

Duplex Vernier Gear Set

Part Number: TT1328X

All 1147/1295cc Small Crankshaft
Engines To 1971 Approx

Kit Contents:	Part No.	Qty.	Description
	TT13281	1	Crankshaft Gear
	145866	1	Tensioner
	2H4286	1	Timing Chain
	TT1225	1	Vernier Timing Gear
	036411	1	Lock Tab

General Notes:

The installation of these gears is a straight forward replacement for the standard simplex gear set.

The crank gear is installed and the standard spacer shims are retained until the alignment of the two gears can be checked, they should be parallel.

The tensioner is replaced with the standard version with the cut-out towards the engine plate.

The vernier gear can only be installed in one position, with the adjuster bolts facing you. When installation is complete make sure that these screws are fitted with a thread lock fluid to ensure safe retention.
