: Identified by 'RVC' printed on tacho. dial rather than 'RVI'. Negative earth.

1	BHH1128	£268.00	WIRING LOOM, main, PVC, Roadster & GT	1	1972-73 Roadster, G-HN5-294251-328100
2	BHH386	£74.00	WIRING LOOM, rear, PVC, Roadster	1	
	BHH385	£74.00	WIRING LOOM, rear, PVC, GT	1	
					1972-73 GT, G-HD5-296001-328800

1973-74 Harnesses

Hazard warning lights: No. plate lights now on rear bumper, no overriders. Negative earth.

1	BHH1495	£268.00	WIRING LOOM, main, PVC, Roadster & GT	1	1973-74 Roadster, G-HN5-328101-360300
2	BHH386	£74.00	WIRING LOOM, rear, PVC, Roadster	1	
	BHH385	£74.00	WIRING LOOM, rear, PVC, GT	1	
					1973-74 GT, G-HD5-328801-361000

1974-6 Harnesses

Early rubber bumper models with column stalk overdrive switch. Negative earth.

1	BHH1749	£307.00	WIRING LOOM, main, PVC, Roadster & GT	1	1974-76 Roadster, G-HN5-360310-410000
2	BHH1739	£82.30	WIRING LOOM, rear, PVC, Roadster	1	
	BHH1742	£82.30	WIRING LOOM, rear, PVC, GT	1	
					1974-76 GT, G-HD5-361001-410350

1976-77 Harnesses

Later rubber bumper models, single line brakes, O/D switch on gear knob. Negative earth.

1	BHH2034	£295.00	WIRING LOOM, main, PVC, Roadster & GT	1	1976-77 Roadster, G-HN5-410001-437180
2	BHH1739	£82.30	WIRING LOOM, rear, PVC, Roadster	1	
	BHH1742	£82.30	WIRING LOOM, rear, PVC, GT	1	
3	BHH2036	£108.50	WIRING LOOM, dash, PVC, Roadster & GT	1	1976-77 GT, G-HD5-413051-436460

1977 Harnesses

Dual line braking introduced.

1	BHH2196	£295.00	WIRING LOOM, main, PVC, Roadster & GT	1	1977 Roadster, G-HN5-437181-471000
2	BHH1739	£82.30	WIRING LOOM, rear, PVC, Roadster	1	
	BHH1742	£82.30	WIRING LOOM, rear, PVC, GT	1	
3	BHH2036	£108.50	WIRING LOOM, dash, PVC, Roadster & GT	1	1977 GT, G-HD5-436465-471000

1978 Harnesses

Re-introduction of early 18ACR alternator, terminal with 2 large, 1 small, spade connections.

1	BHH2255	£295.00	WIRING LOOM, main, PVC, Roadster & GT	1	1978 Roadster, G-HN5-471001-501003
2	BHH1739	£82.30	WIRING LOOM, rear, PVC, Roadster	1	
	BHH1742	£82.30	WIRING LOOM, rear, PVC, GT	1	
3	BHH2036	£108.50	WIRING LOOM, dash, PVC, Roadster & GT	1	1978 GT, G-HD5-471001-501035

1979 Harnesses

Rear fog lamps fitted.

1	BHH2383	£295.00	WIRING LOOM, main, PVC, Roadster & GT	1	1979 Roadster, G-HN5-501004-511519
2	BHH2382	£71.90	WIRING LOOM, rear, PVC, Roadster	1	
	BHH2441	£81.00	WIRING LOOM, rear, PVC, GT	1

Door Cappings, Finishers & Fixings

Our door cappings are made to original specifications. Where applicable the wood bases come with helicoil screw threads, inner door glass weather strips are already attached and matching piping has been fitted. From 1970 the door cappings were padded.

Note: All door cappings are sold in pairs.

Body Paint & Body Striping Kits

We stock the 'Classic Car Colours' range of paints. Listed here are the relevant MGB colours. The colours are carefully blended to be an exact match to the original paint as used by the factory, but it is worth observing that your car may well have faded from its original colour over the years. For this reason before you start, we recommend that you do a test spray of any aerosol on a piece of old metal or a carefully selected area of the car where a mismatch will not be noticed. The boot or spare wheel area is often a convenient place to do your testing.

We can supply paint in either aerosol or brush-on format. The aerosols come in 400ml cans and the brush-on paints are available in 125ml cans with a brush in the cap (except for engine and chassis paints, which are supplied in 500ml tins).

Hoods & Tonneau

There were four types of hood originally fitted to MGB models, detailed below. Our range of hoods is made to the highest standard using only quality materials and special bucks and jigs to ensure accuracy of fit. We offer hoods in two grades of vinyl; our OE grade is a material of equal quality to that used during production, and our aftermarket grade is made from slightly lighter material. We also offer hoods in Double Duck and Mohair materials. Please check the features to ensure you order the correct hood for your requirements.

The hoods detailed below are listed as original in black only. Colour hoods are available to special order. Please contact our sales staff with your requirements

FEATURES:

The key features of the hoods are shown in the RH column.

WHR = with header rail

NHR = no header rail

ZRW = with zip out rear window

FRW = Fixed rear window

1 MGB & MGC 1963-70 Packaway Style Hood (Grey 2 Part Frame)

This style of hood and frame is designed to be removed from the car and stowed in the boot when not in use.

Part Number	Price £ea.	Material	Colour	Features
AHH8516	£520.80	Vinyl, OE grade	Black	WHR FRW
AHH8516B	£326.40	Vinyl, OE grade	Black	WHR FRW
AHH8516Z	£380.50	Vinyl, aftermarket	Black	NHR FRW
AHH8516ZW	£393.60	Vinyl, aftermarket	Black	NHR ZRW
AHH8516DD	NCA	Double Duck	Black	NHR FRW
AHH8516WDD	NCA	Double Duck	Black	NHR ZRW
AHH8516MH	£839.80	Mohair	Black	NHR FRW

2 MGB & MGC 1963-70 De-Luxe Style Hood (Grey Folding Frame)

The Packaway frame is designed to be folded into the rear cockpit area.

AKE5372	£520.80	Vinyl, OE grade	Black	WHR FRW
AKE5372Z	£367.50	Vinyl, aftermarket	Black	NHR FRW
AKE5372DD	NCA	Double Duck	Black	NHR FRW
AKE5372MH	£678.70	Mohair	Black	NHR FRW
AKE5372WMMH	£689.80	Mohair	Black	NHR ZRW

3 MGB 1970-76 Hood (Black Folding Frame)

This style of hood is permanently attached to the car and folds into the rear of the cockpit. The hood features a fixed rear window. A later hood (HZA5123 type) can be fitted to give the benefit of a zip-out rear window.

BHH905	£520.80	Vinyl, OE grade	Black	WHR FRW
BHH905Z	£359.20	Vinyl, aftermarket	Black	NHR FRW
BHH905WOB	£436.90	Vinyl, OE spec	Black	NHR FRW
BHH905DD	NCA	Double Duck	Black	NHR FRW
BHH905MH	£615.20	Mohair	Black	NHR FRW
BHH905MHR	£783.40	Mohair	Black	WHR FRW

4 MGB 1976 on Hood With Zip Out Window (Black Folding Frame)

Based on the same frame as 1970-76 models but with a zip-out rear window.

HZA5123	£520.80	Vinyl, OE grade	Black	WHR ZRW
HZA5123XHR	£645.40	Vinyl, OE grade	Beige	WHR ZRW
HZA5123Z	£397.70	Vinyl, OE grade	Black	NHR ZRW
HZA5123WOB	£397.80	Vinyl, aftermarket	Black	NHR ZRW
HZA5123DD	NCA	Double Duck	Black	NHR ZRW
HZA5123MH	£629.20	Mohair	Black	NHR ZRW
HZA5123MHB	£673.20	Mohair	Black	NHR ZRW
HZA5123MHR	£805.20	Mohair	Black	WHR ZRW

Tonneau Covers

Tonneau covers are generally stocked in black, although there many other factory colours, other colours and special requirements may be available to order, please contact your nearest branch for more information.

FEATURES:

The key features of the hoods are shown in the RH column.

DHR = with D section head rest pockets

OHR = with Oval section head rest pockets

XHR = without head rest pockets

SSB = static seat belt fitted to rear deck

Hardtop

A wealth of different hard top styles were (and a few still are) offered for MGB's. However, only one was ever offered by the factory. This listing of parts is concerned with the factory hard top only, so any interchangeability between parts shown here and parts for aftermarket hard tops is, as they say in film title disclaimers, purely coincidental (and fortuitous). Don't build your hopes up too high on parts availability here.

III.	Part Number	Price £ea.	Description	Req.	Details
1	MGH001	£1,074.20	HARDTOP, black gloss	1	} works style
	MGH003	£1,074.20	HARDTOP, white gloss	1	} with fittings

A fibreglass hardtop is the ultimate accessory for comfortable year round motoring. The secure stainless steel mounting system assures a tight fit and ease of removal. Supplied fully assembled and ready to fit, complete with a perspex rear window, this hardtop has a brushed nylon interior with a choice of either gloss black or white external finish. Fittings included, original fittings listed below will not fit.

	453-622	£18.60	ALIGNMENT TOOL, steering rack	1	

87	17H6562	£3.70	NUT	1
88	17H6564	£1.45	GASKET, cover	1
89	17H6563	NCA	COVER	1

Note: Although not required for the 1962-66 MGB, the alignment tool is ideal for the individual with a 1967 or later MGB, because the alignment tool is needed to properly install the rack. This alignment tool is absolutely critical because you cannot properly align the steering column and steering shaft without them. Complete instructions covering the installation and alignment are included.

	AHH9268G	£1.79	BADGE, hub cap, gold	4	
7	BHH1019	NCA	WHEEL, alloy/chrome, 5.5J	4	

MGB Export Parts Supplement

Export Market Components (Not USA)

Note: The vast majority of export market MGB components are shown in our Northern American Specification MGB Parts Catalogue. However, there are differences between the various export markets, for instance the fascia switches on late Canadian, German and Swedish cars fit in the same fascia as USA spec. cars, but have symbols rather than text printed on them. Where components for export cars both differ from home market models and USA spec. models, they are listed in the following sections.

Engine Controls

Part Number	Price Eea.	Description	Req.	Details
AHH6501	NCA	ACCELERATOR PEDAL, LHD	1	To GHN/D3 138400
AHC647	NCA	ACCELERATOR PEDAL, LHD	1	GHN/D4 138401 To GHN/D5 360300
BHH1106	NCA	ACCELERATOR PEDAL, LHD	1	GHN/D5 360301 To GHN/D5 410000
BHH1971	NCA	ACCELERATOR PEDAL, LHD	1	To GHN/D3 138400
AHH6998	NCA	ACCELERATOR CABLE, LHD	1	To GHN/D3 138400
AHH8463	£7.40	ACCELERATOR CABLE, LHD	1	GHN/D4 138401 To GHN/D5 360300
BHH1649	£29.60	ACCELERATOR CABLE, LHD	1	GHN/D5 360301 on (not suitable for single Zenith carb)
BHH650	£15.96	CHOKE CABLE, LHD	1	To GHN/D5 258000
BHH950	NCA	CHOKE CABLE, LHD	1	GHN/D5 258001 To GHN/D5 410000
BHH2064	£13.08	CHOKE CABLE, LHD	1	GHN/D5 410001 on (not suitable for single Zenith carb)
BHH1120	£12.00	ACCELERATOR CABLE	1	
BHA4753	NCA	CLIP, kick down cable (Kick down cable to accelerator cable).	1	automatic (LHD)

Steering

AHH6121Z	£208.50	STEERING RACK, LHD	1	To GHN/D5 360300 all chrome bumper
GSR132	£208.50	STEERING RACK, LHD	1	GHN/D5 360301 on all rubber bumper

Clutch Hydraulics

AHH6505	NCA	CLUTCH PEDAL, LHD	1	Single line brake models
BHH1309	NCA	CLUTCH PEDAL, LHD	1	Dual line brakes with direct acting servo, To GHN5 386600
BHH1901	NCA	CLUTCH PEDAL, LHD	1	Dual line brakes with direct acting servo, From GHN5 386601
ACB8754	£24.00	CLUTCH PIPE, LHD	1	Master cylinder to hose, To GHN5 410000
BHH1240	£20.00	CLUTCH PIPE, LHD	1	Master cylinder to hose, HN5 41001 on

Brake Hydraulics

AHH6506	NCA	BRAKE PEDAL, LHD	1	Single line brakes To GHN/D3 138400
AHH8523	NCA	BRAKE PEDAL, LHD	1	Single line brakes GHN/D4 138401 on
BHH1100	NCA	BRAKE PEDAL, LHD	1	Dual line brakes with direct acting servo, To GHN5 386600
BHH1892	NCA	BRAKE PEDAL, LHD	1	Dual line brakes with direct acting servo, GHN5 386601 on
AHH8421	NCA	PEDAL BOX, LHD	1	Single line brakes only
BHH1091	NCA	PEDAL BOX, LHD	1	Dual line brakes with direct acting servo, To GHN5 386600
BHH1860	NCA	PEDAL BOX, LHD	1	Dual line brakes with direct acting servo, GHN5 386601 To GHN5 410000
BHH2158	NCA	PEDAL BOX, LHD	1	Direct acting servo system GHN5 410001 on
BAU1715	NCA	MASTER CYLINDER, brake	1	
27H7751	NCA	SPRING	1	Belgium, Netherlands,
17H7985	£14.20	PUSH ROD	1	Luxembourg, France only
17H7560	£1.40	CIRCLIP	1	
GRK1026	£8.88	REPAIR KIT, master cylinder	1	
BHA4810	NCA	RESERVOIR, remote	1	Belgium, Netherlands,

AAU3815	£10.80	CAP, reservoir	1	Luxembourg, France only
AHH8685	NCA	HOSE, reservoir to cylinder	1	
AHH8418	NCA	BRACKET, reservoir	1	
GAC5022L	£123.10	BRAKE PIPE KIT, LHD	1	chrome bumper Single line brake models
GAC5040L	£146.70	BRAKE PIPE KIT, LHD	1	rubber bumper, Single line models, To 1976
GAC5034L	£124.30	BRAKE PIPE KIT, LHD	1	rubber bumper, Single models, 1976 on
MGL5050	£115.60	BRAKE PIPE KIT, LHD	1	Dual line brake models

Heater Controls

BHA4334	£12.10	KNOB, heat control, LHD	1	1962-74 (not USA after 70)
BHA4335	£13.20	KNOB, air control, LHD	1	1962-70
BHH739	£11.10	KNOB, air control, LHD	1	1970-74 (not USA)

Head Lights

27H4146A	£29.50	VERTICAL DIP UNIT	2	Europe except Germany & France
27H5981A	£30.60	VERTICAL DIP UNIT	2	Germany
GLB410	£3.20	BULB, headlamp	2	Europe (except France)
27H4146A	£29.50	VERTICAL DIP UNIT	2	France
GLB411	NCA	BULB, headlamp	2	
LULUB802	£103.80	HALOGEN CONVERSION KIT (Contains two Lucas H4 headlamps fitting either chrome or rubber bumper models).	1	
GLB472	£5.60	BULB, halogen	a/r	Europe (except France)
GLB476	NCA	BULB, halogen	a/r	France

Front Indicators (Chrome Bumper)

BHA4966Z	£24.00	LAMP, side & indicator	2	white/amber
37H4719Z	£36.70	LAMP, side & indicator	2	amber/amber mainly USA Market
516306	£3.90	LENS, indicator	2	amber
516307	£5.30	LENS, indicator	2	white (Italy)
518145	£8.30	LENS, side lamp	2	amber (mainly USA)
516308	£7.10	LENS, side lamp	2	white
606648X	£10.00	LENS, side & indicator	2	amber (mainly USA)

Front Indicators (Rubber Bumper)

BHA5322	£37.60	LAMP, indicator	2	amber
37H8759	£7.20	LENS	2	amber
BHA5324	£42.90	LAMP, side & indicator	2	amber, mainly USA
37H8760	NCA	LENS	2	white, Italy only

Rear Lamp Assemblies, To 1969

BHA4175	£64.00	LAMP	2	amber/red
BHA4176	£74.10	LAMP	2	red/red, mainly USA
57H5354	£4.90	LENS, indicator	2	amber
57H5359	£9.50	LENS, indicator	2	red, mainly USA
57H5357	£10.20	LENS, stop/tail	2	red

Rear Lamp Assemblies, 1970 on

BHA4973	£78.10	LAMP	2	amber/red
37H4737	£33.60	LENS	2	amber/red
BHA5260	£72.00	LAMP, assembly	2	red/amber, mainly USA
37H7119	£22.40	LENS	2	red/amber

Rear Number Plate Lights

127916	£27.20	NUMBER PLATE LAMP	2	
127916Z	£15.10	NUMBER PLATE LAMP, plastic	2	
502264	£12.50	COVER	2	
601724	NCA	LENS	2	Germany & Japan
57H5368	£4.00	GASKET	2	chrome
AHH7406	NCA	SUPPORT, number plate, (Japan)	1	bumper models
AHH7892	NCA	SUPPORT, number plate, (Germany)	1	
AHH8309	NCA	SPACER	2	

Reversing Lamps

BHA4621	NCA	LAMP, reverse	2	amber, France only
37H7512	£4.90	LENS	2	amber

Switches

13H2639	NCA	FLASHER UNIT, Germany	1	To GHN/D3 138400
GFU2124	£5.20	FLASHER UNIT, Germany	1	GHN/D4 138401 To GHN/D5 360300

GFU2124	£5.20	FLASHER UNIT, Germany/Sweden	1	GHN/D5 360301 To 410000
13H6957	NCA	SWITCH, brake test	1	Switzerland, Belgium
BHH662	NCA	HARNESS, brake test switch	1	Netherlands & Luxembourg
BHA4990	£32.20	SWITCH, brake test	1	Canada, Sweden & Germany
				GHN/D4 138401 To 158370
BHA4933	NCA	SWITCH, brake test	1	Canada, Sweden & Germany
				GHN/D4 158371 To 187210
BHA4990	£32.20	SWITCH, brake test	1	Canada, Sweden & Germany
				GHN/D5 187211 on
13H6322	£31.10	SWITCH, lighting	1	Canada, Sweden & Germany
13H6952	£27.80	SWITCH, heater	1	GHN/D5 187211
				To GHN/D5 296000
37H2679	NCA	SWITCH, hazard warning	1	Canada, Sweden & Germany
				GHN/D5 187211
				To GHN/D5 267580
37H7422	£31.20	SWITCH, hazard warning	1	Canada, Sweden & Germany
				GHN/D5 267581
				To GHN/D5 296000
BHA5237	£22.80	SWITCH, (HRW), GT tailgate (Heated rear window).	1	Canada, Sweden & Germany
				GHN/D5 187211
				To GHN/D5 296000
C38637	£14.90	SWITCH, fog & spotlight	1	Canada, Sweden & Germany
				GHN/D5 187211 on
BHA5191	NCA	SWITCH, lighting	1	Canada, Sweden &
BHA5184	£18.40	SWITCH, heater	1	Germany GHN/D5
BAU1088	£30.00	SWITCH, hazard warning	1	296001 on
BHA5237	£22.80	SWITCH, (HRW), GT tailgate	1	
BHA4897	NCA	SWITCH, indicator stalk	1	Japan only
				GHN/D4 161087 To 187200
37H6022	£84.40	SWITCH, Indicator stalk	1	Canada, Sweden & Germany
				GHN/D5 219001 To 328000
37H8521	£66.10	SWITCH, Indicator stalk	1	Canada, Sweden & Germany
				GHN/D5
				328001 on
37H8566	NCA	CLIP, (switch with horn contact)	1	Canada, Sweden & Germany
37H2678	£82.70	SWITCH, wiper/overdrive stalk	1	GHN/D4 219001
				To GHN/D5 328000

HZA5103	£42.36	RADIO CONSOLE, black	1	1976 on

General Hardware & Fixings

Following is a listing of the common fasteners used on MG cars. These fasteners are for general use and are not intended to replace those listed for specific applications elsewhere in this catalogue. To aid identification by terminology, a screw is threaded for its full length. A bolt is only part threaded with a plain unthreaded shank area between the head and the thread. The part number two letter prefix of SH means that the item is a Screw with a Hexagon head. The prefix BH means a Bolt with a Hexagon head. The first number defines the thread type, UNF = 6, UNC = 5. The second and third numbers give the thread diameter in increments of 1/16", e.g. 04 = 1/4", 05 = 5/16", 10 = 5/8". The fourth and fifth digits show the length in increments of 1/8", e.g. 04 = 1/2", 16 = 2", 23 = 2 7/8". The last digit defines finish, 1 = zinc plated. This coding system is only applicable to bolts and screws; nuts & washers are coded by a similar system that follows some of the above principles.

Bolts and Set Screws

Ordering Information

Notification of prices

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change. Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter these prices without prior notice.

For the latest prices, please visit our website moss-europe.co.uk. All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable) and are correct at the time of going to print. Postage and packaging is not included. E&OE. Where the price is replaced with NCA this part is Not Currently Available. Please visit our website moss-europe.co.uk or call our sales staff for the latest availability information or to enquire if we can offer an alternative part.

Product supersessions

Moss Europe's policy is to detail the most up to date part information in our catalogues. Where possible parts are kept to original specification. However, in some instances we have to supersede to the most viable alternative product to maintain supply and keep cars on the road. Every effort is made to ensure high quality products.

UK ordering

We accept orders by mail, telephone, e-mail, fax and on-line at moss-europe.co.uk. If you have the opportunity, we invite you to visit one of our branches. Remember, supplying details of your car, (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications) saves time and helps us to help you. Please inform us of your customer number, as this will speed up the processing of your order.

Overseas ordering

We accept orders by mail, telephone, e-mail, fax and on-line at moss-europe.co.uk. If you visit the U.K. please come and visit one of our branches. When ordering, please ensure that you enclose full details of your name, address and customer number, plus details of your car (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications).

Please note: Overseas orders are often subject to local import duties, taxes and Customs clearance, which will need to be paid for at the point of entry. These charges are NOT included in the price of the goods or delivery prices. All relevant Customs forms and documentation needed to ensure the order arrives with the minimum of delay, will be included with your shipment. If you have any special requirements, please contact us to discuss them. Delivery charges are dependent upon the size and weight of the shipment. If a quotation is required prior to placing an order, please contact the export department at your chosen branch and they will be pleased to supply a full quotation.

Parts back-order system

A back-order system is used when a part is not in stock at the time of ordering. If the item is expected to become available within 6 months, then it will be put on back-order, unless the customer instructs us otherwise. When we have the parts in stock, the back-order will be processed automatically and the item will be dispatched to the customer. If the particular part becomes No Longer Available (NLA) or does not become available within 6 months the back-order will be cancelled. If you are unsure when you placed a back-order contact your local branch.

Dispatch & delivery methods

Orders for delivery in the UK may be dispatched by regular post for small/lightweight items, larger items may be dispatched via a courier. Please call us or visit our website for the best delivery option for your order and the latest delivery prices. For delivery outside the UK we offer the following services.

- Economy delivery (by road): 2 to 5 days (approximately).
- Express delivery (by air): 1 to 2 days (Guaranteed) - next day service to most countries.
- We also offer an Airmail packet service but this is limited to low value orders, delivery times vary from 5-14 days depending on your location.

For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on weight band, volume, destination and delivery time. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own delivery and dispatch.

Windscreen delivery information

We always suggest that windscreens should be collected from one of our branches to ensure you are able to transport your glass with the utmost of care. However, we understand that this is not always possible. To minimise the possibility of damage to the windscreen in the shipping process, it is now Moss Europe's policy to ship windscreens packed in a specially designed heavy duty 'Tri-Wall' cardboard box. The price of this box is £35.00 (Ex VAT), non-refundable and is not included in the price of the product. The crate's dimensions will also increase shipping costs, particularly in EU countries. The crate dimensions are 150cm x 33cm x 74cm. The maximum volumetric weight is 92kgs. For more information please contact your nearest Moss branch.

Hazardous goods delivery information

At the time of going to print, Moss Europe Ltd. Conforms to international shipping regulations regarding packaging and transportation of Hazardous Goods by road and sea freight (only). Due to these international shipping regulations and licencing rules all goods deemed as Hazardous are currently available for shipping to the UK and Europe only. If you place an order containing Hazardous goods and your shipping address is not in the UK or Europe, we will not be able to ship this item to you. Please contact your local branch or visit our website moss-europe.co.uk for the latest delivery information of Hazardous goods.

Quotations & payment methods

We will be pleased to provide a full parts quotation detailing price, availability and relevant shipping costs. Payment may be made by cash, personal cheque (to the card guarantee limit), Certified Bank Draft, Sterling Traveller's Cheques and credit or debit card including:

Mastercard, Visa, Delta. If you intend to make payment by Cheque or Bankers Draft when using our fast mail-order parts service, please confirm parts availability and carriage charges. We can accept payments using PayPal for website, email and phone orders.

Value added tax (VAT)

Value Added Tax (VAT) at the current UK rate of 20% will be levied on all orders being dispatched to countries within the UK, including Northern Ireland. Shipments to countries outside the UK, including all EU countries, will not be charged VAT.

Our UK website will only take payment in GB pounds (£).

Exchange units

We are able to offer a full rebuild service on numerous major components in our product range. We offer this service as an alternative to direct replacement parts, or when a brand new item is no longer available. However, the continuity of this exchange scheme needs the understanding and co-operation of our customers in relation to several important points: It is important to remember that "rebuild" does not mean "brand new". Rebuilding a unit involves stripping, cleaning, inspecting and re-assembling the unit. During this process, parts showing signs of wear will either be completely replaced or suitably renovated. However, it is not always feasible for major sub-components to be replaced with brand new ones, for example, an exchange engine will not have a new block. Due to the nature of certain product lines, some items can only be offered on a "one for one" exchange basis. This effectively means that you must offer us a viable unit before we can release a fully rebuilt item from our stock. In some instances we can only carry out reconditioning of your own unit. Our staff will inform you if this is the case.

All exchange units are subject to a surcharge. This surcharge serves two purposes; firstly, it acts as an incentive for you to return your old unit, and secondly it provides us with financial cover if your returned unit proves unsuitable for exchange purposes.

Whether or not your returned unit is suitable for exchange purposes cannot be ascertained until it is made available to us for inspection. As a general rule, suitable for exchange basically excludes any items that are beyond reasonable repair (e.g. crankcases pierced by a connecting rod) or units irrevocably damaged. We are also unable to accept units unless they are returned in whole, complete form (i.e. differential units which are returned partly stripped with no bearings and all the shims missing are not generally accepted), nor do we accept a "box of bits".

Surcharges will only be refunded once our core department has passed the item as serviceable. Under no circumstances can any exchange unit be shipped overseas until we receive your original unit. We have predetermined prices for our exchange units based on our experience of repair costs for a gearbox, axle or engine. Occasionally, however, the damage to the unit is so great that we will contact you before beginning work on your unit to advise you of any additional cost that may be incurred during the rebuild of the unit. We can return the unit (at your cost) if this proves unacceptable.

'Old unit' returns

Exchange items including reconditioned engines are subject to a surcharge that is refunded when a rebuildable unit (core) is returned. When you receive the rebuilt unit, attached to it will be a Core Return Authorisation Tag. This tag must be removed from the rebuilt unit and attached to the returned core in order to receive credit. Cores must be returned within 90 days of purchase in the original box, carton or engine cradle supplied with the rebuilt unit. Cores must be shipped clean and empty of fluids. Cores must be complete, assembled and rebuildable to receive credit or refund. You must pay all shipping charges for the return of the core and these charges are not refundable.

Warranty

All parts are warranted against defects in materials and workmanship for a period of twelve (12) months from the date of purchase. The warranty does not cover failure resulting from incorrect installation or misuse; failure during any competition, motorsports or track events; failure of any, or caused by any, related component. The warranty does not cover labour charges, nor will a warranty settlement be greater than the cost of the original component. Should you need to make a warranty claim, please contact us immediately at the branch of purchase. We will then advise you as to the best course of action. With all warranty claims a copy of the original purchase invoice must be produced.

Warranty returns

Parts that fail in use may be returned for 12 months from the date of purchase. Returns must be accompanied by the original invoice - no warranty claims will be paid without a copy of the original invoice. Return freight will be reimbursed. Electrical parts returned for warranty will be tested and if found functional, no return credit will be given and the part will be returned. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Non-warranty returns

All uninstalled parts, in their original packaging may be returned within 90 days for any reason. A copy of the original invoice or the picking label (which is generally attached to the original packaging) must accompany the return. Return freight is paid by the customer. If the return is due to our error, the return freight will be reimbursed. Parts returned outside of this policy or in non-resalable condition may not be accepted or may be assessed a 15% handling fee. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Customer service

We value your custom and wish to ensure that you receive the very best service. Every effort will be made to provide you with Quality Parts and Expertise in a relaxed, helpful and friendly manner. Should you consider the service you receive from us to be unsatisfactory, or you have any problems with the part(s) purchased, please advise a member of the sales team at the originating branch. If the matter is not resolved to your satisfaction, please contact our Customer Services Department and we will do our very best to resolve the issue, either email: customerservices@moss-europe.co.uk or write to:

British Motor Heritage

Moss Europe Ltd. Is a British Motor Heritage approved specialist. Our agreement with British Motor Heritage allows us the use of marque logos and some of the artwork contained within this catalogue.

PAINT & COLOUR CODES

Here is a list of the colours used on the MGB. The colours are carefully blended to be an exact match to the original paint as used by the factory, but it is worth observing that your car may well have faded from its original colour over the years. For this reason before you start, we recommend that you do a test spray of any aerosol on a piece of old metal or a carefully selected area of the car where a mismatch will not be noticed. The boot or spare wheel area is often a convenient place to do your testing. We can supply paint in either aerosol or brush-on format (not for spray shop use). The aerosols come in 400ml cans and the brush-on paints are available in 125ml cans with a brush in the cap (except for engine and chassis paints, which are supplied in 500ml tins).

KEY TO PAINT CODES

Tartan Red (9)
1963-69 CCRD9 (TU)

On the right are the paint colours applied to MGB models during production (see example left).

- Tartan Red - Is the colour name.
- (9) - The figure in brackets is the original MG factory paint code.
- 1963-69 - The dates refer to model years during which the paint was used.
- CCRD9 - Is the Moss paint code.
- (TU) - Means that a touch up option is available.
- *NLA - Means that the colour is no longer available from Moss.

Tartan Red (paint code 9) was available for the 1963 to 1969 model year cars. It is available from Moss as an aerosol (part no. CCRD9) or as a touch up can (part no. CCRD9TU).

TRIM COLOURS

Moss supply trim for the MGB, Roadster and GT, from complete interior trim kits right through to replacement door trim panels. Between 1962 and 1969, MGB seats were finished with leather facings. Trim Kits, though colour matched, were all vinyl, and incorporated piping to match the seats. From 1970 onwards the interior trim was changed on the MGB, the seat covers for the Roadster were only available in Vinyl and the GT got a nylon centre panel in the seats. The colours available were: black, beige, autumn leaf, ochre and navy. Our interior trim kits are all made from original colour vinyls of correct specification mounted on accurately die cut boards. Much time and money has been invested in producing exact replacement parts including the tooling to produce original heat formed patterns. Please see the colour chart below or contact Moss Europe for full details.

	A = Black
	R = Red
	K = Autumn Leaf
	N = Navy Blue
	X = Beige
	T = Ochre
